textbooks for life: Where Have All the Textbooks Gone? Tony Read, 2015-07-22 This World Bank report is a rich compilation of information on teaching learning materials (TLM) in Africa based on the extensive and multi-faceted experience of the author's work in the education sector in Africa. The study examines a wide range of issues around TLM provision including curriculum, literacy and numeracy, language of instruction policy, procurement and distribution challenges, TLM development and production and their availability, management and usage in schools. It also looks at the role of information and communication technology (ICT) based TLMs and their availability. The study recognizes that improved TLM system management is a critical component in achieving affordable and sustainable TLM provision for all students. This study, which draws from more than

40 Anglophone, Francophone, Lusophone, and Arabic-speaking countries will be particularly useful for policymakers, development partners, and other stakeholders attempting to understand the wide range of issues surrounding the complexity of textbook provision in Sub Saharan Africa.

textbooks for life: *Getting Textbooks to Every Child in Sub-Saharan Africa* Birger Fredriksen, Sukhdeep Brar, 2015-05-22 Textbooks play a key role in enhancing the quality of learning, especially in the context of low-income Sub-Saharan African (SSA) countries characterized by large class-size, poorly motivated and inadequately trained teachers, and short effective school years. There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on. Despite extensive investments by governments, the World Bank and other development partners, the majority of students in primary and secondary schools in SSA still lack the benefit of access to textbooks and the key reason for this shortage is affordability: textbooks are generally much more costly in SSA than in other developing regions. The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high drop-out rate. Only two-thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills. And although quality improvement depends on many factors inside and outside the school, there is wide agreement that availability of textbooks is both an indispensable and a cost-effective way of improving the quality of the learning process. A recent World Bank study examined the actual costs of textbooks, the scope for cost reduction, the portion of a national budget countries allocate to teaching and learning materials (TLMs) and hurdles in the way of making textbooks available to student. Some interesting findings from the study - - The availability of affordable textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget - The production process †“ methods, copyright, length of print runs, effective procurement practices †“ rather than the production costs should be the target of cost saving strategies - The increased integration of ICTs into education in SSA can provide important opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks

Ferrell Research Scientist, Supportive Care Program Nessa Coyle Director, Pain & Palliative Service Department of Neurology Memorial Sloan-Kettering Cancer Center, 2005-11-10 Originally published in 2001, the Textbook of Palliative Nursing has become the standard text for the field of hospice and palliative care nursing. In this new edition, the authors and editors have updated each chapter to ensure that the content is evidence-based and current references are included. They also have retained the important focus on case studies throughout the text and practical, clinically-relevant tables, figures, and other resources. Like the previous edition, this text has an introductory section of the general principles of palliative care followed by a comprehensive section on symptom assessment and management encompassing twenty-one different symptoms. Other key sections include psychosocial support and spiritual care, providing holistic perspective on care of patients facing advanced disease. The text also includes an innovative section on special populations addressing those most in need of palliative care. The textbook is a useful resource for all nurses with the excellent section on end-of-life care across settings. In this new edition, the pediatric palliative care section has been greatly expanded and includes seven separate chapters on pediatric care. It includes a section on special issues addressing topics such as ethical considerations, nursing research, and public policy perspectives and concludes with a section presenting models of excellence including six international models. This edition also offers a narrative on dying based on a spouse's perspective. The text includes an appendix with an extensive list of resources for nurses in the field.

textbooks for life: *Language Policy, Culture, and Identity in Asian Contexts* Amy B.M. Tsui, James W. Tollefson, 2017-09-25 Bringing together scholarship on issues relating to language,

