elementary school social studies textbooks: *Social Studies in Elementary Education* Walter C. Parker, 2015-03-20 The author wrote this new edition of the most popular elementary social studies methods text on the market with the following three goals in mind: to present the most powerful social studies content and pedagogy for children in elementary school, to offer the material in simple and accessible ways, and to write in a first person active voice. The purpose of this book is to introduce new teachers to the world of social studies teaching and learning in elementary and middle schools. Geography, history, government and the other social sciences are delivered into the palm of the new teacher's hand along with a suite of tools for bringing social studies to life in the classroom. The book is organized into three sections—the first orients the reader to the mission of social studies education to the increasingly diverse children we teach, the second concentrates on the curriculum, and the third deals with instruction, how we plan and teach this curriculum. Three central themes continue to pervade the book—democratic citizenship, diversity, and the social sciences—to ultimately encourage teachers to excite their students about closing the gap between social realities and democratic ideals. An exceptionally strong chapter on multicultural issues (Chapter 2) helps future teachers truly understand the changing demographics of the American classroom.

elementary school social studies textbooks: History and Imagination

Ronald V. Morris, 2012-03-08 In *History and Imagination*, elementary school social studies teachers will learn how to help their students break down the walls of their schools, more personally engage with history, and define democratic citizenship. By collaborating together in meaningful investigations into the past and reenacting history, students will become experts who interpret their findings, teach their peers,

and relate their experiences to those of older students, neighbors, parents, and grandparents. The byproduct of this collaborative, intergenerational learning is that schools become community learning centers, just like museums and libraries, where families can go together in order to find out more about the topics that interest them. There is an incredible value in the shared and lived experiences of reenacting the past, of meeting people from different places and times: an authority and reality that textbooks cannot rival. By engaging elementary social studies students in living history, whether in the classroom, after school, or in partnership with local historical institutions, teachers are guaranteed to impress upon the students a special, desired understanding of place and time.
