travis forbes genealogy: **Transforming Boasting of Self into Boasting in the Lord** Marcin Kowalski, 2013-07-12 This book uses rhetorical analysis to illuminate one of the most fascinating and complicated speeches by Saint Paul: 2 Cor 10-13. The main problem of the speech regards Paul's claim to be a true servant of Christ and to have the right to boast about it. Paul proves he is strong enough to be the leader of Corinth and paradoxically demonstrates that weakness should belong to the identity of an apostle. Another issue regards the legitimacy of his boasting. The egocentric boast based on the comparison with his opponents is the one that Paul calls foolish, but he is forced, nevertheless, to undertake it. The tool that ultimately enables him to transform self-aggrandizing speech into speech that is focused on Christ is his paradoxical boasting of weakness. The careful crafting of his discourse based on Christological principles ultimately speaks for qualifying it as a self-praise speech (periautologia) with a pedagogical, not defensive, purpose.

It continued the record of their descendants for a total of seven generations. Volume two highlighted notable members of the next eight generations, including such luminaries as General George S. Patton, the author Shelby Foote, and the actor Lee Marvin. Volume three traced the ancestry of the early Virginia members of this "Presidential Branch" back to the royalty and nobility of England and continental Europe. Volumes four, five, and six treated respectively generations eight, nine, and ten. Volume Seven presents generation eleven, comprising more than 10,000 descendants of the immigrant John Washington.
