rich experience: *The American Secondary School* Leslie Owen Taylor, 1960

rich experience: *Making Sense of Motherhood* Beth M. Stovell, 2016-02-02 *Motherhood* provides a crucial place for exploring human life and its meaning. Within motherhood lies a deep tension between the pain, crisis, and association with death in motherhood and the joy, transformation, and life in motherhood. Few metaphors in Scripture (or in life) stand so firmly between life and death, love and loss, and joy and deep pain. After all, motherhood's meaning in part comes again and again at these crucial crossroads. Thus, motherhood has powerful implications for our biblical and theological understanding. Bringing together Jewish and ecumenical Christian scholars from North America, Oceania, and South America, this edited volume provides biblical and theological perspectives on understanding motherhood. The authors reflect upon a selection of biblical texts, systematic theologians, and Christian spiritual traditions to dialogue with the experience of maternity in its diverse manifestations. The purpose of the book is to provide essays that--through these biblical and theological lenses--engage the question of motherhood today, from the experience of pregnancy and birth, to raising children, to losing children and coping with grief. In this way, this volume helps to make sense of the complexity of motherhood.

rich experience: *The Pursuit of Clarity* Jeremy Albertsen, 2013-11 In *The Pursuit of Clarity*, author Jeremy Albertsen seeks to reveal the different levels of awareness and illuminates the different ways people view the world. He explores how these factors affect the way people interact with each other and our environment. In order to gain clarity, Albertsen made the choice to pursue a new way of life--to walk away from the things and events that were affecting his life and find a new path. He gave up the distractions, intoxicants, and numbing habits that Western culture uses addictively and sought to find a simpler, more enriching life. As part of this journey, he began writing a journal that he called *The Pursuit of Clarity*, and with every step, he chronicled the wisdom he gained. Following his own inner guidance, over the next years he found his balance and came to love life lived in concert with nature. He felt at peace in his body and began to feel good not about what he'd cut out of his life, but what he had put into his life. As we achieve higher levels of awareness we become empowered to raise our consciousness and activate dormant potentials to evolution. We can achieve perfect health, longevity and the magic of our quantum potential with the understanding of who we are and why we are here. Whether you want to participate or just be, *The Pursuit of Clarity* places you on the crest of the wave of human evolution as it reveals wisdom gathered on this journey.

rich experience: *The Image in Mind* Charles Taliaferro, Jil Evans, 2011-01-10 A philosophical inquiry into the strengths and weaknesses of theism and naturalism in accounting for the emergence of consciousness, the visual imagination and aesthetic values. The authors begin by offering an account of modern scientific practice which gives a central place to the visual imagination and aesthetic values. They then move to test the explanatory power of naturalism and theism in accounting for consciousness and the very visual imagination and aesthetic values that lie behind and define modern science. Taliaferro and Evans argue that evolutionary biology alone is insufficient to account for consciousness, the visual imagination and aesthetic values. Insofar as naturalism is compelled to go beyond evolutionary biology, it does not fare as well as theism in terms of explanatory power.

rich experience: *Rethinking Psychology* Michael W. Eysenck, 2025-05-07 Can subliminal messages motivate behaviour? Can you train your brain to increase your intelligence? Does parenting style affect personality? Psychologists and non-psychologists looking to understand human behaviour and cognition are forced to contend with a number of complexities unique to the field. Not least amongst these is the fact that psychology lacks the superficially attractive precision of theories in the hard sciences. It is inevitable, then, that non-psychologists are susceptible to numerous psychological myths. In this thought-provoking exploration of 43 of the most common psychological myths, Michael W. Eysenck examines the complexity of psychological science as well as the distortion of data, not only through the media, but also by researchers, textbook writers, and individuals themselves. He challenges the notion that the substantial progress made by psychology has provided enough convincing experimental evidence to successfully demolish these inaccuracies and explores the ways in which psychological research should be systematically improved so that psychology can take its place as a robust scientific discipline. Highly engaging, this is an informative read for psychologists at all levels, as well as members of the general public interested in challenging their own psychological understanding.

