openstax free textbooks: Distributed Learning Ecosystems Daniel Otto, Gianna Scharnberg, Michael Kerres, Olaf Zawacki-Richter, 2023-02-20 This open-access book is based on the observation that learning ecosystems are increasingly established in higher education institutions. The book approaches its subject chronologically, examining how educational philosophies and social contexts influenced textbooks' creation and reception through the ages, from ancient clay tablets to today's digital resources. It investigates the role of textbooks in promoting or challenging social inequality. The analysis is supported by primary source research, including historical textbooks, archival data, and educational policies, to offer a comprehensive understanding of the textbook's impact on society.
