french textbooks for middle school: Schools and National Identities in French-speaking Africa Linda Gardelle, Camille Jacob, 2020-11-25 Schools and National Identities in French-speaking Africa showcases cutting-edge research to provide a renewed understanding of the role of schools in producing and reproducing national identities. Using individual case studies and comparative frameworks, it presents diverse empirical and theoretical insights from and about a range of African countries. The volume demonstrates in particular the usefulness of the curriculum as a lens through which to analyse the production and negotiation of national identities in different settings. Chapters discuss the tensions between decolonisation as a moment in time and decolonisation as a lengthy and messy process, the interplay between the local, national and international priorities of different actors, and the nuanced role of historiography and language in nation-building. At its heart is the need to critically investigate the concept of the nation as a political project, how discourses and feelings of belonging are constructed at school, and what it means for schools to be simultaneously places of learning, tools of socialisation and political battlegrounds. By presenting new research on textbooks, practitioners and policy in ten different African countries, this volume provides insights into the diversity of issues and dynamics surrounding the question of schools and national identities. It will be of particular interest to scholars, researchers and postgraduate students of comparative and international education, sociology, history, sociolinguistics and African studies.

french textbooks for middle school: Algerian Languages in Education Salim Bouherar, Abderrezzaq Ghafsi, 2022-01-03 This book examines the role of foreign languages and cultures in the Algerian educational system, highlighting how cultural imperialism and supremacy persist through damaging language ideologies and the privileging of colonial languages such as French and English. The authors challenge the claim that the Algerian educational system can be considered 'neutral', arguing instead that it was and still is the outcome of a conflict between Arabised and Francophone elites, serving strategic and ideological objectives rather than cultural or pedagogical goals. This book will be relevant to students and scholars of language education, language policy and planning, and the history and politics of the Arab and Muslim world, especially those interested in the influence of Western languages and cultures and the democratisation of educational systems.

french textbooks for middle school: The Algerian War in French-Language Comics Jennifer Howell, 2015-10-08 The decolonization of Algeria represents a turning point in world history, marking the end of France's colonial empire, the birth of the Algerian republic, and the appearance of the Third World and pan-Arabism. Algeria emerged from colonial domination to negotiate the release of American hostages in Iran during the Carter administration. Radical Islam would later rise from the ashes of Algeria's failed democracy, leading to a civil war and the training of Algerian terrorists in Afghanistan. Moreover, the decolonization of Algeria offered an imperfect model of decolonization to other nations like South Africa that succeeded in abolishing apartheid while retaining its white settler population. Algeria and its war of national liberation therefore constitute an inescapable reference for those looking to understand today's "war on terror" and ever-expanding islamophobia in Western media circuits. Consequently, it is imperative that students and educators understand the global implications of the Algerian War and how to best approach this conflict in school and at home so as to learn from the consequences of misrepresentation at all levels of the memory transmission chain. These objectives are all the more important today given the West's misunderstanding and mischaracterization of Islam, the Arab Spring, the Muslim-majority world, and, most importantly, the continuing influence of French colonialism—especially in the postcolonial era. Conceived as a case study, The Algerian War in French-Language Comics:

Postcolonial Memory, History, and Subjectivity argues that comics provide an alternative to textbook representations of the Algerian War in France because they draw from many of the same source materials yet produce narratives that are significantly different. This book demonstrates that although comics rely on conventional vectors of memory transmission like national education, the family, and mainstream media, they can also create new and productive dialogues using these same vectors in ways unavailable to traditional textbooks. From this perspective, these comics are an effective and alternative way to develop a more inclusive social consciousness.

french textbooks for middle school: The Autobiography of Osugi Sakae Sakae Osugi, 2023-04-28 In the Japanese labor movement of the early twentieth century, no one captured the public imagination as vividly as Osugi Sakae (1885-1923): rebel, anarchist, and martyr. Flamboyant in life, dramatic in death, Osugi came to be seen as a romantic hero fighting the oppressiveness of family and society. Osugi helped to create this public persona when he published his autobiography (*Jijoden*) in 1921-22. Now available in English for the first time, this work offers a rare glimpse into a Japanese boy's life at the time of the Sino-Japanese (1894-95) and the Russo-Japanese (1904-5) wars. It reveals the innocent—and not-so-innocent—escapades of children in a provincial garrison town and the brutalizing effects of discipline in military preparatory schools. Subsequent chapters follow Osugi to Tokyo, where he discovers the excitement of radical thought and politics. Byron Marshall rounds out this picture of the early Osugi with a translation of his *Prison Memoirs* (*Gokuchuki*), originally published in 1919. This essay, one of the world's great pieces of prison writing, describes in precise detail the daily lives of Japanese prisoners, especially those incarcerated for political crimes. This title is part of UC Press's *Voices Revived* program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. Williams, 2021-03-01 This book brings together leading scholars of Caribbean education from around the world. Schooling continues to hold a special place both as a means to achieve social mobility and as a mechanism for supporting the economy of Caribbean nations. In this book, the Caribbean includes the Greater and Lesser Antilles. The Greater Antilles is made up of the five larger islands (and six countries) of the northern Caribbean, including the Cayman Islands, Cuba, Hispaniola (Haiti and the Dominican Republic), Puerto Rico, and Jamaica. The Lesser Antilles includes the Windward and Leeward Islands which are inclusive of Barbados, St. Vincent, Trinidad and Tobago along with several other islands. Each chapter provides a unique perspective on the various social and cultural issues that define Caribbean education and schooling. The Handbook on Caribbean Education fills a void in the literature and documents the important research being done throughout the Caribbean. Creating a space where Caribbean voices are a part of "international" discussions about 21st century global matters and concerns is an important contribution of this work.
