rosa koire artist: The New Heretics Andy Thomas, 2021-12-14 This is the most balanced and well-reasoned investigation available into why people believe today's highly divisive conspiracy theories, from COVID and QAnon to 5G scares, fake news and more. Through their part in some huge controversies, conspiracy theorists are being branded the Number One Enemies of our times - the new heretics. They are seen to threaten the very fabric of modern society, spreading doubts and fears that result in Washington Capitol invasions, transmission mast burnings or the spread of anti-vaxx material. Yet the theorists prefer to call themselves truth seekers and see the mainstream establishment as the real disruptor, treating its increasingly harsh censorship as direct validation of their views. In truth, the new heretics, whose numbers are swelling, are symptoms of a wider polarization splitting apart much of the world in ideological divisions. Many have lost trust in politicians and the media, while nuanced debate is crushed and information overload and manipulation breeds uncertainty, civil unrest and mental health issues. How does the age old strategy of divide-and-rule play out in such an environment? Using his extensive experience of negotiating disputes between cynics and truth seekers, Andy Thomas explores the proliferation of conspiracy thinking, peeling back unhelpful layers of biased thinking on all sides to find more insightful ways to bridge the polarised divides and create a better way forward.

rosa koire artist: Soul Breathing Carrie L'Esperance, 2016-05-17 An exploration of the multidimensional interplay between body, mind, and spirit • Identifies the frequencies that support life and the dissonant frequencies incompatible with life, such as the imbalances of EMFs • Explains how to cultivate higher consciousness by building a strong light body • Includes techniques and exercises for psychic cleansing, physical and emotional detox, chakra and aura strengthening, and oracular dreaming Civilization has reached a critical threshold in time unlike any other. Whether life continues to evolve or devolve depends upon our ability to reach higher states of consciousness en masse. This requires calling upon the transformative power of the soul--a power not handed to us, but earned. We are living proof that the physical and spiritual realms of existence work together in unity. Yet for many of us our natural soul light and inner spiritual intuition are suppressed due to the distractions of day-to-day living and the electromagnetic pollution of our screen-filled technological world. In this exploration of the multidimensional interplay between the body, mind, and spirit, Carrie L'Esperance reveals how we can restore the flow of spiritual light in everyday living through the art of self-mastery. She explains how technology has severely reduced humanity's natural abilities and spiritual power. She shows how EMFs and wi-fi toast our energetic bodily systems and suppress our immune systems, blocking the ethereal frequencies of light and suppressing our creative intuition and higher powers. Detailing the spiritual bio-geometry of light and the holographic principle, she explores how the cells of our bodies receive light's deeper vibratory frequencies to support conscious evolution and soul development as well as explaining near-death and out-of-body experiences. She identifies the dissonant energies that endanger mind/body health and reveals new advances in brain science that allow us to transcend the malign influences that

hamper human evolution. She provides exercises and techniques for spiritual alignment and receptivity, including psychic cleansing, physical and emotional detox, chakra and aura strengthening, and oracular dreaming. Preparing us for the new cosmology and the greater community of worlds that is being revealed, L'Esperance shows that when we are properly connected with our soul's intelligence and cultivate the reception of higher frequencies of consciousness, then we are able to soul breathe, to absorb more pranic energy, the electromagnetic force and cosmic radiation that is the sustaining element of all life and consciousness.

rosa koire artist: *Sustaining our Environment for Better Future* Abdelnaser Omran, Odile Schwarz-Herion, 2019-08-05 This book covers a variety of topics regarding environmental practices in our day-to-day lives, as well as topics concerning sustainable development as a broader concept embracing ecological, social, and economic aspects to improve the quality of life for people around the world. Starting with the traditional controversy between the neoclassical economy and sustainable economy, which may be overcome by scientific progress due to more intensive scientific studies of the sustainability paradigm, the book proceeds to discuss various problems and challenges regarding environmental protection and sustainable development in different countries and on different continents. This includes analyses of recent, sometimes fatal mining disasters in South and North America, challenges and opportunities for rural development in Africa and Australia, an exploration of the role of women for sustainable development in Palestine, water safety and water security issues in Asia and Australia, the environmental exploitation of popular tourism destinations like Acapulco, and deforestation in Malaysia, suggesting innovative approaches to turn challenges into opportunities to effectively tackle these problems. Other topics addressed involve sustainable energy creation for future generations, a research survey among Romanian students on sustainable consumption behavior, validity testing for a heat transfer model in a greenhouse, and a case study on sustainability risk management practices at Malaysia's environmentally sensitive companies. The book closes with an examination of highly digitalized Smart Cities as a potentially valuable complement to conventional urban and rural lifestyles in connection with achieving the UN Sustainable Development Goals (SDGs).
