Greco, 2023-05-17 This book explores the college textbook publishing industry, from its inception in medieval universities, through the late 20th century, to the present day which has led to an existential crisis for some publishers. The various sections in this book offers a comprehensive analysis of the substantive developments, problems, and concerns about a myriad of major issues that confronted the higher education textbook sector after 2000. vital source textbooks: Academic E-Books Suzanne M. Ward, Robert S. Freeman, Judith M. Nixon, 2015-11-15 *Academic E-Books: Publishers, Librarians, and Users* provides readers with a view of the changing and emerging roles of electronic books in higher education. The three main sections contain contributions by experts in the publisher/vendor arena, as well as by librarians who report on both the challenges of offering and managing e-books and on the issues surrounding patron use of e-books. The case study section offers perspectives from seven different sizes and types of libraries whose librarians describe innovative and thought-provoking projects involving e-books. Read about perspectives on e-books from organizations as diverse as a commercial publisher and an association press. Learn about the viewpoint of a jobber. Find out about the e-book challenges facing librarians, such as the quest to control costs in the patron-driven acquisitions (PDA) model, how to solve the dilemma of resource sharing with e-books, and how to manage PDA in the consortial environment. See what patron use of e-books reveals about reading habits and disciplinary differences. Finally, in the case study section, discover how to promote scholarly e-books, how to manage an e-reader checkout program, and how one library replaced most of its print collection with e-books. These and other examples illustrate how innovative librarians use e-books to enhance users' experiences with scholarly works.

vital source textbooks: Shadow Libraries Joe Karaganis, 2018-05-04 How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, *Shadow Libraries* explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post-World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several "open" publication models that have emerged in the higher education sector. From the bottom up, *Shadow Libraries* explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when

formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. Shadow Libraries is a study of that tension in the digital era. vital source textbooks: Debordering and Rebordering Machteld Venken, Steen Bo Frandsen, 2022-04-27 This book addresses practices of bordering, debordering and rebordering on the territory of the former Austro-Hungarian Monarchy after state borders had been remapped on the negotiation tables of the Paris Peace Treaties following the First World War. As life in borderlands did not correspond to the peaceful Europe articulated in the Paris Treaties, a multitude of (un)foreseen complications followed the drawing of borders and states. The chapters in this book include new case studies on the creation, centralization or peripheralization of border regions, such as Subcarpathian Rus, Vojvodina, Banat and the Carpathian Mountains; on border zones such as the Czechoslovakian harbour in Germany; and on cross-border activities. The book shows how disputes over national identities and ethnic minorities, as well as other factors such as the economic consequences of the new state borders, appeared on the interwar political agenda and coloured the lives of borderland inhabitants. The contributions demonstrate the practices of borderland inhabitants in the establishment, functioning, disorganization or ultimate breakdown of some of the newly created interwar nation-states. The chapters in this book were originally published as a special issue of the journal, *European Review of History*.
