clark textbooks: Kenneth Clark James Stourton, 2016-11-01 The definitive biography of this brilliant polymath--director of the National Gallery, author, patron of the arts, social lion, and singular pioneer of television--that also tells the story of the arts in the twentieth century through his astonishing life. Kenneth Clark's thirteen-part 1969 television series, *Civilisation*, established him as a globally admired figure. Clark was prescient in making this series: the upheavals of the century, the Cold War among others, convinced him of the power of barbarism and the fragility of culture. He would burnish his image with two memoirs that artfully omitted the more complicated details of his life. Now, drawing on a vast, previously unseen archive, James Stourton reveals the formidable intellect and the private man behind the figure who effortlessly dominated the art world for more than half a century: his privileged upbringing, his interest in art history beginning at Oxford, his remarkable early successes. At 27 he was keeper of Western Art at the Ashmolean in Oxford and at 29, the youngest director of The National Gallery. During the war he arranged for its entire collection to be hidden in slate mines in Wales and organized packed concerts of classical music at the Gallery to keep up the spirits of Londoners during the bombing. WWII helped shape his belief that art should be brought to the widest audience, a social and moral position that would inform the rest of his career. Television became a means for this message when he was appointed the first chairman of the Independent Television Authority. Stourton reveals the tortuous state of his marriage during and after the war, his wife's alcoholism, and the aspects of his own nature that he worked to keep hidden. A superb work of biography, Kenneth Clark is a revelation of its remarkable subject.

clark textbooks: Centres of Medical Excellence? Andrew Cunningham, 2016-12-05 Students notoriously vote with their feet, seeking out the best and most innovative teachers of their subject. The most ambitious students have been travelling long distances for their education since universities were first founded in the 13th century, making their own educational pilgrimage or peregrinatio. This volume deals with the peregrinatio medica from the viewpoint of the travelling

students: who went where; how did they travel; what did they find when they arrived; what did they take back with them from their studies. Even a single individual could transform medical studies or practice back home on the periphery by trying to reform teaching and practice the way they had seen it at the best universities. Other contributions look at the universities themselves and how they were actively developed to attract students, and at some of the most successful teachers, such as Boerhaave at Leiden or the Monros at Edinburgh. The essays show how increasing levels of wealth allowed more and more students to make their pilgrimages, travelling for weeks at a time to sit at the feet of a particular master. In medicine this meant that, over the period c.1500 to 1789, a succession of universities became the medical school of choice for ambitious students: Padua and Bologna in the 1500s, Paris, Leiden and Montpellier in the 1600s, and Leiden, Göttingen and Edinburgh in the 1700s. The arrival of foreign students brought wealth to the university towns and this significant economic benefit meant that the governors of these universities tried to ensure the defence of freedom of religion and freedom of speech, thus providing the best conditions for the promotion of new views and innovation in medicine. The collection presents a new take on the history of medical education, as well as universities, travel and education more widely in ancien régime Europe.

clark textbooks: Toronto Trailblazers Ruth Panofsky, 2019-09-12 The first-ever study of women in Canadian publishing, *Toronto Trailblazers* delves into the cultural influence of seven key women who, despite pervasive gender bias, helped advance a modern literary culture for Canada. Publisher Irene Clarke, scholarly editors Eleanor Harman and Frances Halpenny, trade editors Sybil Hutchinson, Claire Pratt, and Anna Porter, and literary agent Bella Pomer made the most of their vocational prospects, first by securing their respective positions and then by refining their professional methods. Individually, each woman asserted her agency by adapting orthodox ways of working within Canadian publishing. Collectively, and perhaps more importantly, their overarching approach emerged more broadly as a feminist practice. Guided by the resolve to make industry-wide improvements, these women disrupted the dominant masculine paradigm and reinvigorated the culture of publishing and authorship in Canada. Through their vision and method these trailblazing women became agents of change who helped transform publishing practice.

clark textbooks: **Grahame Clark** Brian Fagan, 2018-07-03 The British archaeologist Grahame Clark was a seminal figure in European and world archaeology for more than half of the twentieth century, but, at the same time, one whose reputation has been outshone by other, more visible luminaries. His works were never aimed at a wide general public, nor did he become a television or radio personality. Clark was, above all, a scholar, whose contributions to world archaeology were enormous. He was also convinced that the study of prehistory was important for all humanity and spent his career saying so. For this, he was awarded the prestigious Erasmus Prize in 1990, an award only rarely given to archaeologists. This intellectual biography describes Clark's remarkable career and assesses his seminal contributions to archaeology. Clark became interested in archaeology while at school, studied the subject at Cambridge University, and completed a groundbreaking doctorate on the Mesolithic cultures of Britain in 1931. He followed this study with a magisterial survey, *The Mesolithic Settlement of Northern Europe* (1936), which established him as an international authority on the period. At the same time, he became interested in the interplay between changing ancient environment and ancient human societies. In a series of excavations and important papers, he developed environmental archaeology and the notion of ecological systems as a foundation of scientific, multidisciplinary archaeology, culminating in his world-famous excavations at Starr Carr, England, in 1949 and his *Prehistoric Europe: The Economic Basis* (1952). Clark became Disney Professor of Public Archaeology at Cambridge in 1952 and influenced an entire generation of undergraduates to become archaeologists in all parts of the world. He was also the author of the first book on a global human prehistory, *World Prehistory* (1961).

clark textbooks: *Handbook of Research in Social Studies Education* Linda S. Levstik, Cynthia A. Tyson, 2010-04-15 This Handbook outlines the current state of research in social studies education – a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum. Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental goal. In considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory, research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS standards, and topics reflecting an emerging or reemerging field within the social studies. The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field.
