Sharon G. Almquist, 2011-09-12 Brought to you by a team of experienced practitioners in the field, this book examines the vast topic of library support for distributed learning, providing both historical and contemporary viewpoints. What is the best way to deliver research resources to students who live off campus—as in, way off campus, in a rural area without a high-speed Internet connection? And where does one find a complete (and accurate) synopsis of copyright guidelines that will prevent well-intentioned librarians from being labeled as the copyright police? The answers to these two questions regarding distributed learning—and many more—are contained in *Distributed Learning and Virtual Librarianship*. Written by practitioners in their field of expertise, this book documents the history of distributed learning and discusses current issues in distributed learning librarianship, with a special focus on the role of technology. Topics covered include virtual libraries, reference assistance, E-reserves and document delivery, administrative and marketing issues, and copyright concerns. This text is valuable to librarians working in public, school, and academic libraries.

**penn state world campus textbooks: The SAGE Handbook of E-learning Research** Richard Andrews, Caroline Haythornthwaite, 2007-07-10 'I would like to enthusiastically recommend The SAGE Handbook of E-Learning Research. An international set of authors have produced a highly readable handbook that covers topics in E-learning research, theory, policy, language and literacy, and design issues. The work draws on multiple perspectives ranging from early work in asynchronous learning networks to community organization in e-learning. This is a large and much needed work that organizes and illuminates issues in E-learning in a way that readers will be able to take away practical advice for their own use. I am quite pleased to see this handbook that provides a

very useful organization of knowledge for our field' - John Bourne, Ph.D Professor and Executive Director, The Sloan Consortium ([www.sloan-c.org](http://www.sloan-c.org)) 'This book is an important contribution to the development of E-learning because its account of the research always begins with the context of learning from which the exploitation of technology can be viewed. The authors help us understand that technology affords new kinds of relationship between the learner and what is learned, and how it is learned. With this rich understanding, the book is able to build the wide-ranging research foundation on which the field can move forward' - Diana Laurillard, Institute of Education, University of London 'A comprehensive and compelling resource that provides a global perspective on a development that is transforming higher education' - David Pilsbury, Chief Executive, Worldwide Universities Network 'Unlike many how-to books on the topic...this work focuses on research for educators and others interested in how technology enhances or diminishes learning. Highly Recommended' - Choice Magazine This handbook provides a state-of-the-art, in-depth account of research in the rapidly expanding field of E-learning. The first of its kind, it provides reviews of over 20 areas in E-learning research by experts in the field, and provides a critical account of the best work to date. The contributors cover the basics of the discipline, as well as new theoretical perspectives. Areas of research covered by the Handbook include: - Contexts for researching e-learning - Theory and policy - Language and literacy - Design issues - History of the field The editors' introduction and many of the chapters show how multiple aspects of E-learning interact. The introduction also provides a new model for researching the field. This book is relevant for everyone in higher education, from undergraduate to faculty, as well as university administrators involved in providing E-learning. It will provide a research background for higher education, including universities, training colleges, and community colleges. It will also be relevant to those involved in any research and developmental aspect of E-learning - corporate trainers and those involved in online programs at secondary school or in virtual high schools. Whether you are a lecturer, researcher or programme designer, this is an essential read. Richard Andrews is Professor in English at the Institute of Education, University of London and Visiting Professor at New York University's Steinhardt School of Education, Culture and Human Development. Caroline Haythornthwaite is Associate Professor at the Graduate School of Library and Information Science at the University of Illinois at Urbana-Champaign.

**penn state world campus textbooks:** The New American College Town James Martin, James E. Samels, 2019-11-19 A new perspective on the relationships among colleges, universities, and the communities with which they are now partnering. Colleges and universities have always had interesting relationships with their external communities, whether they are cities, towns, or something in between. In many cases, they are the main economic driver for their regions—State College, Pennsylvania, or Raleigh, North Carolina, for example—and in others, they exist side by side with thriving industries. In The New American College Town, James Martin, James E. Samels & Associates provide a practical guide for planning a new kind of American college town—one that moves beyond the nostalgia-tinged stereotype to achieve collaborative objectives. What exactly is a college town in America today? Examining the broad range of partnerships transforming campuses and the communities around them, the book opens by detailing twenty characteristics of new American college towns. Subsequent chapters invite presidents, provosts, planners, mayors, architects, and association directors to share their views on how college town relationships are shaping new generations of students and citizens. The book tackles urban and rural institutions, as well as community colleges, and closes with predictions about what college towns will look like in twenty-five years. Contributors include presidents from Lehigh, Portland State, New Jersey City, and Connecticut College, along with five college town mayors and the current or former executive directors from the International Town-Gown Association, the Association for the Study of Higher Education, and others. The book also traces how town-gown relations are expanding into innovative areas nationally and internationally, moving beyond familiar student life programs and services to hundred-million-dollar downtown developments. The first comprehensive, single-volume resource designed for leaders on both sides of these conversations, The New American College Town includes

action plans, lessons learned, and pitfalls to avoid in developing transformative relationships between colleges and their extended communities. Contributors: Robert C. **penn state world campus textbooks: Research Anthology on Adult Education and the Development of Lifelong Learners** Management Association, Information Resources, 2021-03-19 Whether it is earning a GED, a particular skill, or technical topic for a career, taking classes of interest, or even returning to begin a degree program or completing it, adult learning encompasses those beyond the traditional university age seeking out education. This type of education could be considered non-traditional as it goes beyond the typical educational path and develops learners that are self-initiated and focused on personal development in the form of gaining some sort of education. Essentially, it is a voluntary choice of learning throughout life for personal and professional development. While there is often a large focus towards K-12 and higher education, it is important that research also focuses on the developing trends, technologies, and techniques for providing adult education along with understanding lifelong learners' choices, developments, and needs. The Research Anthology on Adult Education and the Development of Lifelong Learners focuses specifically on adult education and the best practices, services, and educational environments and methods for both the teaching and learning of adults. This spans further into the understanding of what it means to be a lifelong learner and how to develop adults who want to voluntarily contribute to their own development by enhancing their education level or knowledge of certain topics. This book is essential for teachers and professors, course instructors, business professionals, school administrators, practitioners, researchers, academicians, and students interested in the latest advancements in adult education and lifelong learning.
