relias compliance training: *Fully Compliant* Travis Waugh, 2019-06-25 A Better Kind of Compliance Training Compliance training succeeds when you balance an organization's legal responsibilities with the real needs of the employees who you hope will learn and change their behavior. In *Fully Compliant*, Travis Waugh challenges traditional compliance training that focuses only on the legal risk of failing to comply with a specific mandate. With an ever-increasing number of compliance subjects to address, such programs are unsustainable. Instead, organizations must design compliance programs that serve a higher, broader purpose and build robust, resilient cultures focusing on integrity and ethics learning. Optimal compliance programs are flexible and create real learning experiences that change real behavior, thus diminishing the chance of misconduct in the first place. This book connects the three levers of human behavior—context, habit, and motivation— to help organizations craft holistic compliance training programs that do far more than check a box. It identifies ways to pick up small but meaningful wins in turning around an existing compliance program or designing a new course, which can turn stakeholders from skeptics into learning champions. And it offers an eight-step road map for implementing your own compliance learning plan. With this book, you'll be able to: Create behavior-based compliance training that generates measurable benefits. Make compliance training more engaging and impactful, not one-size-fits-all. Remain relevant as advances in technology shift compliance expectations in the years ahead. By putting the learner first, you can develop compliance that stick

No one likes to be told what to do, and that includes learners and instructional designers. So how can you make mandated courses more useful and interesting for everyone? In "Building Compliance Training That Actually Matters," Travis Waugh encourages instructional designers to reframe their thinking about mandated training. In this issue of TD at Work, he explains how you can work with subject matter experts (SMEs) to ensure that compliance requirements are met efficiently and effectively and that courses provide information employees can actually use.