culture, and identity, with a special focus on Asian countries, this volume makes an important contribution in terms of analyzing and demonstrating how language is closely linked with crucial social, political, and economic forces, particularly the tensions between the demands of globalization and local identity. A particular feature is the inclusion of countries that have been under-represented in the research literature, such as Nepal, Bangladesh, Brunei Darussalam, Pakistan, Cambodia, Vietnam, and Korea. The book is organized in three sections: Globalization and its Impact on Language Policies, Culture, and Identity Language Policy and the Social (Re)construction of National Cultural Identity Language Policy and Language Politics: The Role of English. Unique in its attention to how the domination of English is being addressed in relation to cultural values and identity by non-English speaking countries in a range of sociopolitical contexts, this volume will help readers to understand the impact of globalization on non-English speaking countries, particularly developing countries, which differ significantly from contexts in the West in their cultural orientations and the way identities are being constructed. Language Policy, Culture, and Identity in Asian Contexts will interest scholars and research students in the areas of language policy, education, sociolinguistics, applied linguistics, and critical linguistics. It can be adopted in graduate and advanced undergraduate courses on language policy, language in society, and language education.

textbooks for life: Textbooks and School Library Provision in Secondary Education in Sub-Saharan Africa World Bank, 2008-02-15 This study is based on research on secondary textbook and school library provision in Botswana, Cameroon, Cote d'Ivoire, Ghana, Kenya, Malawi, Rwanda, Tanzania, and Togo, as well as existing recent country reports on textbook provision and an extensive desk research. Considerable variations exist in Sub-Saharan African textbook requirements needed to meet secondary curriculum specifications just as significant differences exist between and within countries in regard to the average price of recommended textbooks. Some countries have no approved textbooks list. This World Bank Working Paper aims to discuss the textbook situation in Sub-Saharan Africa with a special focus on secondary textbook availability, cost and financing, distribution and publishing, and the status of school libraries. Its objective is to analyze the issues in secondary textbook and school library provision and to provide some options and strategies for improvement.

textbooks for life: Socio-Cultural Concepts of (Im)Politeness: Interpretation, Linguistics, and Discourse Analysis Ismaili-Alaoui, Abderrahmane, 2025-06-06 Traditional politeness theory is rooted in pragmatics, sociolinguistics, and discourse analyses. How it is invoked, interpreted and enacted across various contexts and cultures has many complexities. (Im)politeness intersects with the social identity, shaping the perception one may have of another's authority. Furthermore, the rules of (im)politeness are also molded around the power dynamics and circumstances of the setting. As a result, studies on (im)politeness have important implications for the use of pragmatic language and the development of interpersonal skills. Socio-Cultural Concepts of (Im)Politeness: Interpretation, Linguistics, and Discourse Analysis bridges the gaps between various theoretical orientations and fostering interdisciplinary dialogue within the fields of linguistics, communication studies, and cultural studies. It explores and critically assesses the concept of (im)politeness from a diverse range of theoretical and methodological perspectives. Covering topics such as rhetorical structure, contextual gaps, and genderlects, this book is an excellent resource for linguists, sociologists, anthropologists, communication specialists, professionals, researchers, scholars, academicians, and more.

textbooks for life: A Life Teaching Languages Linda Watkins-Goffman, 2015-09-22 Everyone faces crossroads. While not everyone meets at the same crossroads, we all juggle multiple identities. It is these roles--sometimes conflicting and other times fitting together seamlessly--that Linda Watkins-Goffman explores in *A Life Teaching Languages: A Memoir from Mississippi to the Bronx*. In this memoir of an educator, Watkins-Goffman offers insights she has gained from her years of traveling, teaching, and writing and shares how her experiences have shaped her teaching philosophy. According to Watkins-Goffman, teachers must communicate authentically to teach

effectively and, to accomplish this, they must connect their own experiences in some way with those of their students. The stories she tells are sure to resonate with pre-service and practicing teachers alike. Her reflections about her own experiences will be useful to readers who plan to become ESL educators, or those who simply seek inspiration about teaching.