Kuss, 2019-05-16 The internet is so central to everyday life, that it is impossible to contemplate life without it. From finding romance, to conducting business, receiving health advice, shopping, banking, and gaming, the internet opens up a world of possibilities to people across the globe. rich experience: The End of International Adoption? Estye Fenton, 2019-06-28 Since 2004, the number of international adoptions in the United States has declined by more than seventy

percent. In *The End of International Adoption?* Estye Fenton studies parents in the United States who adopted internationally in the past decade during this shift. She investigates the experiences of a cohort of adoptive mothers who were forced to negotiate their desire to be parents in the context of a growing societal awareness of international adoption as a flawed reproductive marketplace. Many parents, activists, and scholars have questioned whether the inequality inherent in international adoption renders the entire system suspect. In the face of such concerns, international adoption has not only become more difficult, but also more politically and ethically fraught. The mothers interviewed for this book found themselves navigating contemporary American family life in an unexpected way, caught between the double-bind of work-family life and a new paradigm of thinking about the method—international adoption—that they used to create those families.

rich experience: Red Enlightenment Graham Jones, 2023-05-09 Why we need a materialist spirituality for the secular left, and how to build one. The left commonly rejects religion and spirituality as counter-revolutionary forces, citing Marx's famous dictum that religion is the opium of the people. Yet forms of spirituality have motivated struggles throughout history, ranging from medieval peasant uprisings and colonial slave revolts, to South American liberation theology and the US civil rights movement. And in a world where religion is growing, and political movements are ridden with conflict, burnout, and failure, what can the left learn from religion? Red Enlightenment argues not only for a deepened understanding of religious matters, but calls for the secular left to develop its own spiritual perspectives. It proposes a materialist spirituality built from socialist and scientific sources, finding points of contact with the global history of philosophy and religion. From cybernetics to liberation theology, from ancient Indian and Chinese philosophy to Marxist dialectical materialism, from traditional religious practices to contemporary art, music, and film, Red Enlightenment sets out a plausible secular spirituality, a new socialist praxis, and a utopian vision.

rich experience: Primary Physical Science Education Hans U. Fuchs, Federico Corni, 2023-10-10 This open access book is the first of two volumes that integrates a study of direct encounters with Primary Forces of Nature, Wind, Light, Rain, Heat and Cold, Water, etc., with imaginative narrative forms of communication. The approach developed in this book shows how the growth of cognitive tools (first of mythic and then of romantic forms of understanding) lets children make sense of experiencing physical phenomena. An in-depth description of Fluids, Gravity, and Heat as Basic Forces shows how primary sense-making can evolve into understanding of aspects of physical science, allowing for a nature-based pedagogy and application to environmental systems. The final chapter introduces visual metaphors and theatrical storytelling that are particularly useful for understanding the role of energy in physical processes. It explores how a mythic approach to nature can inform early science pedagogy. This book is of interest to kindergarten and primary school teachers as well as early education researchers and instructors.

rich experience: Future Tourism in a Robonomic World Stanislav Ivanov, Craig Webster, 2024-10-15 This book envisions the future of tourism in an economy that is largely automated. 'Robonomics' is the term given to this economic system that relies on robots, artificial intelligence and automation technologies for the production of goods and delivery of services instead of human labour. The volume examines the unique technological, socioeconomic and political situation that such an economy will create, and reflects on how tourism is then produced, consumed and paid for. The chapters explore some controversial solutions to the challenges of the robonomic economic system, such as redefinition of human rights, robot rights and universal basic income schemes. The chapters also consider the transition to a robonomic tourism ecosystem and the adjustments and innovations that will be required of consumers, industry and society.

