islamic textbooks: Islamic Religious Education in Europe Leni Franken, Bill Gent, 2021-04-01 Against the backdrop of labour migration and the ongoing refugee crisis, the ways in which Islam is taught and engaged with in educational settings has become a major topic of contention in Europe. Recognising the need for academic engagement around the challenges and benefits of effective Islamic Religious Education (IRE), this volume offers a comparative study of curricula, teaching materials, and teacher education in fourteen European countries, and in doing so, explores local, national, and international complexities of contemporary IRE. Considering the ways in which Islam is taught and represented in state schools, public Islamic schools, and non-confessional classes, Part One of this volume includes chapters which survey the varying degrees to which fourteen European States have adopted IRE into curricula, and considers the impacts of varied teaching models on Muslim populations. Moving beyond individual countries' approaches to IRE, chapters in Part Two offer multi-disciplinary perspectives – from the hermeneutical-critical to the postcolonial – to address challenges posed by religious teachings on issues such as feminism, human rights, and citizenship, and the ways these are approached in European settings. Given its multi-faceted approach, this book will be an indispensable resource for postgraduate students, scholars, stakeholders and policymakers working at the intersections of religion, education and policy on religious education.

islamic textbooks: The Evolution of the Turkish School Textbooks from Atatürk to Erdogan Hay Eytan Cohen Yanarocak, 2022-09-26 This book narrates and analyzes a century of the Turkish education system and textbook indoctrination starting from the foundation of the Republic until today. It divides the history of Turkish education into five periods: Single party government (1923–1950), Menderes' Democrat Party government (1950–1960), the 1960 coup generals and their successors' governments (1960–1980), the Turkish-Islam Synthesis oriented Atatürkist governments (1980–2002) and finally the Justice and Development Party (AKP) government (2002–). By using the content analysis method, this book exposes Kemalism's metamorphosis into Turkish-Islam Synthesis influenced Atatürkism. For the first time, Cohen Yanarocak analyzes the indoctrination of this post-1980 official ideology through history, religious studies, civics, and national security knowledge textbooks. It goes beyond the Atatürkist period and examines the gradual but drastic Islamization of the whole curriculum and school textbooks at the expense of Atatürkism under the AKP. In this framework, this book highlights the recent penetration of controversial concepts such as Neo-Ottomanism, Jihad, and Pan-Turkism into the current Turkish school textbooks. Certainly, the ramifications of the current textbooks will influence the lives of millions of people. Therefore, this book functions as a crucial manual to understanding the current political environment in Turkey.

islamic textbooks: *The Oxford Handbook of American Islam* Yvonne Y. Haddad, Jane I. Smith, 2014-11-03 Islam has been part of the increasingly complex American religious scene for well over a century, and was brought into more dramatic focus by the attacks of September 11, 2001. American Islam is practiced by a unique blend of immigrants and American-born Muslims. The immigrants have come from all corners of the world; they include rich and poor, well-educated and illiterate, those from upper and lower classes as well as economic and political refugees. The community's diversity has been enhanced by the conversion of African Americans, Latina/os, and others, making it the most heterogeneous Muslim community in the world. With an up-to-the-minute analysis by thirty of the top scholars in the field, this handbook covers the growth of Islam in America from the earliest Muslims to set foot on American soil to the current wave of Islamophobia. Topics covered include the development of African American Islam; pre- and post-WWII immigrants; Sunni, Shi'ite, sectarian and Sufi movements in America; the role and status of women, marriage, and family; and the Americanization of Islamic culture. Throughout these chapters the contributors explore the meaning of religious identity in the context of race, ethnicity, gender, and politics, both within the American Islamic community and in relation to international Islam.

islamic textbooks: *Children in the Muslim Middle East* Elizabeth Warnock Fernea, 2014-05-02 Today nearly half of all people in the Middle East are under the age of fifteen. Yet little is known about the new generation of boys and girls who are growing up in a world vastly different from that of their parents, a generation who will be the leaders of tomorrow. This groundbreaking anthology is an attempt to look at the current situation of children by presenting materials by both Middle Eastern and Western scholars. Many of the works have been translated from Arabic, Persian, and French. The forty-one pieces are organized into sections on the history of childhood, growing up, health, work, education, politics and war, and play and the arts. They are presented in many forms: essays in history and social science, poems, proverbs, lullabies, games, and short stories. Countries represented are Egypt, Jordan, Morocco, Tunisia, Israel/West Bank, Kuwait, Saudi Arabia, Iran, Iraq, Syria, Sudan, Lebanon, Turkey, Yemen, and Afghanistan. This book complements Elizabeth Fernea's earlier works, *Women and the Family in the Middle East* and *Middle Eastern Muslim Women Speak* (coedited with Basima Bezirgan). Like them, it will be important reading for everyone interested in the Middle East and in women's and children's issues.

