Legions of self-help authors rightly urge personal development as the key to happiness, but they typically fail to focus on its most important objective: hardiness. Though that which doesn't kill us can make us stronger, as Nietzsche tells us, few authors today offer any insight into just how to springboard from adversity to strength. It doesn't just happen automatically, and it takes practice. New scientific research suggests that resilience isn't something with which only a fortunate few of us have been born, but rather something we can all take specific action to develop. To build strength out of adversity, we need a catalyst. What we need, according to Dr. Alex Lickerman, is wisdom—wisdom that adversity has the potential to teach us. Lickerman's underlying premise is that our ability to control what happens to us in life may be limited, but we have the ability to establish a life-state to surmount the suffering life brings us. *The Undefeated Mind* distills the wisdom we need to create true resilience into nine core principles, including: --A new definition of victory and its relevance to happiness --The concept of the changing of poison into medicine --A way to view prayer as a vow we make to ourselves. --A method of setting expectations that enhances our ability to endure disappointment and minimizes the likelihood of quitting --An approach to taking personal responsibility and moral action that enhances resilience --A process to managing pain—both physical and emotional—that enables us to push through obstacles that might otherwise prevent us from attaining our goals --A method of leveraging our relationships with others that helps us manifest our strongest selves Through stories of patients who have used these principles to overcome suffering caused by unemployment, unwanted weight gain, addiction, rejection, chronic pain, retirement, illness, loss, and even death, Dr. Lickerman shows how we too can make these principles function within our own lives, enabling us to develop for ourselves the resilience we need to achieve indestructible happiness. At its core, *The Undefeated Mind* urges us to stop hoping for easy lives and focus instead on cultivating the inner strength we need to enjoy the difficult lives we all have.

Everest Media,, 2022-05-13T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 If we're willing to accept that we don't have an endowed purpose but rather an evolved function, we can begin from any one of the many desires that populate our daily lives and follow it back through all the desires that lie beneath it to find the answer we seek. #2 The ultimate end toward which all living organisms aim their activities is survival and reproduction. However, when we evolved the ability to have thoughts and feelings about our thoughts and feelings, we gained the ability to make judgments about our experiences and choose which ones we'd rather have. #3 We can't help but want to become happy. We're incapable of not wanting to become happy. The pursuit of happiness is psychological law we must obey. Even people who appear to want nothing to do with happiness still want to be happy. #4 It is difficult to be happy because happiness requires the absence of suffering, and we often fail to appreciate these things as separate. We may think that things that bring us joy simultaneously protect us from suffering, but they actually make us more vulnerable to it.

New scientific research suggests that resilience isn't something with which only a fortunate few of us have been born, but rather something we can all take specific action to develop. To build strength out of adversity, we need a catalyst. What we need, according to Dr. Alex Lickerman, is