rich experience: Philosophy of Emotion Christine Tappolet, 2022-11-28 In this book, Christine Tappolet offers readers a thorough, wide-ranging, and highly accessible introduction to the philosophy of emotions. It covers recent interdisciplinary debates on the nature of emotions as well as standard theories of emotions, such as feeling theories, motivational theories, and evaluative theories. The book includes discussions of the alleged irrationality of emotions, and looks into the question of whether emotions could not, in some cases, contribute positively to theoretical and

practical rationality. In addition, the role of emotions in the theory of virtues and the theory of values receives a detailed treatment. Finally, the book turns to the question of how we can regulate and even educate our emotions by engaging with music and with narrative art. The overall picture of emotions that emerges is one that does justice to the central role that emotions play in our lives, conceiving of emotions as crucial to our grasp of values. As an opinionated introduction, the book doesn't pretend to be neutral but aims to engage readers in contemporary debates. Each chapter closes with questions for further discussion and suggestions for further reading. Key Features: Written for advanced undergraduates, suitable as the main text in a philosophy of emotion course or as a complement to a set of primary readings Includes useful features for student readers like introductions, study questions, and suggestions for further reading in each chapter Considers whether emotions interfere with our reasoning or whether they can, in some cases, help us to be more rational Argues against basic emotion theory and social constructionism that emotions are both shaped by biological forces and social forces Discusses a variety of subjectivist and objectivist approaches, which share the assumption that emotions and values are closely connected.

CONSCIOUSNESS *Consciousness* is a thought-provoking collection of classic and contemporary philosophical literature on consciousness, bringing together influential scholarship by seminal thinkers and the work of emerging voices who reflect the diversity of the field. Editors Josh Weisberg and David Rosenthal have selected discussions that animate modern debates and connect consciousness to broader philosophical topics. Divided into five parts, *Consciousness* explores the nature of consciousness, consciousness and knowledge, qualitative consciousness, and theories of consciousness. A final section on agency and physicalism includes work by Galen Strawson and a previously unpublished article by Myrto Mylopoulos. Philosophically challenging yet accessible to students, *Consciousness* is an ideal reader for many undergraduate and graduate courses on consciousness or philosophy of mind, as well as a useful supplementary text for general classes in philosophy and a valuable reference text for philosophers of mind, cognitive scientists, and psychologists.

rich experience: *Consciousness and Its Place in Nature* Galen Strawson, Anthony Freeman, 2024-05-07 Panpsychism is the philosophical view that consciousness, mentality, or 'mindedness' in some form is fundamental in the universe. The idea has existed for centuries, but only recently has it had a serious resurgence. Galen Strawson has been on the front line of the battlefield on the topic of panpsychism since the 1990s. His paper on 'realistic monism', contained in this volume and originally published in 2006, is now considered something of a classic and a catalyst for panpsychism's recent revival. This long overdue new edition of the book gives the original commentators, where they feel they have something more to add, an opportunity to update their thinking on the topic of panpsychism in general and Strawson's realistic monism in particular. Seven new postscripts are included, which aim to enhance the original collection and push the discussion onwards. Eighteen years have passed since the first edition of this groundbreaking volume, and Strawson remains a distinctive and important voice in the field — the new edition is a must-read for all who are interested in consciousness studies.

rich experience: *Beyond Mediation* Daniel Njoroge Karanja, 2020-09-29 This book offers narrative analysis theory as a vehicle to understand indigenous mediation. The conceptual basis for this manuscript is the undisputed urgent need to understand mediation from a conflict transformation perspective highlighting the nexus between indigenous justice, forgiveness and trauma healing. This book is based on the assumptions that local communities have the tools/capabilities that they need to build stable and enduring peaceful co-existence. These capacities have been weakened by the political elite and bankrupt/corrupt leadership approaches that must be

rejected through empowerment and rigorous mediation brigades at the local level. The last chapter in the manuscript proposes a research center for indigenous justice, forgiveness and trauma healing in East Africa that will guarantee decades of scholarship and research around this subject in East Africa and beyond.
