review of teaching textbooks: Understanding Multimodal Discourses in English Language Teaching Textbooks Christopher A. Smith, 2022-08-11 Textbooks are indispensable components and in some case the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective; one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions and reifications. The triangulated approach, demonstrated in a series of vignettes featuring Korean university students and native-English-speaking instructors, can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.

review of teaching textbooks: *We Demand* Roderick A. Ferguson, 2017-04-25 “Puts campus activism in a radical historic context.”—New York Review of Books In the post-World War II period, students rebelled against the university establishment. In student-led movements, women, minorities, immigrants, and indigenous people demanded that universities adapt to better serve the increasingly heterogeneous public and student bodies. The success of these movements had a profound impact on the intellectual landscape of the twentieth century: out of these efforts were born ethnic studies, women’s studies, and American studies. In *We Demand*, Roderick A. Ferguson demonstrates that less than fifty years since this pivotal shift in the academy, the university is moving away from “the people” in all their diversity. Today the university is refortifying its commitment to the defense of the status quo off campus and the regulation of students, faculty, and staff on campus. The progressive forms of knowledge that the student-led movements demanded and helped to produce are being attacked on every front. Not only is this a reactionary move against the social advances since the ’60s and ’70s—it is part of the larger threat of anti-intellectualism in the United States.

review of teaching textbooks: *Ideology and Hegemony of English Foreign Language Textbooks* Ömer Gökhan Ulum, Dinçay Köksal, 2020-01-27 This volume investigates ideological and hegemonic practices in globally and locally written English as a Foreign Language (EFL) textbooks, and explores whether these textbooks reflect the values, beliefs and norms of the native-speaker society by examining their ideological components and the hegemonic practices by means of which the source society or state seeks to influence learners of the language. It also attempts to clarify EFL teachers' and students' views on the underlying ideology and hegemonic practices in globally and locally written EFL textbooks. Studies on the relationship between ideology, hegemony and textbooks in applied linguistics have become more prevalent in recent decades, as the emergence of critical theory, critical pedagogy, and critical thinking skills from the 1920s onwards has led scholars to adopt a more critical perspective towards EFL textbooks, especially with regard to elements of ideology and hegemony. These two terms encompass a plethora of components, ranging from nationalism to religion. At the same time, the importance of metanarratives originating from the tenets of modernism has declined from the 1960s onwards, the assumption being that the world has entered a new age called postmodernism and post-structuralism that emphasizes the role of individuals and rejects efforts to reinforce post-colonialism, the effects of which can be seen in EFL textbooks. Accordingly, taking the elements of ideology and hegemony into account remains a vital aspect in the analysis of EFL textbooks.
