ela textbooks: The New Politics of the Textbook Heather Hickman, Brad J. Porfilio, 2012-10-29 In an era when corporate and political leaders are using their power to control every aspect of the schooling process in North America, there has been surprisingly little research on the impact of textbook content on students. The contributors of this volume and its partner (*The New Politics of the Textbook: Problematizing the Portrayal of Marginalized Groups in Textbooks*) guide educators, school administrators, academics, and other concerned citizens to unpack the political, social, and cultural influences inherent in the textbooks of core content areas such as math, science, English, and social science. They urge readers to reconsider the role textbooks play in the creation of students' political, social, and moral development and in perpetuating asymmetrical social and economic relationships, where social actors are bestowed unearned privileges and entitlements

based upon their race, gender, sexuality, class, religion and linguistic background. Finally, they suggest ways to resist the hegemony of those texts through critical analyses, critical questioning, and critical pedagogies.

ela textbooks: *Ideology and Hegemony of English Foreign Language Textbooks* Ömer Gökhan Ulum, Dinçay Köksal, 2020-01-27 This volume investigates ideological and hegemonic practices in globally and locally written English as a Foreign Language (EFL) textbooks, and explores whether these textbooks reflect the values, beliefs and norms of the native-speaker society by examining their ideological components and the hegemonic practices by means of which the source society or state seeks to influence learners of the language. It also attempts to clarify EFL teachers' and students' views on the underlying ideology and hegemonic practices in globally and locally written EFL textbooks. Studies on the relationship between ideology, hegemony and textbooks in applied linguistics have become more prevalent in recent decades, as the emergence of critical theory, critical pedagogy, and critical thinking skills from the 1920s onwards has led scholars to adopt a more critical perspective towards EFL textbooks, especially with regard to elements of ideology and hegemony. These two terms encompass a plethora of components, ranging from nationalism to religion. At the same time, the importance of metanarratives originating from the tenets of modernism has declined from the 1960s onwards, the assumption being that the world has entered a new age called postmodernism and post-structuralism that emphasizes the role of individuals and rejects efforts to reinforce post-colonialism, the effects of which can be seen in EFL textbooks. Accordingly, taking the elements of ideology and hegemony into account remains a vital aspect in the analysis of EFL textbooks.

Hiebert, 2016-09-08 Recent educational reform initiatives such as the Common Core State Standards (CCSS) largely fail to address the needs--or tap into the unique resources--of students who are developing literacy skills in both English and a home language. Leading experts describe effective, standards-aligned instructional approaches and programs expressly developed to promote bilingual learners' academic vocabulary, comprehension, speaking, writing, and content learning. Innovative policy recommendations and professional development approaches are also presented.

This scholarly book is based on in-depth interviews with people, now aged, who were school students at the time of the Occupation and who experienced first-hand this immense cultural change. The book considers the nature of the changing outlook, including democratization, the new role for the Japanese Emperor and all this represented for the place of tradition in Japanese life and the growing emphasis on individualism away from collectivism. It discusses the changing system of education itself, including new structures and new textbooks, and relates the feelings of the participants as they came to terms with defeat and the language and culture of the former enemy. In his book, the author documents the historical development of education and the roles of English in Taiwan before reviewing curriculum reforms and changes in the past half century. He then presents teachers' and students' perceptions on global Englishes. He proposes global Englishes' pedagogies and his views on what changes can be made to textbooks, learning materials, entrance exams, translation, and the linguistic environment.
