italian textbooks for high school: Teaching a Dark Chapter Daniela R. P. Weiner, 2024-07-15 Teaching a Dark Chapter explores how textbook narratives about the Fascist/Nazi past in Italy, East Germany, and West Germany followed relatively calm, undisturbed paths of little change until isolated flashpoints catalyzed the educational infrastructure into periods of rapid transformation. Though these flashpoints varied among Italy and the Germanys, they all roughly conformed to a chronological scheme and permanently changed how each dark past was represented. Historians have often neglected textbooks as sources in their engagement with the reconstruction of postfascist states and the development of postwar memory culture. But as Teaching a Dark Chapter demonstrates, textbooks yield new insights and suggest a new chronology of the changes in postwar memory culture that other sources overlook. Employing a methodological and temporal rethinking of the narratives surrounding the development of European Holocaust memory, Daniela R. P. Weiner reveals how, long before 1968, textbooks in these three countries served as important tools to influence public memory about Nazi/Fascist atrocities. As Fascism had been spread through education, then education must play a key role in undoing the damage. Thus, to repair and shape postwar societies, textbooks became an avenue to inculcate youths with desirable democratic and socialist values. Teaching a Dark Chapter weds the historical study of public memory with the educational study of textbooks to ask how and why the textbooks were created, what they said, and how they affected the society around them.

italian textbooks for high school: Female Cultural Production in Modern Italy Sharon Hecker, Catherine Ramsey-Portolano, 2023-04-13 This book is the first critical interdisciplinary examination in English of Italian women's contributions to intellectual, artistic, and cultural production in modern Italy. Examining commonalities and diversities from the country's Unification to today, the volume provides insight into the challenges that Italian women engaged in cultural production have faced, and the strategies they have deployed in order to achieve their objectives. The essays address a range of issues, from women's self-identification and public ownership of their professional roles as laborers in the intellectual and cultural realm, to questions about motherhood and financial remuneration, to the role of creative foreign women in Italy. Through critical analysis and direct testimony from new and typically marginalized voices, including an Arab-Italian writer, an Italian-Dominican filmmaker, and a transgender activist, new forms of ongoing struggle emerge that redefine the culturally diverse landscape of female intellectual and creative production in Italy today. The volume rethinks a solely national "Made in Italy" reading of the subject of female intellectual labor, demonstrating instead the wide network of influences and relationships that have existed for Italian women in their professional aspirations.

italian textbooks for high school: History Education at the Edge of the Nation Piero S. Colla, Andrea Di Michele, 2023-06-27 This edited volume explores the evolution of history education from a transnational perspective, focusing on border regions in Europe that are considered on the

periphery of the Nation-State. By introducing this concept and taking into consideration the dynamics of decentralization and the development of minorities' teaching practices and narratives, the book sheds light on new challenges for history education policy and curriculum design. Chapters take a comparative approach, dissecting and analyzing specific case studies from school systems in France, Germany, Italy, the UK, and Scandinavian countries. In doing so, the editors and their authors weave a systematic account of the impact of local autonomy on educational culture, on the civic remit of schools, and on the narratives embodied by history school canons.

