the political process quizlet: *Empowering Teachers to Build a Better World* Fernando M. Reimers, 2020-03-23 This open access book presents a comparative study on how large-scale professional development programs for teachers are designed and implemented. Around the world, governments and educators are recognizing the need to educate students in a broad range of higher order cognitive skills and socio-emotional competencies, and providing effective opportunities for teachers to develop the expertise needed to teach these skills is a crucial aspect of effective implementation of curricula which include those goals. This study examines how large-scale efforts to empower teachers for deeper instruction have been designed, how they have been implemented, and their outcomes. To do so, it investigates six programs from England, Colombia, Mexico, India, and the United States. Though all six are intended to broaden and deepen students' curricular aspirations, each takes this expansion of curricular goals in a different direction. The ambitious education reforms studied here explicitly focus on building teachers' capacity to teach on a broader set of goals. Through a discerning analysis of program documents, evaluations, and interviews with senior leaders and participants in the programs, the book identifies the various theories of action used in these programs, examines how they were implemented, and discusses what they achieved. As such, it offers an indispensable resource for education leaders interested in designing and implementing professional development programs for teachers that are aligned with ambitious instructional goals.

the political process quizlet: *Macroeconomic Measurement Versus Macroeconomic Theory* Merijn Knibbe, 2019-12-06 Ideally, scientific theory and scientific measurement should develop in tandem, but in recent years this has not been the case in economics. There used to be a time when leading economists, or their students, established or led statistical offices and took care that the measurements were consistent with the theory (and vice versa). Not anymore. Macroeconomic theorists and macroeconomic statisticians do not even speak the same language any longer. They do use the same words, such as 'consumption', 'investments' or 'unemployment' but the meanings can often be different. This book maps the differences between macroeconomic theory and measurement and explores them in some detail while also tracking their intellectual, historical and, in some cases, ideological origins. It also explores the possible policy implications. In doing so, the book draws on two separate strands of literature which are seldom used in unison: macro-statistical manuals and theoretical macro-papers. By doing so, the book contributes to the effort to bridge the gap between them without compromising on the idea that a meaningful science of economics should, in the end, be based upon individual people and households and their social and cultural embedding instead of a 'representative consumer', or Robinson Crusoe figure. This work is essential reading for students, economists, statisticians, and professionals.

the political process quizlet: Manorial Capitalism, Enslavement, and the Logic of Dividuation Raphael Sassower, 2025-03-31 Manorial Capitalism, Enslavement, and the Logic of Dividuation proffers three perspectives on the plantation slave economy of the Antebellum South. The first explores the paternal function as exemplified in the structural authority of the lord of the manor both symbolically and operationally. This figure of masculine authority persisted from the Medieval period to orchestrate what is called here Manorial Capitalism. The second examines the exploitation and alienation that epitomize the logic of capitalism from the plantation economy to the present. And the third deploys retroactively the logic of dividuation to the plantation, a logic that draws its inspiration from neoliberal financial capitalism as well as from anthropological accounts (which distinguish the dividual from the Cartesian-Kantian individual). This book argues that reducing individuals to dividual components continues to enable a dehumanizing capitalist mindset to fixate on abstracted labor power rather than seeing laboring individuals.
