pn review course online 2023: Building the Clinical Research Workforce: Challenges, Capacities and Competencies Carolynn Thomas Jones, Barbara E. Bierer, Stephen Sonstein, Hazel Ann Smith, Denise Snyder, 2024-08-05 This is an unprecedented time for clinical research. The number and complexity of clinical research studies have increased significantly in the last decade. Individual participation in clinical research broadened, with an increase in diverse populations, diseases, and geographic settings. The successful execution of these studies, however, has been compromised by an international shortage of clinical research professionals, coupled with an appreciation of the growing number of core competencies necessary for performance. Developed over a decade ago, the Joint Task Force for Clinical Trial Competency (JTF) Framework outlines the knowledge, skills and attitudes that are essential for the safe and effective conduct of a clinical study. This framework has been used to develop professional pathways, trainings, and certification programs and has been extended internationally through translation.
