museum studies textbooks: *Grasping the World* Donald Preziosi, Claire Farago, 2019-07-23

First published in 2004, this volume recognises that there is much more to museums than the documenting, monumentalizing, or theme-parking of identity, history and heritage. This landmark anthology aims to make strange the very existence of museums and to plot a critical, historical and ethical understanding of their origins and history. A radical selection of key texts introduces the reader to the intense investigation of the modern European idea of the museum that has taken place over the last fifty years. Texts first published in journals and books are brought together in one volume with up-to-the-minute and specially commissioned pieces by leading administrators, curators and art historians. The selections are organized by key themes that map the evolution of the debate and introduced by Donald Preziosi and Claire Farago, two considerable critics, who write with the edge and enthusiasm of art historians who have spent their lives working with museums. *Grasping the World* is an invaluable resource for students and teachers of art history and museum studies.

museum studies textbooks: *Making Museums Matter* Stephen Weil, 2012-01-11 In this volume of 29 essays, Weil's overarching concern is that museums be able to "earn their keep"—that they make themselves matter—in an environment of potentially shrinking resources. museum studies textbooks: *Connecting Museums* Taylor & Francis Group, 2021-06-30 *Connecting Museums* explores the boundaries of museums and how external relationships are affected by internal commitments, structures and traditions. Focusing on museums' relationship with health, inclusion, and community, the book provides a detailed assessment of the alliances between museums and other stakeholders in recent years. With contributions from practitioners and established and early-career academics, this volume explore the ideas and practices through which museums are seeking to move beyond what might be called one-off contributions to society, to reach places where the museum is dynamic and facilitates self-generation and renewal, where it can become not just a provider of a cultural service, but an active participant in the rehabilitation of social trust and democratic participation. The contributors to this volume provide conceptual critiques and clarification of a number of key ideas which form the basis of the ethics of museum legitimacy, as well as a number of reports from the front line about the experience of trying to renew museums as more valuable and more relevant institutions. Providing internal and external perspectives, *Connecting Museums* presents a mix of applied and theoretical understandings of the changing roles of museums today. As such, the book should be of interest to academics, researchers

and students working in the broad fields of museum and heritage studies, material culture, and arts and museum management.

museum studies textbooks: Revisiting the Past in Museums and at Historic Sites Anca I. Lasc, Andrew McClellan, Anne Söll, 2021-11-01 Revisiting the Past in Museums and at Historic Sites demonstrates that museums and historic spaces are increasingly becoming backdrops for all sorts of appropriations and interventions that throw new light upon the objects they comprise and the pasts they reference. Rooted in new scholarship that expands established notions of art installations, museums, period rooms, and historic sites, the book brings together contributions from scholars from intersecting disciplines. Arguing that we are witnessing a paradigm shift concerning the place of historic spaces and museums in the contemporary imaginary, the volume shows that such institutions are merging traditional scholarly activities tied to historical representation and inquiry with novel modes of display and interpretation, drawing them closer to the world of entertainment and interactive consumption. Case studies analyze how a range of interventions impact historic spaces and conceptions of the past they generate. The book concludes that museums and historic sites are reinventing themselves in order to remain meaningful and to play a role in societies aspiring to be more inclusive and open to historical and cultural debate. Revisiting the Past in Museums and at Historic Sites will be of interest to students and faculty who are engaged in the study of museums, art history, architectural and design history, social and cultural history, interior design, visual culture, and material culture.

museum studies textbooks: The International Handbooks of Museum Studies Sharon Macdonald, Conal McCarthy, Helen Rees Leahy,

museum studies textbooks: *Museum Philosophy for the Twenty-first Century* Hugh H. Genoways, 2006 What underlying philosophy and mission should museums pursue in the first half of the twenty-first century? In *Museum Philosophy*, twenty-four authors use the lenses of a variety of disciplines to answer this essential question. Museum professionals offer their answers alongside philosophers, historians, political scientists, educators, sociologists, and others in a wide-ranging exploration of institutions from art museums to zoos. Hugh Genoway's book offers philosophical and ethical guidelines, describes the ways specific institutions illustrate different philosophies, examines major divisions in the museum community, and explores outreach and engagement between the museum and its larger community. Both established museum professionals and students of museum studies will benefit from this insightful look into the foundations and future of their field.

museum studies textbooks: The Contemporary Museum Simon Knell, 2018-10-11 The *Contemporary Museum* issues a challenge to those who view the museum as an artefact of history, constrained in its outlook as much by professional, institutional and disciplinary creed, as by the collections it accumulated in the distant past. Denying that the museum can locate its purpose in the pursuit of tradition or in idealistic speculation about the future, the book asserts that this can only be found through an ongoing and proactive negotiation with the present: the contemporary. This

volume is not concerned with any present, but with the peculiar circumstances of what it refers to as the 'global contemporary' – the sense of living in a globally connected world that is preoccupied with the contemporary. To situate the museum in this world of real and immediate need and action, beyond the reach of history, the book argues, is to empower it to challenge existing dogmas and inequalities and sweep aside old hierarchies. As a result, fundamental questions need to be asked about such things as the museum's relationship to global time and space, to systems and technologies of knowing, to 'the life well lived', to the movement and rights of people, and to the psychology, permanence and organisation of culture. Incorporating diverse viewpoints from around the world, *The Contemporary Museum* is a follow-up volume to *Museum Revolutions* and, as such, should be essential reading for students in the fields of museum and heritage studies, cultural studies, communication and media studies, art history and social policy. Academics and museum professionals will also find this book a source of inspiration.
