usmc tr manuals: *Personnel and Administration Training and Readiness Manual* Department of the Navy, 2012-06-15 This Training and Readiness (T&R) Manual establishes training standards, regulations and policies regarding the training of Marines in the Personnel and Administration occupational field. The T&R Program is the Corps' primary tool for planning, conducting and evaluating training and assessing training readiness. Subject matter experts (SEMs) from the operating forces developed core capability Mission Essential Task Lists (METLs) for ground communities derived from the Marine Corps Task List (MCTL). This T&R Manual is built around these METLs and other related Marine Corps Tasks (MCT). All events contained in the manual relate directly to these METLs and MCTs. This comprehensive T&R Program will help to ensure the Marine Corps continues to improve its combat readiness by training more efficiently and effectively. Ultimately, this will enhance the Marine Corps' ability to accomplish real-world missions.

usmc tr manuals: 21st Century U.S. Military Manuals Department of Defense (DoD), U. S. Military, U. S. Marine Corps (USMC), U. S. Army, 2018-04-04 These three USMC documents cover chaplain training and religious ministry: Religious Ministry Team (RMT) Training and Readiness Manual *Religious Ministry Team Handbook * Religious Ministry Support in the U.S. Marine Corps. The purpose of the Marine Corps Ground Training and Readiness (T&R) program is to provide the commander with training standards for all ground personnel. The goal is to develop Religious Ministry Team (RMT) capabilities for ministry in expeditionary environments. The performance standards are designed to ensure proficiency in core competencies. An effective T&R program is the

first step in providing a commander with a RMT capable of providing religious ministry in support of a unit's wartime mission. The T&R program provides the fundamental tools for commanders to build and maintain RMT combat readiness. Using these tools, training managers can construct and execute an effective training plan that supports both unit and RMT mission essential task lists (METL). Marine Corps Reference Publication (MCRP) 6-12A, Religions Ministry Team Handbook, guides commanders, chaplains, Religious Program Specialists (RPs), and lay leaders in providing religious ministry and effective command religious programs (CRPs). It builds on the operational religious ministry principles in Marine Corps Warfighting Publication (MCWP) 6-12, Religious Ministry Support in the U.S. Marine Corps, and lessons learned from chaplains who ministered in war and peace. MCRP 6-12A clarifies the tasks and functions of the religious ministry team (RMT). It is a ready access to the tools RMTs need to perform their duties in today's expeditionary forces. Religious ministry in the Marine Corps is a combination of technique, common sense, art, experience, and caring about Marines and their families in garrison while being operationally ready at all times in every clime and place. Religious Ministry Support in the U.S. Marine Corps - As Lieutenant General Knutson noted in his foreword, this publication describes the Chaplain Corps' philosophy of providing ministry to the Marine Corps. This ministry is possible because of the partnership formed by the U.S. Marine Corps and the U.S. Navy Chaplain Corps, forged in freedom and tempered in the adversities faced together over two centuries of chaplains serving with Marines. It is my hope that this keystone publication will give commanders and chaplains a clear understanding of the purpose, mission, and principles of religious ministry support and religious accommodation. This, and subsequent publications, will serve as the tools that will enable religious ministry teams to continue to provide the highest quality pastoral care to Marines, Sailors, and their families.

usmc tr manuals: Marines Under Armor Kenneth Estes, 2013-04-11 In this story of men, machines and missions, Kenneth Estes tells how the U.S. Marine Corps came to acquire the armored fighting vehicle and what it tried to do with it. The longtime Marine tank officer and noted military historian offers an insider's view of the Corps's acquisition and use of armored fighting vehicles over the course of several generations, a view that illustrates the characteristics of the Corps as a military institution and of the men who have guided its development. His book examines the planning, acquisition, and employment of tanks, amphibian tractors, and armored cars and explores the ideas that led to the fielding of these weapons systems along with the doctrines and tactics intended for them, and their actual use in combat. Drawing on archival resources previously untouched by researchers and interviews of both past and serving crewmen, Estes presents a unique and unheralded story that is filled with new information and analysis of the armored vehicles, their leaders, and the men who drove these steel chariots into battle. Such authoritative detail and documentation of the decisions to acquire, develop, and organize armored units in the U.S. Marine Corps assures the book's acknowledgement as a definitive reference.
