Part II examines the major classes of mental disorder that may be associated with criminal behavior, including psychotic disorders, mood disorders, organic brain syndromes, substance abuse, and personality disorders. Each chapter consists of a description of the syndrome, followed by applications to law enforcement, criminal justice, and forensic mental health issues of competency, sanity, and criminal culpability. Part III deals with death. Topics include homicide, serial murder, mass homicide, workplace and school violence, and terrorism. Part IV covers sexual offenses and crimes within the family, including rape and sexual assault, sex crimes against children, child battery, domestic violence, and family homicide. Part V discusses the psychological dynamics of a variety of common crimes, such as stalking and harassment, theft and robbery, gang violence, organized crime, arson, hate crimes, victimology, the psychology of corrections, and the death penalty. Each chapter contains explanatory tables and sidebars that illustrate the chapter's main topic with examples from real-life cases and the media, and explore controversies surrounding particular issues in criminal psychology, such as criminal profiling, sexual predator laws, dealing with children who kill, psychotherapy with incarcerated offenders, and the use of "designer defenses" in court.
