why study materials: *Cultural Anthropology & Human Experience* Katherine A. Dettwyler, 2011-03-31 Katherine A. Dettwyler, author of the Margaret Mead Awardwinning *Dancing Skeletons*, has written a compelling and original introductory text. *Cultural Anthropology & Human Experience* is suitable for use in Cultural and Social Anthropology courses, and its twelve chapters easily fit into quarter or semester terms, while leaving room for additional readings, discussions, or other projects. All the standard topics are covered, but with less emphasis on method and theory and more coverage of a variety of industrial and postindustrial societies. Auxiliary materials bells and whistles have been kept to a minimum to reduce distractions and maintain a reasonable price to students. The author has chosen all the photographs with great care to illustrate or amplify important points. The Instructors Manual includes summaries of each chapter, student exercises, and a test bank. Dettwyler's upbeat tone inspires students to: develop the ability to think logically, objectively, and critically about different cultural beliefs, practices, and social structures; understand that humans are primates with culture, with a complex overlay of environmental and

cultural influences; appreciate how powerful cultural beliefs and practices can be in shaping human perceptions of the world; realize that culture is not the same thing as social constructions of race, ethnic identity, or place of geographic origin; understand why/how cultural practices make sense within the cultures that practice them; articulate how an anthropological perspective helps discern everyday situations and interactions at the local, national, and international levels; understand that anthropology is not just an academic discipline it is a way of looking at and understanding the world; appreciate the ways cultural beliefs and practices, social structures, and human lifestyles contribute to a meaningful life.
