play iredy pizza game: *Playful Pedagogy in the Pandemic* Emily K. Johnson, Anastasia Salter, 2022-08-26 Educational technology adoption is more widespread than ever in the wake of COVID-19, as corporations have commodified student engagement in makeshift packages marketed as gamification. This book seeks to create a space for playful learning in higher education, asserting the need for a pedagogy of care and engagement as well as collaboration with students to help us reimagine education outside of prescriptive educational technology. Virtual learning has turned the course management system into the classroom, and business platforms for streaming video have become awkward substitutions for lecture and discussion. Gaming, once heralded as a potential tool for rethinking our relationship with educational technology, is now inextricably linked in our collective understanding to challenges of misogyny, white supremacy, and the circulation of misinformation. The initial promise of games-based learning seems to linger only as gamification, a form of structuring that creates mechanisms and incentives but limits opportunity for play. As higher education teeters on the brink of unprecedented crisis, this book proclaims the urgent need to find a space for playful learning and to find new inspiration in the platforms and interventions of personal gaming, and in turn restructure the corporatized, surveilling classroom of a gamified world. Through an in-depth analysis of the challenges and opportunities presented by pandemic pedagogy, this book reveals the conditions that led to the widespread failure of adoption of games-based learning and offers a model of hope for a future driven by new tools and platforms for personal, experimental game-making as intellectual inquiry.

play iredy pizza game: *Borderlands Saints* Desirée A. Martín, 2013-12-19 In *Borderlands Saints*, Desirée A. Martín examines the rise and fall of popular saints and saint-like figures in the borderlands of the United States and Mexico. Focusing specifically on Teresa Urrea (La Santa de Cabora), Pancho Villa, César Chávez, Subcomandante Marcos, and Santa Muerte, she traces the intersections of these figures, their devotees, artistic representations, and dominant institutions with an eye for the ways in which such unofficial saints mirror traditional spiritual practices and serve specific cultural needs. Popular spirituality of this kind engages the use and exchange of relics, faith healing, pilgrimages, and spirit possession, exemplifying the contradictions between high and popular culture, human and divine, and secular and sacred. Martín focuses upon a wide range of

Mexican and Chicano/a cultural works drawn from the nineteenth century to the present, covering such diverse genres as the novel, the communiqué, drama, the essay or crónica, film, and contemporary digital media. She argues that spiritual practice is often represented as narrative, while narrative—whether literary, historical, visual, or oral—may modify or even function as devotional practice.

In this remarkable memoir, Petruccelli reveals how she battled her way back onto the field and continued to fight even after she hung up her cleats. Leddy, 2017-07-11 Let me just say that if you took two people who grew up in different neighborhoods in Brooklyn and sat them down in a room together they could talk for hours on end and basically share the same stories as if they grew up right next door to each other You see that is why I am writing this book. The stories that I will share with you as you turn each page do not belong to me exclusively. They are YOUR stories just as much as they are mine. All you really have to do is change the names and faces and use your own neighborhood as their back drop and believe me they are yours. I have included after each story an empty page for you to put your story on it so it will become "Your Brooklyn " and a journal to pass on to those who you wish to remember your story
