online american history: Reading and Writing American History Peter Charles Hoffer, William W. Stueck, William James Hull Hoffer, 2011-08-16 As American colleges and universities strive to prepare twenty-first-century students for an ever-changing world, the importance of studying history within a liberal arts curriculum can be forgotten. Noting that the students of today are very present-minded, the authors of Reading and Writing American History show how learning about history can be seamlessly integrated with up-to-the-minute technology, blending the past, the present, and even the future. Following the philosophy that students should become doers rather than simple consumers, the book aims to teach historical methods and skills while engaging students in a way no ordinary textbook can. The book is thus really a work-text, with opportunities for students to pause and reflect on what they are learning every few pages. Each chapter presents students not only with a period of American history, but also with a specific task to help them become better historians; for example, the chapter on the Civil War encourages students to use the Internet for research but also instructs them on how to tell valid online sources from spurious ones. The chapters include in-depth examinations of previously ignored or marginalized peoples, fulfilling the new multicultural mandates of history departments. By bringing students face to face with the questions that every history teacher and scholar confronts, the authors ensure that history becomes a living and breathing field of study for today's students.

This story includes the courage showed by the early explorers and the colonists who persevered through extreme hardship with hard work and faith in their God. As the American nation grew, more immigrants were drawn to the promise of the American Dream. Although many were able to benefit from the fruits of their labors, others people groups, like African slaves and Native Americans, struggled under hardship. A new national identity began to be formed, ultimately, coming into conflict with the British hierarchy. Following independence, the new American nation would expand from sea to sea, but also divide from North to South culminating in the Civil War. New freedoms were ensured, but the wounds of the nation would take time to heal. online american history: Making Histories Paul Ashton, Tanya Evans, Paula Hamilton, 2020-09-21 If historical culture is the specific and particular ways that a society engages with its past, this book aims to situate the professional practice of public history, now emerging across the

world, within that framework. It links the increasingly varied practices of memory and history-making such as genealogy, podcasting, re-enactment, family histories, memoir writing, film-making and facebook histories with the work that professional historians do, both in and out of the academy. Making Histories asks questions about the role of the expert and notions of authority within a landscape that is increasingly concerned with connection to the past and authenticity. The book is divided into four parts: 1. Resistance, Rights, Authority 2. Memory, Memorialization, Commemoration 3. Performance, Transmission, Reception 4. Family, Private, Self The four sections outline major themes emerging in public history across the world in the 21st century which are all underpinned by the impact of new media on historical practice and our central argument for the volume which advocates a more capacious definition of what constitutes 'public history'.

online american history: Interpretations of American History Vol. I Francis G. Couvares, 2000-07 Contrary to conventional wisdom, no area of study is outdated more quickly than history, and no time has been more turbulent for the discipline than our own. This classic point/counterpoint reader in American history, now in a completely revised and updated seventh edition, takes note of history's impermanence, giving voice to the new without disposing of the old. In ten lively chapters, essays by the editors introduce dialectical readings by distinguished historians on topics from Reconstruction to the present. The essays and readings address history's timeless questions: Reconstruction: Change or Stasis?, American Imperialism: Economic Expansion or Ideological Crusade?, and The Civil Rights Movement: Top-Down or Bottom-Up? New readings are included on African Americans, women, and immigrants. In the fray of debate, eminent historians from Samuel Hays and Alfred Chandler to John Lewis Gaddis, Walter LaFeber, and Kathryn Kish Sklar struggle to interpret the past. The editors' essays moderate.

online american history: Uprooting Racism - 4th Edition Paul Kivel, 2017-08-28 In 2016, the president-elect of the United States openly called for segregation and deportation based on race and religion. Meanwhile, inequalities in education, housing, health care, and the job market continue to prevail, while increased insecurity and fear have led to an epidemic of scapegoating and harassment of people of color. Yet, recent polls show that only thirty-one percent of white people in the United States believe racism is a major societal problem; at the same time, resistance is strong, as highlighted by indigenous struggles for land and sovereignty and the Movement for Black Lives. Completely revised and updated, this fourth edition of *Uprooting Racism* offers a framework around neoliberalism and interpersonal, institutional, and cultural racism, along with stories of resistance and white solidarity. It provides practical tools and advice on how white people can work as allies for racial justice, engaging the reader through questions, exercises, and suggestions for action, and includes a wealth of information about specific cultural groups such as Muslims, people with mixed heritage, Native Americans, Jews, recent immigrants, Asian Americans, and Latino/as. Previous editions of *Uprooting Racism* have sold more than 50,000 copies. This accessible, personal, supportive, and practical guide is ideal for students, community activists, teachers, youth workers, and anyone interested in issues of diversity, multiculturalism, and social justice. Paul Kivel is an award-winning author and an accomplished trainer and speaker. He has been a social justice activist, a nationally and internationally recognized anti-racism educator, and an innovative leader in violence prevention for over forty years.

Although it is a directory, the volume is topically organized, and within the taxonomic structure the relevant organizations are listed not only with contact information but with a brief paragraph describing what the organization (whether government or nongovernmental) does related to that topic. It is focused on Washington—in order to be listed, an organization must have an office in the Washington metropolitan area. These descriptions are not boilerplate advertising material from the organizations; rather, they are hand-crafted by a talented freelance research team. In addition, the Washington Information Directory pulls together 55 organization charts for federal agencies, congressional resources related to each chapter topic, hotline and contact information for various specific areas of interest (from Food Safety Resources to internships in Washington), and an extensive list of active congressional caucuses and contact details. It has two appendices, one with thorough information on congresspersons and committees, and the second with governors and embassies. With more than 10,000 listing and coverage of the new presidential administration, the 2019-2020 Edition features contact information for the following: • 116th Congress and federal agencies • Nongovernmental organizations • Policy groups, foundations, and institutions • Governors and other state officials • U.S. ambassadors and foreign diplomats • Congressional caucuses