islamic textbooks: *Hui Muslims in the Shaping of Modern China* Bin CHEN, 2025-11-04 Chen

examines the Chinese Nationalist government's distinctive support for private Muslim teachers schools between the 1920s and 1940s, and explores the complex relationship between these institutions and the Chinese state during the Republican period. In 1933, the government issued the Teachers Schools Regulations, mandating that all teachers schools be state-run. However, the Nationalists viewed private Muslim teachers schools as valuable allies in their efforts to assert influence in China's Muslim-dominated northwestern frontier region and deliberately refrained from enforcing the 1933 Teachers Schools Regulations on them. Instead, the government applied the 1933 Amended Private Schools Regulations, which did not specifically address teachers schools, to govern Muslim teachers schools. By charting the evolving dynamics between the Nationalist state and Chinese Hui Muslims, this book reevaluates the Hui Muslims' role in shaping modern China. Offering crucial context on the role of Islam in modern China, this book is a valuable resource for scholars and students of Chinese history, as well as for policymakers and journalists interested in religion in China.

islamic textbooks: The Oxford Handbook of Religion and Education Liam Francis Gearon, Arniika Kuusisto, 2025-04-29 The Oxford Handbook of Religion and Education offers a multi-disciplinary work of scholarship and research highlighting the global significance of a critical interface of cultural and social, political, and theological importance. Drawing on historical perspective and contemporary reflection, the collection provides a uniquely transformative analysis of why the interface of religion and education is of such critical significance. With contributions from some of the leading thinkers in the field, this Handbook presents a cumulatively powerful argument to reassess the complexities of the intersection of religion and education. With ambitious and yet accessible intellectual engagements, the Handbook here furthers a central thesis: that the interface of religion and education is not merely a matter of arcane disputation about a domain of ancient origin or a rudimentary matter of formal educational process, but a vibrant domain of critical contestation fundamental to knowing, understanding, and living in the modern world.

islamic textbooks: Pakistan Under Siege Madiha Afzal, 2018-01-02 Over the last fifteen years, Pakistan has come to be defined exclusively in terms of its struggle with terror. But are ordinary Pakistanis extremists? And what explains how Pakistanis think? Much of the current work on extremism in Pakistan tends to study extremist trends in the country from a detached position—a top-down security perspective, that renders a one-dimensional picture of what is at its heart a complex, richly textured country of 200 million people. In this book, using rigorous analysis of survey data, in-depth interviews in schools and universities in Pakistan, historical narrative reporting, and her own intuitive understanding of the country, Madiha Afzal gives the full picture of Pakistan's relationship with extremism. The author lays out Pakistanis' own views on terrorist groups, on jihad, on religious minorities and non-Muslims, on America, and on their place in the world. The views are not radical at first glance, but are riddled with conspiracy theories. Afzal explains how the two pillars that define the Pakistani state—Islam and a paranoia about India—have led to a regressive form of Islamization in Pakistan's narratives, laws, and curricula. These, in turn, have shaped its citizens' attitudes. Afzal traces this outlook to Pakistan's unique and tortured birth. She examines the rhetoric and the strategic actions of three actors in Pakistani politics—the military, the civilian governments, and the Islamist parties—and their relationships with militant groups. She shows how regressive Pakistani laws instituted in the 1980s worsened citizen attitudes and led to vigilante and mob violence. The author also explains that the educational regime has become a vital element in shaping citizens' thinking. How many years one attends school, whether the school is public, private, or a madrassa, and what curricula is followed all affect Pakistanis' attitudes about terrorism and the rest of the world. In the end, Afzal suggests how this beleaguered nation—one with seemingly insurmountable problems in governance and education—can change course.

islamic textbooks: *Iqra' Elementary Curriculum* Tasneema Khatoon Ghazi, 1996

islamic textbooks: *Religious Diversity and Education. Nordic Perspectives* Geir Skeie, 2009 In the last ten years or so, religious plurality has become higher on the agenda for religious education research in the Nordic countries. This attention to religious plurality partly reflects processes of globalisation that include both physical migration and communication of ideas and is-sues across the world, making it 'smaller'. It also reflects the preoccupation of governments with social cohesion and, as part of this, intercultural education. In the curricula of the Nordic countries this is manifested in different ways, setting also the agenda for parts of educational research. This book addresses issues related to the increasing religious plurality in the Nordic countries. These issues are a challenge to many religious groups including historically dominant Lutheran national churches, both nationally and locally. They have also led to a reorientation in religious education research in the last decade. A rich variety of research perspectives are presented under three headings: Theoretical and methodical perspectives, The world of the students, Teachers and textbooks. Nordic religious education research here proves to be internationally oriented in terms of theoretical perspectives, whilst also contributing to the debate through important empirical studies. Examples of issues covered in the book are unintended learning, dialogue, gender, life-interpretation, spirituality, identity and values. In different ways all the contributions in this book shed light on the common theme of diversity, and are based on a will to include diverse perspectives both on the actors and the material of the classroom as well as on the life world of young people. The researchers represent different generations and different theoretical and methodological perspectives.

islamic textbooks: Wahhabism and the World Peter G. Mandaville, 2022 For more than half a century, Saudi Arabia--through both official and non-governmental channels--has poured billions of dollars into funding and sponsoring religious activities and Islamic causes around the world. The effect has been to propagate Wahhabism, the distinctively rigid and austere form of Islam associated with the Kingdom's religious establishment, within Muslim communities on almost every continent.