textbooks for life: Many Visions, Many Aims W.H. Schmidt, S. Raizen, E.D. Britton, Leonard J. Bianchi, Richard G. Wolfe, 2008-04-06 PREFACE The Third International Mathematics and Science Study (TIMSS), sponsored by the International Association for the Evaluation of Educational Achievement (IEA) and the governments of the participating countries, is a comparative study of education in mathematics and the sciences conducted in approximately 50 educational systems on six continents. The goal of TIMSS is to measure student achievement in mathematics and science in participating countries and to assess some of the curricular and classroom factors that are related to student learning in these subjects. The study is intended to provide educators and policy makers with an unparalleled and multidimensional perspective on mathematics and science curricula; their implementation; the nature of student performance in mathematics and science; and the social, economic, and educational context in which these occur. TIMSS focuses on student learning and achievement in mathematics and science at three different age levels, or populations. • Population 1 is defined as all students enrolled in the two adjacent grades that contain the largest proportion of 9-year-old students; • Population 2 is defined as all students enrolled in the two adjacent grades that contain the largest proportion of 13-year-old students; and • Population 3 is defined as all students in their final year of secondary education, including students in vocational education programs. In addition, Population 3 has two “specialist” subpopulations: students taking advanced courses in mathematics (mathematics specialists), and students taking advanced courses in physics (physics specialists).

textbooks for life: Applied Moral Education in Korea Brendan M. Howe, John Gyun Yeol Park, 2025-08-28 Education is a human right, but it also serves a practical function of improving the performance of domestic and international governance. Those who govern have an obligation to provide conditions of peace and security, to reconcile conflicts of interest, and to generate collective good, all while abiding by the rule of law. Those who are governed likewise have obligations, firstly towards their fellow citizens, but also to conceptualizations of the wider body politic, to the collective good, and towards those who govern in the interests of society through resolving collective action problems. Education is key to training those who would govern, but also to training citizens to recognize when the instruments of government (both actors and institutions) fail to adhere to the principles of good governance. Furthermore, education provides the foundation for concepts of good citizenship among civil society. The chapters in this edited collection reflect upon the myriad ways in which supporting education and capacity-building training programs can not only bring benefit to the recipients, but also to the wider communities to which they belong. These include building resilience through empowering civil society, promoting democratic governance through civic education, building peace within and between societies, using education and training as tools of development, the public diplomacy role of educational scholarships, and the internationalization of learning environments. The transformative nature of principled education can have a remarkable impact when applied to policy platforms within the state and beyond its borders. This is a rare insight into the purpose and value of education in the Republic of Korea, and will be a useful addition to any collection supporting studies in education and Asian Studies. It is supported by the Korean Association for Public Value.

textbooks for life: Life Is in the Transitions Bruce Feiler, 2021-08-10 A New York Times bestseller! A pioneering and timely study of how to navigate life's biggest transitions with meaning, purpose, and skill Bruce Feiler, author of the New York Times bestsellers *The Secrets of Happy Families* and *Council of Dads*, has long explored the stories that give our lives meaning. Galvanized by a personal crisis, he spent the last few years crisscrossing the country, collecting hundreds of life stories in all fifty states from Americans who'd been through major life changes—from losing jobs to losing loved ones; from changing careers to changing relationships; from getting sober to getting healthy to simply looking for a fresh start. He then spent a year coding these stories, identifying patterns and takeaways that can help all of us survive and thrive in times of change. What Feiler discovered was a world in which transitions are becoming more plentiful and mastering the skills to manage them is more urgent for all of us. The idea that we'll have one job, one relationship, one source of happiness is hopelessly outdated. We all feel unnerved by this upheaval. We're concerned that our lives are not what we expected, that we've veered off course, living life out of order. But we're not alone. *Life Is in the Transitions* introduces the fresh, illuminating vision of the nonlinear life, in which each of us faces dozens of disruptors. One in ten of those becomes what Feiler calls a lifequake, a massive change that leads to a life transition. The average length of these transitions is five years. The upshot: We all spend half our lives in this unsettled state. You or someone you know is going through one now. The most exciting thing Feiler identified is a powerful new tool kit for navigating these pivotal times. Drawing on his extraordinary trove of insights, he lays out specific strategies each of us can use to reimagine and rebuild our lives, often stronger than before. From a master storyteller with an essential message, *Life Is in the Transitions* can move readers of any age to think deeply about times of change and how to transform them into periods of creativity and

growth.
