follow freeman walkthrough: Educating Second Language Teachers Donald Freeman, 2016-09-27 Donald Freeman examines how core ideas and practices in educating second language teachers relate to and differ from teacher education in other content areas. He weaves together research in general and second language teacher education with accounts of experience and practice to examine how background knowledge is defined in language teaching. Throughout, Freeman demonstrates how understanding the processes of teacher learning, knowing, thinking, and reflecting are 'the same things done differently' in second language teacher education. Educating Second Language Teachers reconsiders pre- and in-service teacher education, and proposes a detailed, comprehensive design theory for teacher education. "A masterful account of the landscape of second language teacher education and the development of its theoretical assumptions and practices. follow freeman walkthrough: Exploring Chemistry (Loose-Leaf) Matthew Johll, 2012-05-04 Matthew Johll's Exploring Chemistry covers the standard topics for the nonmajors course in the typical order, but each chapter unfolds in the context of a single case study that helps students connect what they are learning to real-life situations. For example, students work through the often-difficult topics of molecular structure, gas laws, and organic chemistry by learning about the development of powerful new chemotherapy drugs, new technologies for screening airline passengers, and the creation of biodegradable biopolymers. It's the same case-driven approach that Johll uses in his acclaimed Investigating Chemistry (now in its Third Edition) but Exploring Chemistry goes beyond the other book's specific focus on examples from forensic science to use real-life stories from cooking, athletics, genetics, green chemistry, and more.