wisdom—wisdom that adversity has the potential to teach us. Lickerman's underlying premise is that our ability to control what happens to us in life may be limited, but we have the ability to establish a life-state to surmount the suffering life brings us. The Undeclared Mind distills the wisdom we need to create true resilience into nine core principles, including: A new definition of victory and its relevance to happiness The concept of the changing of poison into medicine A way to view prayer as a vow we make to ourselves. A method of setting expectations that enhances our ability to endure disappointment and minimizes the likelihood of quitting An approach to taking personal responsibility and moral action that enhances resilience A process for managing pain—both physical and emotional—that enables us to push through obstacles that might otherwise prevent us from attaining our goals A method of leveraging our relationships with others that helps us manifest our strongest selves Through stories of patients who have used these principles to overcome suffering caused by unemployment, unwanted weight gain, addiction, rejection, chronic pain, retirement, illness, loss, and even death, Dr. Lickerman shows how we too can make these principles function within our own lives, enabling us to develop for ourselves the resilience we need to achieve indestructible happiness. the undefeated mind alex lickerman: Ten Worlds Ash ElDifrawi, Alex Lickerman, 2018-10-02 Fresh on the heels of his phenomenally-received book, The Undeclared Mind, Dr. Lickerman and co-author Dr. ElDifrawi offer a whole new perspective on understanding and achieving happiness. In this highly engaging and eminently practical book-told in the form of a Platonic dialogue recounting real-life patient experiences- Drs. Lickerman and ElDifrawi assert that the reason genuine, longlasting happiness is so difficult to achieve and maintain is that we're profoundly confused not only about how to go about it, but also about what happiness is. In identifying nine basic erroneous views we all have about what we need to be happy-views they term the core delusions-Lickerman and ElDifrawi show us that our happiness depends not on our external possessions or even on our experiences but rather on the beliefs we have that shape our most fundamental thinking. These beliefs, they argue, create ten internal life-conditions, or worlds, through which we continuously cycle and that determine how happy we're able to be. Drawing on the latest scientific research as well as Buddhist philosophy, Lickerman and ElDifrawi argue that once we learn to embrace a correct understanding of happiness, we can free ourselves from the suffering the core delusions cause us and enjoy the kind of happiness we all want, the kind found in the highest of the Ten Worlds, the world of Enlightenment.

the undefeated mind alex lickerman: Be Better, Not Bitter Dakota Decker Jr., 2017-07-06 Being thrown into prison (or jail) is a soul-crushing life experience, and any prisoner has one of the two following choices pertaining to how they handle the experience they can become bitter, or they can become better. The natural choice is to become bitter many times, very, very bitter. Mr. Decker provides the reader his experience and understanding as to the basis of either choice. This is framed as either a fear-based or a love-based choice. This frame applies to both prisoner and nonprisoners alike, including why we incarcerate people in the first place. Using his prison experiences, social science, and many wise peoples quotes, he helps the reader see that if a prisoner or nonprisoner uses only the authors fear-based insights, anyone will naturally become bitter. However, if we all use

the authors love-based insights, well become better. Mr. Decker's insights and wisdom can and should be liberally applied to nonprison environments as his insights apply equally to every person in every walk of life. The reader comes away knowing he's able to withstand any and every one of life's challenges using love and forgiveness. Mr. Decker demonstrates that love-based thinking is the key to our peace of mind. Each one of us is entitled to and capable of the peace of mind he describes.

the undefeated mind alex lickerman: Do Nothing Celeste Headlee, 2020-03-10 "A welcome antidote to our toxic hustle culture of burnout."—Arianna Huffington "This book is so important and could truly save lives."—Elizabeth Gilbert "A clarion call to work smarter [and] accomplish more by

doing less.”—Adam Grant We work feverishly to make ourselves happy. So why are we so miserable? Despite our constant search for new ways to optimize our bodies and minds for peak performance, human beings are working more instead of less, living harder not smarter, and becoming more lonely and anxious. We strive for the absolute best in every aspect of our lives, ignoring what we do well naturally and reaching for a bar that keeps rising higher and higher. Why do we measure our time in terms of efficiency instead of meaning? Why can't we just take a break? In *Do Nothing*, award-winning journalist Celeste Headlee illuminates a new path ahead, seeking to institute a global shift in our thinking so we can stop sabotaging our well-being, put work aside, and start living instead of doing. As it turns out, we're searching for external solutions to an internal problem. We won't find what we're searching for in punishing diets, productivity apps, or the latest self-improvement schemes. Yet all is not lost—we just need to learn how to take time for ourselves, without agenda or profit, and redefine what is truly worthwhile. Pulling together threads from history, neuroscience, social science, and even paleontology, Headlee examines long-held assumptions about time use, idleness, hard work, and even our ultimate goals. Her research reveals that the habits we cling to are doing us harm; they developed recently in human history, which means they are habits that can, and must, be broken. It's time to reverse the trend that's making us all sadder, sicker, and less productive, and return to a way of life that allows us to thrive.

