kindergarten textbooks: **Motherhood, Childhood, and Parenting in an Age of Education** Maryellen Schaub, 2023-05-05 Motherhood, as a celebrated yet underappreciated role, is often thought of as a natural process, something instinctive that we refine by watching our own mothers and others in our community. We rarely think of motherhood as something that is time and culturally specific, yet, like culture itself, it is socially constructed, and both motherhood and childhood evolve over time. With the rise in educational attainment of mothers in the American population, the expectations associated with childhood increasingly include not just education but cognitive development and extracurricular activities as the partnership between parents and education intensifies in the joint project of human development of children. Motherhood, Childhood, and Parenting in an Age of Education offers a new way to conceptualize the high demands of contemporary parenthood. It traces the emerging narrative about the good mother, changes in the underlying assumptions of what constitutes the good mother, and the implications for the good childhood as education grows in institutional strength. This book demonstrates that education is driving the formation of the parent and child roles in the dominant contemporary culture of the US although alternate models exist. Education itself has expanded over time to become our largest social intervention, defining behaviors and beliefs such as parental involvement in schooling, the unengaged parent, and the deficient student.

This book will be the first one of its kind to focus on early childhood curriculum in Chinese societies - from social context and culture to reforms and practices, and finally to the lessons that researchers, policymakers and practitioners could learn, as well as future directions. Is play valued? Are young children schooled earlier in Chinese societies? How do Chinese children learn in kindergartens? What is valued by Chinese educators when they implement early childhood curricula? How do Chinese teachers deliver early childhood curricula for their young children? Why were Chinese early childhood curricula implemented in these ways? Answers to these questions and more will be provided in this pioneering book.
