the show billions cast: Crypto Titans: How trillions were made and billions lost in the cryptocurrency markets Markus Thielen, 2023-05-10 This book explains how the crypto industry started and evolved, and how everything in crypto is ultimately connected. It shows the players behind the \$3trn industry (at its peak) and how billions of dollars were lost. If you want to understand how everything in crypto is related, and why and when crypto prices move up or down, this book is for you. Praise for CRYPTO TITANS "Fortunes are won and lost when transformations happen. Bitcoin is transforming the entire economy, and there will be many fortunes won and lost. But the drumbeat continues. Technology always shines in the end. Read this book. Great lessons learned." — Tim Draper, Founder, Draper Associates "This book is essential reading for anyone interested in understanding the history of crypto. Markus has done an excellent job covering all the important names and stories that have shaped the crypto industry, consistently hitting the nail on the head with accurate analysis to help readers understand the motivations and personal characteristics. I highly recommend this book to anyone." — Jihan Wu, Founder, Bitdeer and Matrixport In this book you'll learn: How each of the four crypto bull markets of 2011, 2013, 2017, and 2021 unfolded, the drivers behind them, and what caused prices to correct violently during bear markets How crypto markets naturally progressed, and how everything is therefore related The players involved, and how they have made money—while others have lost large sums. Understanding these points may help the reader to identify the next crypto bull market. The last 3yrs have been the most instrumental in the development of the market, with the adoption level reaching not only individuals but also asset managers and corporate executives—only for the development to be cataclysmically overshadowed by bankruptcies of multi-billion-dollar crypto lending firms and crypto trading desks. Overview: The 1st of the book describes how Bitcoin started as a peer-to-peer payment system, and how the first crypto bubble was facilitated by onramp payment companies in 2011, which mainly funneled money into the notorious Mt. Gox exchange, eventually leading to investors' funds being stolen. The 2nd analyzes how China embraced Bitcoin and hailed it as a new form of money, which set off a massive speculative bubble in 2013. The 3rd describes how Ethereum got really started and set off the period of initial coin offerings (ICOs) that would lead to the third bull market in 2017. It also identifies the decisions that caused Tether to become the most important stablecoin. The 4th of the book shows how decentralized finance (DeFi) started, and how the speculative mania that was set off by the COVID stimulus checks would reach its peak. Binance became the largest crypto exchange despite its controversies, and effectively dethroned BitMEX as the most important crypto exchange. The crypto trading firms Alameda Research and Three Arrows Capital also became multi-billion-dollar players in the crypto bull market. The 5th of the book takes a deep dive into the 2022 bear market, exploring how crypto spectacularly crashed from a multi-trillion-dollar valuation and why the implosion of the Terra stablecoin caused \$60bn to vanish within a few days. The 6th contemplates the events that led to the implosion of Sam Bankman-Fried's crypto exchange FTX, once valued at \$32bn, after a meteoric 4yr rise.

the show billions cast: We the Possibility Mitchell Weiss, 2021-01-19 Can we solve big public problems anymore? Yes, we can. This provocative and inspiring book points the way. The huge challenges we face are daunting indeed: climate change, crumbling infrastructure, declining public education and social services. At the same time, we've come to accept the sad notion that government can't do new things or solve tough problems—it's too big, too slow, and mired in bureaucracy. Not so, says former public official, now Harvard Business School professor, Mitchell Weiss. The truth is, entrepreneurial spirit and savvy in government are growing, transforming the public sector's response to big problems at all levels. The key, Weiss argues, is a shift from a mindset of Probability Government—overly focused on safe solutions and mimicking so-called best practices—to Possibility Government. This means public leadership and management that's willing

to boldly imagine new possibilities and to experiment. Weiss shares the three basic tenets of this new way of governing: Government that can imagine: Seeing problems as opportunities and involving citizens in designing solutions Government that can try new things: Testing and experimentation as a regular part of solving public problems Government that can scale: Harnessing platform techniques for innovation and growth The lessons unfold in the timely episodes Weiss has seen and studied: the US Special Operations Command prototyping of a hoverboard for chasing pirates; a heroin hackathon in opioid-ravaged Cincinnati; a series of experiments in Singapore to rein in Covid-19; among many others. At a crucial moment in the evolution of government's role in our society, *We the Possibility* provides inspiration and a positive model, along with crucial guardrails, to help shape progress for generations to come.

the show billions cast: *Against Reform* John Pepall, 2010-10-16 In *Against Reform*, John Pepall offers a stringent critique of proposed reforms to Canada's political institutions. Examining electoral reform, an elected or provincially appointed Senate and reduced terms for Senators, fixed election dates, recall, initiative, and parliamentary reform, including 'free votes' and parliamentary confirmation of appointments, Pepall contends that these reforms are ill-conceived and would be harmful. At the root of Pepall's critique is an argument that, in Canada today, too many voters are quick to blame institutions rather than their own conflicting interests and understandings when they do not receive what they want out of government. While considering influential factors such as academic and media bias, political fashion, and the American example, Pepall's unique and highly readable assessment takes aim at the practical and theoretical understandings of reform across party lines.

the show billions cast: Economics is Like Sex Jonathan M. Lamb, 2018-04-03 Economics has become a taboo topic because it is not well understood. As a taboo topic it doesn't get discussed, and since it is not discussed, it is not understood—what a vicious cycle! Shying away from open discussions about money, budgets, markets, and trade has resulted in many misconceptions. Economics is all around us, and with a little common sense understanding of economic principals, Jonathan M. Lamb changes the way people view the world. *Economics is Like Sex* advocates that economics isn't a boring subject filled with charts and theories cooked up by some dead guys who lived centuries ago. Economics is about decisions. Decisions that relate to money, life, love, and happiness. Economics is not just for government and business, but is a way of everyday life, and some very simple economic thinking can make life just a little bit less complicated when it comes to money. Money can't buy love or happiness, but Jonathan Lamb opens the taboo topic to provide a common sense understanding of how basic, easy, common sense economic principals can change the way people view the world.

the show billions cast: Black Movement Jeffrey O. G. Ogbar, 2025-04-15 The Great Migration of African Americans from the South to northern and western cities between 1915 and 1970 fundamentally altered the political, social, and cultural landscapes of major urban centers like New York, Chicago, Philadelphia, and Detroit, and changed the country as well. By the late twentieth century, Black people were mayors, police chiefs, and school superintendents, often at parity and sometimes overrepresented in municipal jobs in these and other cities, which were also hubs for Black literature, music, film, and politics. Since the 1970s, migration patterns have significantly shifted away from the major sites of the Great Migration, where some iconic Black communities have been replaced by mostly non-Black residents. Although many books have examined Black urban experiences in America, this is the first written by historians focusing on the post-Great Migration era. It is centered on numerous facets of Black life, including popular culture, policing, suburbanization, and political organizing across multiple cities. In this landmark volume, Jeffrey O. G. Ogbar and his contributors explore the last half century of African American urban history, covering a landscape transformed since the end of the Great Migration and demonstrating how cities remain dynamic into the twenty-first century. Contributors are Stefan M. Bradley, Scot Brown, Tatiana M. F. Cruz, Tom Adam Davies, LaShawn Harris, Maurice J. Hobson, Shannon King, Melanie D. Newport, Jeffrey O. G. Ogbar, Brian Purnell, J. T. Roane, Chanelle Rose, Benjamin H. Saracco, and Fiona Vernal.
