glencoe textbooks: The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and (dis)ability. Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism, militarism, consumerism, White supremacy, heterosexism, rugged individualism, technology, and a positivistic conception of the world. Finally, the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other, to reflect upon the constitutive forces causing oppression in schools and in the wider society, and to reflect upon how to challenge corporate and political dominance over knowledge production.

glencoe textbooks: Comparative Perspectives on School Textbooks Dobrochna Hildebrandt-Wypych, Alexander W. Wiseman, 2021-04-22 This book examines the discourses on nation-building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date, practical, and scholarly information on qualitative and mixed-method textbook analysis, as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks.

glencoe textbooks: Motives for Metaphor in Scientific and Technical Communication Timothy Giles, Charles Sides, 2017-03-02 Examination of the work of scientific icons-Newton, Descartes, and others-reveals the metaphors and analogies that directed their research and explain their discoveries. Today, scientists tend to balk at the idea of their writing as rhetorical, much less metaphorical. How did this schism over metaphor occur in the scientific community? To establish that scientists should use metaphors to explain science to the public and need to be conscious of how metaphor can be useful to their research, this book examines the controversy over cloning and

the lack of a metaphor to explain it to a public fearful of science's power. The disjunction between metaphor and science is traced to the dispensation of the Solar System Analogy in favor of a mathematical model. Arguing that mathematics is metaphorical, the author supports the idea of all language as metaphorical—unlike many rhetoricians and philosophers of science who have proclaimed all language as metaphorical but have allowed a distinction between a metaphorical use of language and a literal use. For technical communication pedagogy, the implications of this study suggest foregrounding metaphor in textbooks and in the classroom. Though many technical communication textbooks recommend metaphor as a rhetorical strategy, some advise avoiding it, and those that recommend it usually do so in a paragraph or two, with little direction for students on how to recognize metaphors or to how use them. This book provides the impetus for a change in the pedagogical approach to metaphor as a rhetorical tool with epistemological significance.

glencoe textbooks: Going Ape Brandon Haught, 2014-04-22 Before William Jennings Bryan successfully prosecuted John Scopes in the infamous “Scopes Monkey Trial,” he was a prominent antievolution agitator in Florida. In *Going Ape*, Brandon Haught tells the riveting story of how the war over teaching evolution began and unfolded in Florida, one of the nation’s bellwether states. It still simmers just below the surface, waiting for the right moment to engulf the state. The saga opens with the first shouts of religious persecution and child endangerment in 1923 Tallahassee and continues today with forced delays and extra public hearings in state-level textbook adoptions. These ceaseless battles feature some of the most colorful culture warriors imaginable: a real estate tycoon throwing his fortune into campaigns in Miami; lawmakers attempting to insert the mandatory teaching of creationism into bills; and pastors and school board members squabbling in front of the national media that descends into their small town. The majority of participants, however, have been, and still are, average people, and Haught expertly portrays these passionate citizens and the sense of moral duty that drives each of them. Given a social climate where the teaching of evolution continues to sharply divide neighbors and communities, *Going Ape* is a must-read for anyone concerned with the future of public education.
