broken age walkthrough: *Nurses and Midwives in the Digital Age* M. Honey, C. Ronquillo, T.-T. Lee, 2022-02-25 Nurses and midwives must increasingly work in multi-disciplinary teams and engage with patients to navigate the data and information central to today's digitally-driven healthcare system. This book presents the proceedings of NI 2021, the 15th International Congress in Nursing Informatics. Originally planned to be held in 2020, the international year of the nurse and midwife, but postponed due to the SARS-CoV-2 pandemic, the conference, with the theme of nursing and midwifery in the digital age, was eventually held as a virtual event from 23 August to 2 September 2021, and the organizers made the decision to take advantage of its virtual nature and extend it to 9 days, with each day focusing on a different theme. This is reflected in the organization of the book, and the 212 papers included here, of which 67 are full papers with the remainder being workshop, panel, case study, and poster abstracts, are grouped into 9 sections. The papers were selected from a total of 437 submissions from more than 40 countries and cover: data analytics and the use of nursing data; digital health nursing workforce development; health policy, service delivery and ethics; informatics in clinical care; innovation and entrepreneurship in nursing; integrated and connected care; nursing information systems; patient participation and citizen involvement; and systems implementation and digital workplaces. Highlighting developments in nursing and midwifery and the way in which nurses and midwives are embracing the digital age, the book will be of interest to all those involved in healthcare today.

broken age walkthrough: Museums in a Digital Age Ross Parry, 2013-01-11 The influence of digital media on the cultural heritage sector has been pervasive and profound. Today museums are reliant on new technology to manage their collections. They collect digital as well as material things. New media is embedded within their exhibition spaces. And their activity online is as important as their physical presence on site. However, 'digital heritage' (as an area of practice and as a subject of study) does not exist in one single place. Its evidence base is complex, diverse and distributed, and its content is available through multiple channels, on varied media, in myriad locations, and different genres of writing. It is this diaspora of material and practice that this Reader is intended to address. With over forty chapters (by some fifty authors and co-authors), from around the world, spanning over twenty years of museum practice and research, this volume acts as an aggregator drawing selectively from a notoriously distributed network of content. Divided into seven parts (on information, space, access, interpretation, objects, production and futures), the book presents a series of cross-sections through the body of digital heritage literature, each revealing how a different aspect of curatorship and museum provision has been informed, shaped or challenged by computing. Museums in a Digital Age is a provocative and inspiring guide for any student or practitioner of digital heritage.

broken age walkthrough: *Navigating Imaginary Worlds* Mark J.P. Wolf, 2025-06-16 This edited anthology offers a collection of essays that each look at various types of wayfinding. Together they explore a variety of wayfinding tools and techniques and their applications, as well as ways of keeping track of the construction of worlds too. With transmedial worlds extending over multiple media, multiple authors, and sometimes even multiple decades of creation, a wealth of different issues can arise; worlds need to direct audience members into how to organize them conceptually. Edited by Mark J. P Wolf and featuring contributions from a distinguished set of authors from interdisciplinary backgrounds, this book enriches the theory, history, and practice of world-building, through the exploration of navigation. The essays have many overlapping concerns and together they provide the reader with a range of discussions regarding wayfinding and the many ways it intersects with world-building - and world-experiencing - activities. Thus, rather than just analyzing worlds themselves, the anthology also asks the reader to consider analyzing the act of world-building itself. This collection will be of interest to students and scholars in a variety of fields including Subcreation Studies, Transmedia Studies, Popular Culture, Comparative Media Studies, Video Game Studies, Film Studies, and Interdisciplinary Literary Studies.
