back-to-school season when demand for textbooks surges.

Online Marketplaces

Online marketplaces such as Amazon, Chegg, or other academic-focused websites can be great alternatives for purchasing, renting, or finding used textbooks at competitive prices. However, students should ensure they are purchasing the correct edition as required by their courses.

uic bookstore textbooks: *Organization, Representation and Description through the Digital Age* Christine M. Angel, Caroline Fuchs, 2018-03-05 Cataloging standards practiced within the traditional library, archive and museum environments are not interoperable for the retrieval of objects within the shared online environment. Within today's information environments, library, archive and museum professionals are becoming aware that all information objects can be linked together. In this way, information professionals have the opportunity to collaborate and share data together with the shared online cataloging environment, the end result being improved retrieval effectiveness. But the adaptation has been slow: Libraries, archives and museums are still operating within their own community-specific cataloging practices. This book provides a historical perspective of the evolution of linking devices within the library, archive, and museums environments, and captures current cataloging practices in these fields. It offers suggestions for moving beyond community-specific cataloging principles and thus has the potential of becoming a springboard for further conversation and the sharing of ideas.

uic bookstore textbooks: *The Textbook and the Lecture* Norm Friesen, 2017-12-15 Why do the basic technologies of education—the book and the lecture—endure in our digital age? Why are the fundamentals of education apparently so little changed in our era of digital technology? Is their obstinate persistence evidence of resilience or obsolescence? Such questions can best be answered not by imagining an uncertain high-tech future, but by examining a well-documented past—a history of instruction and media that extends from Gilgamesh to Google. Norm Friesen looks to the combination and reconfiguration of oral, textual, and more recent media forms to understand the longevity of so many educational arrangements and practices. Friesen examines the interrelationship of reading, writing, and pedagogy in the case of the lecture and the textbook—from their premodern to their postmodern incarnations. Over hundreds of years, these two forms have integrated textual, oral, and (more recently) digital media and connected them with changing pedagogical and cultural priorities. The Textbook and the Lecture opens new possibilities for understanding not only mediated pedagogical practices and their reform but also gradual changes in our conceptions of the knowing subject and of knowledge itself. Drawing on wide-ranging scholarship in fields as diverse as media ecology and German-language media studies, Foucauldian historiography, and even archaeological research, The Textbook and the Lecture is a fascinating investigation of educational media.

While this resource is specifically targeted toward librarians who plan and provide services using mobile technologies, academic, public, and other librarians will also find the ideas and information within useful.

uic bookstore textbooks: African Democracy and Development Cassandra Rachel Veney, Dick Simpson, 2012-09-28 Various African nations have undergone conflict situations since they gained their independence. This book focuses on particular countries that have faced conflict (civil wars and genocide) and are now in the process of rebuilding their political, economic, social, and educational institutions. The countries that are addressed in the book include: Rwanda, Mozambique, Sierra Leone, Liberia, and the Democratic Republic of the Congo. In addition, there is a chapter that addresses the role of the African Diaspora in conflict and post-conflict countries that include Eritrea, Liberia, and Somalia. The book includes an examination of the various actors who are involved in post-conflict rebuilding and reconstruction that involves internal and external participants. For example, it is clear that the internal actors involve Africans themselves as ordinary citizens, members of local and national governments, and members of non-governmental organizations. This allows the reader to understand the agency and empowerment of Africans in post-conflict reconstruction. Various institutions are addressed within the context of the roles they play in establishing governance organizations such as the Truth and Reconciliation Commission in Sierra Leone, the African Union, chiefs in Liberia, and non-governmental organizations. Furthermore, the external actors who are involved in post-conflict reconstruction are examined such as international non-governmental organizations and the African Diaspora. They both have their own constituents and agendas and can and do play a positive and negative role in post-conflict reconstruction. It is obvious that countries that are addressed in the book are in dire need of financial assistance to rebuild much needed infrastructure that was destroyed during the conflict. All of the countries covered in the book need schools, medical facilities, roads, bridges, airports, ports, and the government does not have the money to provide these. This is where the international non-governmental organizations and the African Diaspora play an important role. The chapters that address these issues are cognizant of their importance and at the same time, the authors realize that

sovereignty can be undermined if Africans are not in the forefront of policy and decision making that will determine their future. There are chapters that provide a gendered analysis of post-conflict when it is appropriate. For example, it is clear that women, men, boys, and girls experienced conflict in different ways because of their gender. They all participated in the conflict in various ways. Consequently, the efforts at peace building are given a gendered analysis in terms of what has happened to women and girls in the demobilization and rehabilitation period including an excellent analysis of land reform in Rwanda and how that affects women and members of a certain ethnic group that are often overlooked in the examination of the 1994 genocide. This book provides a very good contribution to the literature on conflict and post-conflict African countries because of its depth and the vast topics it embraces. It provides an analysis of the internal and external actors, the role of gender in post-conflict decision making, and it provides the voices of ordinary Africans who were affected by the conflict, and who are determined to live productive lives.

uic bookstore textbooks: *Happy Joyous and Free* Juris S., 2021-06-18 Happy, Joyous, and Free is the intensely personal, deeply intimate story of Juris S's journey from spiritual death to abundant life. Dr. S takes the reader into his mind and heart to demonstrate how the belief systems that were constructed early in his childhood drove his actions and behaviors as an adult. Being strongly scientifically minded with minimal spiritual direction, he began as a militant atheist who chased the delusion of the "American dream." Once that was obtained, he found himself disenchanted with life despite having everything he believed he ever wanted to be happy, fulfilled, and satisfied. This led him through several addictions that ultimately landed him in rehab for alcoholism—a medical disease with a spiritual solution. The spiritual, psychological, and mental changes that occurred are examined and processes explained. The later chapters of the book present practical ideas and techniques that can be readily applied to enable and empower the reader to live a life that is happy, joyous, and free. Throughout the book, there are immutable practical and spiritual truths. These truths are easy to remember and can be considered modern-day proverbs that transform the mind and renew the heart. His story is the most powerful manifestation of the power of God in his life. The miracle of his journey from spiritual death to abundant life is revealed, no less amazing than empowering a paralyzed man to walk.