italian textbooks for high school: *The Colonial Past in History Textbooks* Karel Van Nieuwenhuyse, Joaquim Pires Valentim, 2018-05-01 This book examines the evolving representations of the colonial past from the mid-19th century up to decolonization in the 1960s and 70s ? the so-called era of Modern Imperialism – in post-war history textbooks from across the world. The aim of the book is to examine the evolving outlook of colonial representations in history education and the underpinning explanations for the specific outlook in different – former colonizer and colonized – countries (to be found in collective memory, popular historical culture, social representations, identity-building processes, and the state of historical knowledge within academia). The approach of the book is novel and innovative in different ways. First of all, given the complexity of the research, an original interdisciplinary approach has been implemented, which brings together historians, history educators and social psychologists to examine representations of colonialism in history education in different countries around the world while drawing on different theoretical frameworks. Secondly, given the interest in the interplay between collective memory, popular historical culture, social representations, and the state of historical knowledge within academia, a diachronic approach is implemented, examining the evolving representations of the colonial past, and connecting them to developments within society at large and academia. This will allow for a deeper understanding of the processes under examination. Thirdly, studies from various corners of the world are included in the book. More specifically, the project includes research from three categories of countries: former colonizer countries – including England, Spain, Italy, France, Portugal and Belgium –, countries having been both colonized and colonizer – Chile – and former colonized countries, including Zimbabwe, Malta and Mozambique. This selection allows pairing up the countries under review as former colonizing-colonized ones (for instance Portugal-Mozambique, United Kingdom-Malta), allowing for an in-depth comparison between the countries involved. Before reaching the research core, three introductory chapters outline three general issues. The book starts with addressing the different approaches and epistemological underpinnings history and social psychology as academic disciplines hold. In a second chapter, evolutions within international academic colonial historiography are analyzed, with a special focus on the recent development of New Imperial History. A third chapter analyses history textbooks as cultural tools and political means of transmitting historical knowledge and representations across generations. The next ten chapters form the core of the book, in which evolving representations of colonial history (from mid-19th century until decolonization in the 1960s and 1970s) are examined, explained and reflected upon, for the above mentioned countries. This is done through a history textbook analysis in a diachronic perspective. For some countries the analysis dates back to textbooks published after the Second World War; for other countries the focus will be more limited in time. The research presented is done by historians and history educators, as well as by social psychologists. In a concluding chapter, an overall overview is presented, in which similarities and differences throughout the case studies are identified, interpreted and reflected upon.

The book aims to become the central interdisciplinary reference for textbook researchers, students, and educational practitioners.

italian textbooks for high school: *Exhibiting Italian Art in the United States from Futurism to Arte Povera* Raffaele Bedarida, 2022-06-28 This volume explores how Italian institutions, dealers, critics, and artists constructed a modern national identity for Italy by exporting – literally and figuratively – contemporary art to the United States in key moments between 1929 and 1969. From artist Fortunato Depero opening his Futurist House in New York City to critic Germano Celant launching Arte Povera in the United States, Raffaele Bedarida examines the thick web of individuals and cultural environments beyond the two more canonical movements that shaped this project. By interrogating standard narratives of Italian Fascist propaganda on the one hand and American Cold War imperialism on the other, this book establishes a more nuanced transnational approach. The central thesis is that, beyond the immediate aims of political propaganda and conquering a new market for Italian art, these art exhibitions, publications, and the critical discourse aimed at American audiences all reflected back on their makers: they forced and helped Italians define their own modernity in relation to the world's new dominant cultural and economic power. The book will be of interest to scholars working in art history, social history, exhibition history, and Italian studies.

italian textbooks for high school: Conflicts in History Education in Europe Ander Delgado, Andrew Mycock, 2023-07-01 The heightened resonance of identity-driven politics in many states across twenty first century Europe emphasizes the critical role of history in shaping public contestation of the idea of the nation, and accordant manifestations of nationalism and national identity. How the past is interpreted or what and how is remembered has proven increasingly febrile, contentious, and divisive. Debates about history have gone beyond academia, and have permeated and polarised politics and society in many European countries. Intense debate and dispute about national history and culture has often focused on the history teaching in schools, colleges, and universities. According to the aforementioned, it is evident that the teaching of history in the classroom is a relevant topic within the educational system. For this reason, it is not surprising that many times the choice of what kind of history to teach becomes a controversial topic. The existence in a given society of different visions about the nation or the various responses proposed to face the social challenges existing in it (immigration, independence nationalisms...) can turn the teaching of history into a debated and controversial topic. Logically, depending on the specific political context of each country, this debate can acquire different developments and characteristics. The school is not an institution isolated from its socio-political context. In fact, both areas constantly interact. Therefore, this book proposes an approach to this topic that tries to connect the specific political context of different countries with the debates about education and history teaching from 1990 until the present. It deals with the extent to which the social and political context affects the history teaching practice developed in the classrooms through the decisions made on the official curricula and textbooks. Emphasizing this connection between both aspects is one of the strengths of this book. That is the reason why this book proposes an approach to that reality from diverse points of view and show the different materializations observed in this area in the studied cases. The chapters of this volume allow us to verify this heterogeneous reality and help enrich our knowledge on this broad and interesting topic.

