private equity jobs: *Jobs with Inequality* John Peters, 2022-06-29 Income inequality has skyrocketed in Canada over the past few decades. The rich have become richer, while the average household income has deteriorated and job quality has plummeted. Common explanations for these trends point to globalization, technology, or other forces largely beyond our control. But, as *Jobs with Inequality* shows, there is nothing inevitable about inequality. Rather, runaway inequality is the result of politics and policies - what governments have done to aid the rich and boost finance and what they have not done to uphold the interests of workers. Drawing on new tax and income data, John Peters tells the story of how inequality is unfolding in Canada today by examining post-democracy, financialization, and labour market deregulation. Timely and novel, *Jobs with Inequality* explains how and why business and government have rewritten the rules of the economy to the advantage of the few, and considers why progressive efforts to reverse these trends have so regularly run aground.

And it is increasingly unlikely that the public sector will be willing or able to fill this gap. The Routledge Companion to Management Buyouts takes a much broader definition, reviewing the current state of research and theory and where further developments are likely to occur and incorporating PE and non-PE backed buyouts, as well as variations such as management buy-ins and management-employee buyouts. It goes beyond the purely financial perspective, exploring the many different aspects of management buyouts and incorporating related disciplines including strategy, organizational change, and HRM providing the first truly comprehensive authoritative resource on the topic. Other essays examine the practice of open research and how the diffusion of information technology influences the economics of knowledge accumulation. Analytically sophisticated and broad in scope, this book addresses a key topic at a time when economic growth is all the more topical.

Morris, 2012-02-07 The story of Steve Schwarzman, Blackstone, and a financial revolution, *King of Capital* is the greatest untold success story on Wall Street. In *King of Capital*, David Carey and John Morris show how Blackstone (and other private equity firms) transformed themselves from gamblers, hostile-takeover artists, and 'barbarians at the gate' into disciplined, risk-conscious investors while the financial establishment—banks and investment bankers such as Citigroup, Bear Stearns, Lehman, UBS, Goldman Sachs, Merrill Lynch, Morgan Stanley—were recklessly assuming risks, leveraging up to astronomical levels and driving the economy to the brink of disaster. Now, not only have Blackstone and a small coterie of competitors wrested control of corporations around the globe, but they have emerged as a major force on Wall Street, challenging the likes of Goldman Sachs and Morgan Stanley for dominance. Insightful and hard-hitting, filled with never-before-revealed details about the workings of a heretofore secretive company that was the personal fiefdom of Schwarzman and Peter Peterson, *King of Capital* shows how Blackstone and private equity will drive the economy and provide a model for how financing will work in the years to come.

here. private equity jobs: *The Big Business of Small Enterprises* World Bank, 2015-02-13 The World Bank Group promotes small and medium enterprise (SME) growth through both systemic and targeted interventions. Targeting means focusing benefits on one size-class of firms to the exclusion of others. Targeted support for SMEs is a big business for the World Bank Group, averaging around \$3 billion a year in commitments, expenditures, and gross exposure over the 2006-12 period. In the context of broader reforms, such targeted support can be a powerful tool. Targeting SMEs is not an end in itself, but a means to create economies that can employ more people and create more opportunity for citizens to achieve prosperity. A thriving and growing SME sector is associated with rapidly growing economies. A central challenge is to level the economic playing field by ensuring dynamic markets; strengthening market-support institutions; and removing constraints to participation. IEG found that financial sector development can have both a pro-growth and pro-poor impact by alleviating SMEs' financing constraints, enabling new entry of firms and entrepreneurs and better resource allocation. Layered on top of this are targeted forms of assistance; these interventions may build on a foundation of more systemic reforms, may come in tandem with them, or may in fact be a means to build systemic reforms from the bottom up. Any credible justification of targeted support to SMEs must be focused on establishing well-functioning markets and institutions, not simply providing a temporary supply of benefits to a small group of firms during a project's lifespan. Thus, targeted interventions need to leverage resources to produce broader benefits for institutions and markets. To make targeted support for SMEs more effective, the World Bank Group needs to do several things: Clarify its approach to targeted support to SMEs; Enhance the support's relevance and additionality; Institute a tailored research agenda; Strengthen guidance and quality control for such support; Reform MIGA's Small Investment Program.
