cod textbooks: *Cod* Mark Kurlansky, 2011-03-04 Wars have been fought over it, revolutions have been spurred by it, national diets have been based on it, economies have depended on it, and the settlement of North America was driven by it. Cod, it turns out, is the reason Europeans set sail across the Atlantic, and it is the only reason they could. What did the Vikings eat in icy Greenland and on the five expeditions to America recorded in the Icelandic sagas? Cod -- frozen and dried in the frosty air, then broken into pieces and eaten like hardtack. What was the staple of the medieval diet? Cod again, sold salted by the Basques, an enigmatic people with a mysterious, unlimited supply of cod. Cod is a charming tour of history with all its economic forces laid bare and a fish story embellished with great gastronomic detail. It is also a tragic tale of environmental failure, of depleted fishing stocks where once the cod's numbers were legendary. In this deceptively whimsical biography of a fish, Mark Kurlansky brings a thousand years of human civilization into captivating focus.

cod textbooks: *Synopsis of Javanese Literature 900-1900 A.D.* Theodore G.Th. Pigeaud, 2012-12-06 The present Literature of Java, Catalogue Raisonné of Javanese Manuscripts is a publication of the Library of the University of Leiden. It is no. IX of the series *Codices Manuscripti* published by this Library, and it is made available to the public by the Royal Institute of Linguistics and Anthropology. Originally the work was only meant to be a sequel to Dr H.H. Juynboll's *Supplement des Catalogues van de Javaansche en Madoereesche Handschriften der Leidsche Universiteits-Bibliotheek* in two volumes. The second volume appeared in 1911. It soon became clear, however, that this was the opportunity to publish an English Catalogue which could be used as an introduction to the study of Javanese literature more easily than the previous Dutch catalogues. It is a matter of fact that Dr Juynboll and his predecessors wrote their catalogues with the intention of providing information on Javanese literature in general, and for several decades their books did render excellent services to students of Javanese civilization. The differences in structure between the older catalogues and the present book will be explained in the introduction to the second volume. In two volumes the contents of the previous catalogues, increased by an equal quantity of new material, has been rearranged according to a new system. The third volume, containing illustrations, facsimiles of manuscripts, maps and a general index of names and subjects, is entirely new.

cod textbooks: *Paper Stories - Paper and Book History in Early Modern Europe* Silvia Hufnagel, Þórunn Sigurðardóttir, Davíð Ólafsson, 2023-04-27 This peer-reviewed conference volume examines paper and material aspects of the written word in early modern Europe. The collection is designed around three thematic strands, based on the lifecycle of handwritten documents and manuscripts and printed books: first, production of paper, second production of books and manuscripts and third, trade and exchange, and ownership of manuscripts and books. By tracing the history of paper, books and collections through case studies of historically important objects, the authors identify agents and hotspots of production, trade and ownership from both centres and peripheries of Europe from the late Middle Ages until the beginning of industrialisation. They thereby address material aspects of documents, manuscripts and books, as well as object biography, from an interdisciplinary viewpoint. By doing so this volume provides insight into actual practices of the past and the material history of written texts.
