The text has not been updated. Although the text is in the public domain in the United States, the original publisher still has a valid trademark in the original title of the encyclopedia. The original publisher offered Project Gutenberg a license to use the trademark, but the terms of the license were not consistent with the volunteer noncommercial nature of Project Gutenberg or its primary goal of distributing electronic text with the fewest possible restrictions. -from Gutenberg

project gutenberg textbooks: The 2011 Guide to Free Or Nearly-Free E-Books, 2011 One of the problems which face all librarians adding e-books to their collections is that of bibliographic control: there is no legal deposit for e-books and consequently there is no single place from which new titles can be found. If this is true of commercially published e-books, it is most certainly also true of free e-books... and there are many thousands of free e-books available over the Internet, many of which are of a quality such that librarians might wish to have them in their collections. The 2011 Guide to Free or Nearly-Free e-Books is offered as a tool for librarians and others involved in book selection (e.g. teachers in schools) in all sectors - school, further and higher education, public and special libraries - to facilitate easy access to free e-books and e-book collections which can enhance their digital library.

project gutenber textbooks: A Practical Guide to Searching LGBTQIA Historical Records Norena Shopland, 2021-04-21 This book provides a number of effective tools to aid in the recovery of LGBTQIA historic material by providing extensive glossary and non-glossary written descriptions, and how to use those terms and phrases in searching effectively online and offline. Researching hidden and forbidden people from the past can be extremely difficult. Terminology used to write about LGBT+ people shifts over time, legal terminology enforces certain set terms which some writers use but others reject to avoid informing or disgusting a reading public. Often written descriptions contain no set terminology at all. How then can LGBT+ people be found in historic records? This book provides practical tools for a researcher wanting to uncover material from online or hard copy sources, including: keyword/s covering various sexual orientations and gender diversity, along with how and when to use them; tips for effective searching in online newspaper archives; how to use genealogy, auction and social media sites to uncover information; searching in online and physical libraries; advice on researching in physical archives and the types of collections which can yield results; and researching in museums collecting and displaying LGBT+ content. Making use of a straightforward and jargon free style, this is a short and accessible guide to doing historical research on Gay, Lesbian, Trans, Queer and non-normative research subjects. This is a useful resource for students and scholars alike in Archive Studies History, Gender and Sexuality

project gutenbergs textbooks: Libraries Partnering with Self-Publishing Robert J. Grover Professor Emeritus, Kelly Visnak, Carmaine Ternes, Miranda Ericsson, Lissa Staley, 2016-10-17 Help your library leverage opportunities in the popular do-it-yourself publishing movement by following this guide's process for creating and producing books. In this useful guidebook, you'll learn how to transform your library into a self-publishing center with pointers, advice, and strategies for creating, producing, and printing books—both digitally and on paper. The book outlines your partnering role with patrons in the creation of published materials, offering step-by-step guidance for assisting library users who wish to put their written words in print. By using the detailed plan in this reference, you'll be able to help patrons identify an audience for their material, select the best publishing software for their needs, and utilize social media to promote and distribute their work. Chapters follow the publishing process from planning to creative development, production, and marketing. The final chapter features books, websites, and Internet sources for designing brochures; creating a website; and designing, printing, and distributing a book. Helpful guidelines accompany excerpts from interviews with librarians experienced with this publishing model, examples of self-published books, and graphic models.

project gutenbergs textbooks: Library Technology and Digital Resources Marie Keen Shaw, 2015-11-12 In the last decade library collections have rapidly evolved from a predominance of print books and journals to an ever growing mix of digital and print resources. Library patrons are predominately served by support staff that is expected to know how to help patrons select and use digital resources. Yet most library support staff (LSS) has not had training to become proficient in finding, using, and instructing others in the abundance of the digital resources of websites, databases, e-texts, digital libraries and their related technologies. Library Technology and Digital Resources: An Introduction for Support Staff is both a text for professors who teach in library support staff programs and an introductory reference manual for support staff who work in libraries. This book will guide the LSS to be able to: Distinguish key features and enhancements found among vendors and providers of digital libraries, digital collections, databases, and e-texts; Plan, budget, fund and write grants for digital resources; Understand the complexity and options of licensing and usage agreements for digital resources; Know copyright permissions and acceptable use guidelines for digital resources. Understand the basic technologies that support library digital resources including network structures, software applications, and protocols; Distinguish between directories and search engines as they relate to digital resources as well as be able to employ advance search skills effectively; Explore the resources of global, national, and state digital libraries and their collections; Use government databases and other digitized systems and information sources; Find exemplary digital resources though other agencies such as museums, university collections and other sources that librarians can share with patrons. Create local digital resources of primary and historical materials and artifacts with metadata and cataloging for searchable access. Interpret meaning from library digital resources using visual literacy skills. Promote library digital resources through a variety of means including social media and online options.

project gutenbergs textbooks: Gutenberg's Fingerprint Marilyn Simonds, 2017-04-11 An intimate narrative exploring the past, present, and future of books Four seismic shifts have rocked human communication: the invention of writing, the alphabet, mechanical type and the printing press, and digitization. Poised over this fourth transition, e-reader in one hand, perfect-bound book in the other, Marilyn Simonds — author, literary maven, and early adopter — asks herself: what is lost and what is gained as paper turns to pixel? Gutenberg's Fingerprint trolls the past, present, and evolving future of the book in search of an answer. Part memoir and part philosophical and historical exploration, the book finds its muse in Hugh Barclay, who produces gorgeous books on a hand-operated antique letterpress. As Simonds works alongside this born-again Gutenberg, and with her son to develop a digital edition of the same book, her assumptions about reading, writing, the nature of creativity, and the value of imperfection are toppled. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 16.0px Times; -webkit-text-stroke: #000000} span.s1 {font-kerning: none} Gutenberg's

