aleks math test prep course: *Enablers, Barriers, and Challenges for Inclusive Curriculum* Charamba, Erasmov, Ndhlovana, Shalom Nokuthula, 2025-05-29 United Nations' 2030 Agenda for Sustainable Development Goal 4 seeks to ensure inclusive and equitable quality education and to promote lifelong learning opportunities for all learners. Education can only unfold its full potential to transform our world if it is approached from a lifelong learning perspective. In this way, learners' lives are brought closer to education through integrated, multi-sectoral approaches that draw the focus from supply to demand. In order to achieve this, institutions and educators need to come up with strategies that are inclusive regardless of the student's intellectual challenges, physical stature, gender, language, culture, or mode of learning. *Enablers, Barriers, and Challenges for Inclusive Curriculum* examines the impact of enablers and barriers on education for students and teachers. It discusses promoting inclusive curriculum in face-to-face, online, and blended learning environments.

Covering topics such as educational transitions, large classrooms, and school-going young mothers, this book is an excellent resource for educators, student teachers, parents, policymakers, professionals, researcher, scholars, academicians, and more.

aleks math test prep course: Mobile Learning and STEM Helen Crompton, John Traxler, 2015-12-07 In recent years, there has been a renewed focus on STEM education in the United States, fueled by evidence that young learners' competencies in science, technology, engineering, and mathematics are falling behind those of their global peers. Scholars and practitioners are beginning to utilize the new pedagogical opportunities offered by mobile learning to improve the successes of teachers and K-12 students across STEM subjects. *Mobile Learning and STEM: Case Studies in Practice* is a comprehensive collection of case studies that explore mobile learning's support of STEM subjects and that utilize mobile technology to facilitate unique and effective K-12 teaching and learning experiences. In addition to its focus on STEM achievement for researchers, this volume is a resource for teachers working to implement mobile learning initiatives into their classrooms. *Mobile Learning and STEM* also includes research that is applicable to classrooms in nations around the world, where few students from underrepresented racial and socioeconomic backgrounds are entering into STEM jobs. Concluding with a summary of its research and its implications to future scholarship and practice, this book is a springboard for practitioners, specialists, higher education instructors, and researchers who want to establish better practices in schools and raise student achievement in STEM subjects.

aleks math test prep course: EBOOK: Calculus: Early Transcendental Functions Robert T Smith, Roland Minton, 2011-02-16 Students who have used Smith/Minton's Calculus say it was easier to read than any other math book they've used. That testimony underscores the success of the authors' approach, which combines the best elements of reform with the most reliable aspects of mainstream calculus teaching, resulting in a motivating, challenging book. - More concisely written explanations in every chapter.
- Many new exercises (for a total of 7,000 throughout the book) that require additional rigor not found in the 2nd Edition.
- New exploratory exercises in every section that challenge students to synthesize key concepts to solve intriguing projects.