the undefeated mind alex lickerman: Immortal Clay Jones, 2020-04-28 Is There Life After Death? For many, death is terrifying. We try to live as long as possible while hoping that science will soon find a way to allow us to live, if not forever, then at least a very long time. Whether we deny our mortality though literal or symbolic immortality or try to turn death into something benign, our attempts fail us. But what if the real solution is not in denying death's reality, but in acknowledging it while enjoying a hope for a wonderful forever? Clay Jones, a professor of Christian apologetics, explores the ways people face death and how these "immortality projects" are unsuccessful, even destructive. Along the way, he points to the hope of the only true immortality available to all—the truth that God already offers a path to our hearts' deepest longing: glorious resurrection to eternal life.

the undefeated mind alex lickerman: Moving Through Parallel Worlds To Achieve Your Dreams Kevin L. Michel, 2013-08-17 Quantum physics has revealed that objects can exist in more than one location simultaneously, even though the objects are invisible to us in all but one location, that is, parallel universes exist. This is most blatantly revealed in the mind shattering 'double-slit' experiment and is at the core of what is called 'the measurement problem,' in quantum physics. The results are startling, but this is what the science is clearly showing. It is human awareness that causes matter to fix into a single position, and reveal a single reality. The science is showing that at every moment we become aware of our reality, the universe splits into unseen parallel dimensions and we become trapped in just one of these many parallel realities. This is all powerful stuff but what does this mean for our lives? What if you could learn how to access these parallel worlds that are being created? What if you could do what many billionaires and great minds in history have done but have only hinted at. What if you could move through parallel realities in order to achieve unfathomable greatness. Abraham Lincoln, Albert Einstein, Michelangelo, Nikola Tesla, Isaac Newton, John D. Rockefeller and many others all used this quantum mind power that is now

available to you. This is one of the most powerful books you shall ever read. With research from quantum physics, psychology, biology and behavioral epigenetics, as well as many great spiritual teachings, 'Moving Through Parallel Worlds' will guide you on a path to achieving your grandest ambitions. The title, 'Moving Through Parallel Worlds To Achieve Your Dreams,' is literal - based on the 'Many Worlds Interpretation of Quantum Mechanics,' and it is also a metaphor suggesting positive life transformation. This very night, you shall be reading and then applying the concepts in this book, and that moment will be the starting point of your mastery of wealth, romance, creation, and mastery of all things in the physical world. 'Moving Through Parallel Worlds' draws on science and timeless wisdom, to guide you on a path to unlimited power and enlightenment. 'Moving Through Parallel Worlds To Achieve Your Dreams' will allow you to bridge the discontinuity in your life from the point where you are at right now, to the point where you dream that you can be. This book shall put you into alignment with all that you have imagined possible for yourself and shall show you a path even to that which you may have considered impossible. This book has emerged so that you may be lifted up, and that you may come to realize the power you have to exist in a world that is exactly as you imagine it should be. This is your moment and this book is here, just for you. Enjoy the journey!

the undefeated mind alex lickerman: Up Hilary Tindle, 2013-05-30 Why looking up matters A positive attitude is important, but until now we didn't know how important. In Up, a practicing physician and NIH-funded researcher draws on her research and experience to show that our outlook on life—our unique patterns of thinking and feeling about ourselves, others, and the world—may be the key to how well and how fast we age. From wrinkles to cognitive decline, our outlook affects our health at every level. Using the framework of outlook GPS, Up illustrates how we can gauge our current attitude latitude and move to healthier ground. Tindle brings a fresh eye to attitudinal traits such as optimism, noting that it has many faces, including the face of her own struggling optimism. Using the 7 Steps of Attitudinal Change that she applies to her own patients, Tindle offers us a path toward healthy aging. Prescriptive and accessible, Up puts forward a paradigm shift in how we age and treat disease, giving even the most struggling optimists a chance for hope. It will appeal to readers of The Longevity Project by Howard S. Friedman and Leslie R. Martin as well as The Blue Zones by Dan Buettner.
