egyptology textbooks: A World Beneath the Sands Toby Wilkinson, 2020 What could be more exciting, more exotic or more intrepid than digging in the sands of Egypt in the hope of discovering golden treasures from the age of the pharaohs? Our fascination with ancient Egypt goes back to the ancient Greeks. But the heyday of Egyptology was undoubtedly the nineteenth and early twentieth centuries. This golden age of scholarship and adventure is neatly book-ended by two epoch-making events: Champollion's decipherment of hieroglyphics in 1822 and the discovery of Tutankhamun's tomb by Howard Carter and Lord Carnarvon a hundred years later. In *A World Beneath the Sands*, the acclaimed Egyptologist Toby Wilkinson tells the riveting stories of the men and women whose obsession with Egypt's ancient civilisation drove them to uncover its secrets. Champollion, Carter and Carnarvon are here, but so too are their lesser-known contemporaries, such as the Prussian scholar Karl Richard Lepsius, the Frenchman Auguste Mariette and the British aristocrat Lucie Duff-Gordon. Their work - and those of others like them - helped to enrich and transform our understanding of the Nile Valley and its people, and left a lasting impression on Egypt, too. Travellers and treasure-hunters, ethnographers and epigraphers, antiquarians and archaeologists: whatever their motives, whatever their methods, all understood that in pursuing Egyptology they were part of a greater endeavour - to reveal a lost world, buried for centuries beneath the sands.

This biographical dictionary tells the stories of the most important contributors and will be an indispensable reference tool for scholars and enthusiasts alike. *Who Was Who in Egyptology* remains one of the most important reference works for understanding the characters that contributed to the field of Egyptology and Egyptian archaeology from the Napoleonic invasion of Egypt through to the present day. The fifth edition brings entries up to 2019 and is expected to be the last volume produced in print.

The book draws on texts found on some thirty artifacts ranging from coffins to stelae to obelisks found in museums in Egypt, America, and Europe, and selected across two thousand years. The texts are then explained clearly, and are supported by full translations, photographs, and line drawings.

egyptology textbooks: Death and Salvation in Ancient Egypt Jan Assmann, 2011-11-14 Human beings, the acclaimed Egyptologist Jan Assmann writes, are the animals that have to live with the knowledge of their death, and culture is the world they create so they can live with that knowledge. In his new book, Assmann explores images of death and of death rites in ancient Egypt to provide startling new insights into the particular character of the civilization as a whole. Drawing on the unfamiliar genre of the death liturgy, he arrives at a remarkably comprehensive view of the religion of death in ancient Egypt. Assmann describes in detail nine different images of death: death as the body being torn apart, as social isolation, the notion of the court of the dead, the dead body, the mummy, the soul and ancestral spirit of the dead, death as separation and transition, as homecoming, and as secret. *Death and Salvation in Ancient Egypt* also includes a fascinating discussion of rites that reflect beliefs about death through language and ritual.