project gutenber textbooks: *Libraries Supporting Online Learning* Christina D. Mune, 2020-10-07 Using practical examples from librarians in the field, this book lays out current issues in online learning and teaches librarians how to adapt a variety of library services—including instruction, reference, and collection development—to online education. Recent studies highlighting the challenges faced by online learners show that skills librarians are uniquely qualified to teach, such as information and digital literacy and source evaluation, can improve academic performance in online courses and enhance the online learning experience. Just as embedded librarianship was developed to answer the needs of online courses when they emerged in the early 2000s, online learning librarian Christina Mune now teaches online librarianship as a set of realistic strategies for serving a variety of online education models. Each chapter of *Libraries Supporting Online Learning* addresses a different strategy for supporting online students and/or faculty, with all strategies derived from real-world practices. Librarians will find information on best practices for creating digital literacy tutorials and dynamic content, providing patrons with open access and open educational resources, helping patrons to avoid copyright issues, promoting peer-to-peer learning and resource sharing, posting to social media, and developing scalable reference services. The tools and practical examples in this book will be useful for all educators interested in increasing the efficacy of online learning.

project gutenber textbooks: *Handbook of Research on the Global View of Open Access and Scholarly Communications* Alemneh, Daniel Gelaw, 2022-04-29 In an information and knowledge society, access to information and knowledge is a basic human right, making equitable and fair access to information and knowledge paramount. Open Access (OA) plays a huge role in addressing inequities as well as broad-based and inclusive scientific progress. On the surface, the number of publications discussing OA issues from various angles are on the rise. However, what is missing is a comprehensive assessment of the extent of OA implementation and a discussion of how to proceed in integrating OA issues from various perspectives. The *Handbook of Research on the Global View of Open Access and Scholarly Communications* articulates OA concepts and issues while demystifying the state-of-the-art knowledge domain in the areas of OA and scholarly communications from diverse perspectives as well as implications for the information and knowledge society. Covering topics such as ethics, copyright challenges, and open access initiatives, this book is a dynamic resource for publishers, librarians, higher education administrators, policymakers, students and educators of higher education, researchers, and academicians.

project gutenber textbooks: *Content-Based Curriculum for High-Ability Learners* Joyce VanTassel-Baska, Catherine A. Little, 2021-09-03 *Content-Based Curriculum for High-Ability Learners* (3rd ed.) provides a solid introduction to core elements of curriculum development in gifted education and implications for school-based implementation. Written by experts in the field, this text uses cutting-edge design techniques and aligns core content with national and state standards. In addition to revised chapters, the third edition contains new chapters on topics including special populations of gifted learners, critical thinking, leadership, and university-level honors curriculum. The text identifies fundamental principles of curriculum that support advanced and high-potential learners: accelerated learning within the core content areas, use of higher order processes and products, and concept development. These emphases form threads across chapters in

core content areas, including language arts, mathematics, science, social studies, world languages, and the arts. Additional chapters explore structures to support implementation, including alignment with standards, assessment of learning, counseling, and promoting exemplary teacher practice through professional development.

project gutenberg textbooks: *The No Shelf Required Guide to E-book Purchasing* Sue Polanka, 2011-12 Library Technology Reports vol. 47 no.8 According to recent studies, e-book penetration in libraries of all types is rising rapidly. Creating or expanding an e-book collection is a complicated challenge. In addition to facing the same challenges a librarian would face in developing a print collection, librarians developing an e-book collection also face a host of unprecedented legal, technological, and vendor challenges. This issue of Library Technology Reports will examine these challenges, focusing on strategies for purchasing e-books in a consortium, working with vendors, implementing e-reader programs in an academic environment, and purchasing electronic textbooks. Although the challenges are significant, this issue will show how they can be overcome and how the effort it takes to develop an e-book collection is well worth the effort.

project gutenber textbooks: Academic Library Use of eBooks Primary Research Group, 2014 This 165-page international study looks closely at how academic libraries are using eBooks. It helps librarians to answer questions such as: how fast is eBook spending growing? Which eBook purchasing models are growing fastest? Subscription models that allow unlimited access? pay per view models? Outright ownership? Other models? What percentage of eBook purchases are through consortia? What percentage direct from publishers? What percentage through aggregators? The report also gives detailed data on spending on various major players such as OverDrive, ebrary, EBSCO, Baker & Taylor, EBL and many others. It's particularly rich on data about eBook purchases from academic presses. The study also looks at the growth of tablet computing in academic libraries, at the use of eBooks in course reserve, at purchases of eDirectories and eTextbooks, and other issues in academic library eBook purchasing and deployment.

project gutenber text books: E-books in Libraries Kate Price, Virginia Havergal, 2011

Despite the fact that e-books have been in existence for decades in various guises and added to library collections for several years now, there has been a noticeable lack of published manuals on the subject. This is doubtless owing to the rapidly evolving nature of the market. There is now a plethora of different types of digital object that may be termed 'e-books' and a bewildering number of business and access models to match. Moreover the pace of change shows no sign of abating, but there is an increasing amount of popular interest in e-books, and what is needed is practical information to assist library and information professionals managing collections of e-books and doing their best to inform their users right now. The book is divided into five parts: The production and distribution of e-books Planning and developing an e-book collection Delivering e-books to library readers Engaging readers with e-books The future of e-books. Virginia Havergal BA(Hons) MSc MEd FIFL is a Learning Centres and e-Resources Manager for Petroc, a further education college in Devon. Prior to this role she was an e-Learning Advisor with JISC, with a particular focus on Learning Resources. Kate Price BA(Hons) MA MCLIP is Head of E-Strategy and Resources at the University of Surrey.
