esl textbooks pdf: *Teaching Materials and the Roles of EFL/ESL Teachers* Ian McGrath, 2013-01-17 Considers what effect the availability of teaching materials has had on teachers' practice.

esl textbooks pdf: Textbook English Elen Le Foll, 2024-07-15 This book provides a systematic, empirical account of the language typically presented in English as a Foreign Language (EFL) textbooks, based on a large corpus of EFL textbooks used in secondary schools. A modified version of the Multi-Dimensional Analysis (MDA) framework serves to examine linguistic variation both within textbooks and compared to corpora representing 'real-life' English as used outside the EFL classroom. The results highlight the characteristics of Textbook English that define it as a distinct variety of English. In light of the study's pedagogical implications, this book proposes a range of corpus-based approaches to improve the naturalness of textbook texts. It also contributes to advancing quantitative corpus linguistics methodology: its detailed online supplements aim for methodological transparency and reproducibility in line with the principles of Open Science. This book will be of interest to linguistics and language education students and researchers, as well as EFL teachers, textbook authors and editors, and those involved in curriculum development and teacher training.

esl textbooks pdf: Towards a New Paradigm for English Language Teaching Hajime Terauchi, Judy Noguchi, Akira Tajino, 2019-10-30 This book proposes a new paradigm for English

language teaching based on concepts from English for Specific Purposes (ESP) research and applications as well as from growing evidence relating pattern recognition to language learning ability. The contributors to the volume argue that learners should not try to become proficient all-around users of 'idealistic native-like' English, but instead should be realistic about what they need to acquire and how to go about achieving their specific goals. The book discusses the present situation by describing the status quo of English language education in Japan, taking into consideration recent trends of CLIL (content and language integrated learning), EMI (English medium instruction), and TBLT (task-based language teaching) as well as the work done on the Common European Framework of Reference for Languages (CEFR). It introduces new movements in ESP in Japan and in other Asian regions, covering topics ranging from genre analysis to corpus linguistics, and presents application examples of ESP practice in a range of educational situations in Japan from the graduate school level to elementary and middle school contexts. It also offers readers application examples of ESP practice in a range of business settings and expands the discussion to the global sphere where EAP and ESP are gaining importance as the number of ELF (English as a Lingua Franca) speakers continue to increase. The book will be of great interest to academics, researchers, and post-graduate students working in the fields of EFL and ESL.

esl textbooks pdf: Textbook Policies in Asia Andy Smart, Shanti Jagannathan, 2018-12-01 This comparative study provides an overview of the textbook production chain, starting with its origins in the curriculum, and suggests ways in which policymakers can make improvements at every point in the chain. esl textbooks pdf: Research for Materials Development in Language Learning Brian Tomlinson, Hitomi Masuhara, 2010-11-18 This title examines current research in materials development and discusses their implications for the learning and teaching of languages. Recently there has been a dramatic increase in the attention given to materials development as an academic discipline. More universities are including modules on materials development on their MA in applied linguistics courses and more students are studying materials development in their PhD research. Yet to date there has been no publication focusing on reporting and discussing the results of research in materials development. This fills that gap, reporting on the results of recent research projects in materials development and discussing their implications for the learning and teaching of languages. The editors' introduction outlines the rationale, scope and objectives of the book and reviews previously published reports of research in materials development. There are concluding chapters which point out implications for second language acquisition theory and research methodology. The book features suggest applications of the reported research for materials development and

proposals for future action in research in materials development for language teaching.

esl textbooks pdf: English-Medium Instruction at Universities Aintzane Doiz, David Lasagabaster, Juan Manuel Sierra, 2012-10-12 This book provides critical insights into the English-medium instruction (EMI) experiences which have been implemented at a number of universities in countries such as China, Finland, Israel, the Netherlands, South Africa, Spain and the USA, which are characterised by differing political, cultural and sociolinguistic situations. In particular, it reflects on the consequences of implementing EMI as an attempt to gain visibility and as a strategy in response to the need to become competitive in both national and international markets. The pitfalls and challenges specific to each setting are analysed, and the pedagogical issues and methodological implications that arise from the implementation of these programmes are also discussed. This volume will serve to advance our awareness about the strategies and tools needed to improve EMI at tertiary level.

esl textbooks pdf: English in Business and Commerce Tamah Sherman, Jiri Nekvapil, 2018-05-07 This volume fills an important gap in exploring English in the domains of business and commerce through the prism of sociolinguistics and the sociology of language, as opposed to analyzing business genres or taking a linguodidactic approach. It expands the regional coverage of English in Europe, with several studies based in Central Europe, and also considers contexts which interact with Europe even though they are physically outside of it (Asia, Africa). It addresses English as just one of several languages at play in the ecology of the countries. It focuses not only on the position of languages as declared in documents of various organizations, that is, language policy, but also everyday linguistic practices as observed in business contexts, that is, interactions. The studies are divided into three thematic areas: ideologies and discourses on English in the business sphere, the management of English in business and organizational contexts, and English and other languages on local and international labor markets. It will be of interest to readers concerned with multilingualism in the economic sphere and the workplace and the interplay between macro and micro levels during the management of communication in organizations.

esl textbooks pdf: English Tertiary Education in Vietnam James Albright, 2018-06-27 As part of a long series of Vietnam's policy objectives, English education has been identified as key to improving the quality of its rapidly expanding tertiary institutions and is crucial to the larger aim of modernising and internationalising its economy. Bringing together a wide range of Vietnamese and foreign English education scholars, and tertiary educational practitioners, this book documents the significant progress and challenges in the realisation of Vietnam's English language policies as they are enacted in the higher education sector. Changes to Vietnam's higher education system remain unstable, unsystematic, and insubstantial. This book provides insights into how recent Vietnamese government policy is providing for a substantial and comprehensive renewal of Vietnam's tertiary education as part of their 2020 plan. Academics and students of English education, language policy, and nation building within the context of increased globalisation and marketisation in developing nations and Vietnam, in particular, should find this book valuable.

esl textbooks pdf: *Pronunciation Instruction in English for Academic Purposes* John Hodgetts, 2020-09-04 This book examines the pronunciation goals of teachers, course leaders, and learners on a ten-week UK pre-sessional access course, particularly with regard to suprasegmental instruction and target of instruction on how these goals are reflected in pronunciation assessment, and how teacher goals are informed by their attitudes and beliefs. A mixed methods approach, including direct observation and semi-structured interviews, is employed to address the area of enquiry.

Results show a lack of clarity of course goals. Although there is a firm emphasis on suprasegmental instruction, in semi-structured interviews, teachers report a lack of clear course goals and guidance. Assessment and practice do not always adhere to a goal of intelligibility, and support for teachers, in terms of the materials and how they might be exploited seems limited. The book concludes with tentative recommendations on how suprasegmental instruction might be facilitated on EAP and other courses