italian textbooks for high school: *A Primer of Italian Fascism* Jeffrey Thompson Schnapp, Olivia E. Sears, Maria G. Stampino, 2000-01-01 A Primer of Italian Fascism makes available for the first time in English translation the key documents pertaining to one of our century's defining mass political movements. Whereas existing anthologies survey Fascist writings in a multiplicity of national settings, A Primer of Italian Fascism opts for a tightly focused, in-depth approach that emphasizes the development of Fascist ideology in the country of its birth. Historically speaking, Italian Fascism was the original Fascism. The model for subsequent movements including Nazism, Falangism, and Integralism, Italian Fascism set out to define a "third way" to modernization known as "corporatism." A Primer of Italian Fascism situates the rise and fall of corporatist ideals within the framework of the actual history of Mussolini's movement and regime. It includes not only classic doctrinal statements such as Mussolini's "Foundations and Doctrine of Fascism" and writings by corporatist theorists such as Bottai, Pellizzi, Rocco, and Spirito, but also an array of fundamental political and juridical documents, including the party platforms adopted by the Fascist combat brigades, the 1938 Manifesto of Race, the 1940 Manifesto of Verona, and the Fascist labor and school charters. By making available such an extensive array of source texts, A Primer of Italian Fascism aims to open up for the English reader a more complex and complete vision of Fascism, both in Italy and beyond.

italian textbooks for high school: *Task-Based English Language Teaching in the Digital Age* Valentina Morgana, 2023-06-15 This book illustrates the developments of task-based language teaching (TBLT) approaches in relation to the evolution of digital technologies. It highlights how technology-mediated TBLT principles can support English as a Foreign Language (EFL) learning and contribute to understanding new classroom dynamics. Drawing from the key theoretical concepts of TBLT, the author discusses the integration of tasks and technologies from a secondary education perspective, which is often under-represented in the TBLT literature. Morgana looks at how the EFL secondary classroom has been recently re-conceptualised as a social place whose boundaries go far behind the traditional school settings. This book provides theoretical approaches and classroom implementation practices by presenting four case studies on the different L2 skills (reading, writing, listening and speaking). The volume is organised into two main sections. The first section focuses on the theoretical approaches to TBLT and highlights the key concepts behind this methodology. This section also looks at the recent development of a technology-mediated TBLT framework and its implementations in various EFL educational contexts. The second section presents four case studies of secondary-school EFL learners in Italy. Each case study focuses on a different language skill, providing examples of classroom practices in both blended and online learning settings. Pedagogical recommendations for teachers are provided at the end of each case study. The book adopts a multimodal approach and aims at providing scholars in applied linguistics and TBLT practitioners with theories and implementation practices to understand the ways technologies are shaping tasks and mediating students' learning processes.

italian textbooks for high school: *History Lessons* Dana Lindaman, Kyle Ward, 2006-07-04 A "fascinating" look at what students in Russia, France, Iran, and other nations are taught about America (The New York Times Book Review). This "timely and important" book (History News Network) gives us a glimpse into classrooms across the globe, where opinions about the United States are first formed. History Lessons includes selections from textbooks and teaching materials used in Russia, France, Iran, Saudi Arabia, Cuba, Canada, and others, covering such events as the American Revolution, the Cuban Missile Crisis, the Iran hostage crisis, and the Korean War—providing some alternative viewpoints on the history of the United States from the time of the

Viking explorers to the post-Cold War era. By juxtaposing starkly contrasting versions of the historical events we take for granted, History Lessons affords us a sometimes hilarious, often sobering look at what the world thinks about America's past. "A brilliant idea." —Foreign Affairs
