pre law textbooks: Starting Off Right in Law School Carolyn Nygren, 2022 Law school is different from other graduate schools. Students will be confronted by an entirely new vocabulary and unique and demanding educational methods. This book is designed to give these students a head start, both by introducing them to the fundamentals of the legal process and by helping them acquire the study skills necessary for success. The first chapters introduce students to the stages of a lawsuit from the lawyer's initial contact with a client through the filing an appeal. The next chapters include cases that illustrate the different roles the trial court, jury, appellate court, and court of last resort play in a lawsuit, knowledge helpful in doctrinal courses, but crucial in legal writing assignments. The final chapters suggest how students can effectively read and analyze cases, outline, and apply what they have learned on exams and in legal writing assignments. The third edition includes an expanded chapter on note-taking and outlining and how legal writing and doctrinal course demand different approaches to each. More study questions are included with answers to be found in the appendix. This book is the perfect tool for pre-law students to read on their own or for law school orientation required reading.

pre law textbooks: Bridging the Gap Between College and Law School Ruta K. Stropus, Charlotte D. Taylor, 2014 This popular book helps students make the transition from their undergraduate experience to law school learning. Unlike other introduction to law school texts, *Bridging the Gap* offers a different approach because it: Explains the why of law, providing students with the context necessary to understand why law school is taught in a certain manner. Explains the how of the law, setting out a step-by-step process that will help students adapt to the law school setting. Explains the what of the law, giving students the opportunity to practice the problem-solving process by providing numerous exercises in a variety of subject matter areas. Rather than giving only general advice, or black letter law and some practice problems for a specific subject, *Bridging the Gap* provides the context, the process, and the problems. Written by two former law school professors who used these techniques with thousands of students, *Bridging the Gap* is a guide to what really works in law school.

after with the woman I love, I have to confront my painful past head-on and fight like hell to forge my own path. Can I break free from the shadows that haunt me and build a new life with Fern by my side? One thing's for sure - I've never wanted anything more.

pre law textbooks: Juridical Humanity Samera Esmeir, 2012-06-20 In colonial Egypt, the state introduced legal reforms that claimed to liberate Egyptians from the inhumanity of pre-colonial rule and elevate them to the status of human beings. These legal reforms intersected with a new historical consciousness that distinguished freedom from force and the human from the pre-human, endowing modern law with the power to accomplish but never truly secure this transition. Samera Esmeir offers a historical and theoretical account of the colonizing operations of modern law in Egypt. Investigating the law, both on the books and in practice, she underscores the centrality of the human to Egyptian legal and colonial history and argues that the production of juridical humanity was a constitutive force of colonial rule and subjugation. This original contribution queries long-held assumptions about the entanglement of law, humanity, violence, and nature, and thereby develops a new reading of the history of colonialism.

pre law textbooks: Characters and Characterization in the Book of Kings Keith Bodner, Benjamin J.M. Johnson, 2019-12-12 This book is an examination of characters in the books of Kings; showing how understanding and interpretation of key characters affects readings of the story. The volume begins with more general pieces addressing how the study of characters can shed light on the composition history of Kings and on how characters and characterization can be considered with respect to ethics, particularly with respect to the moral complexity of biblical characters. Contributors then consider key characters within the Kings narrative in depth, such as Nathan, Bathsheba, Solomon and Jezebel. The contributors use their own specific expertise to analyze these characters and more, drawing on insights from literary theory and considering such approaches as questioning our view of a particular character with based on the character within the text with whom we identify. Contributors also assess whether or not characters as portrayed in the biblical text necessarily match up to their possible counterparts in history.
