japanese textbooks: History Textbooks and the Wars in Asia Gi-Wook Shin, Daniel C. Sneider, 2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions, especially in the realms of culture and economy. Still, the region cannot escape from the burden of history. This book examines the formation of historical memory in four Northeast Asian societies (China, Japan, South Korea, and Taiwan) and the United States focusing on the period from the beginning of the Sino-Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951. The contributors analyse the recent efforts of Korean, Japanese, and Chinese scholars to write a 'common history' of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements. In doing so, they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided, and often conflicting, historical memories. The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives. Through uncovering the existence of different master narratives, it is hoped, citizens will develop a more self-critical, self-reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self- and mutual understanding and eventual historical reconciliation in the region. This book will be essential reading for students and scholars of Asian history, Asian education and international relations in East Asia.

japanese textbooks: Education and Training in Japan Thomas P. Rohlen, Christopher Bjork, 1998 This collection, written by Japanese and foreign scholars, represents an inclusive cross-section of the most important work in key areas of this field. Topics include: * the impact of Japanese education and training on Japan's economy and culture * the Japanese influence on the East Asian approach to education, in comparison with the educational systems of Korea, Taiwan, Singapore and Hong Kong * Japan's promotion of learning organizations and Knowledge workers for the Information Age.

japanese textbooks: Deconstructing Japan's Image of South Korea T. Tamaki, 2010-03-29 What role does identity play in foreign policy? How might identity impact on Japan's relations with South Korea? This book takes identity theorizing in International Relations theory a step further by attempting to account for a resilient collective identity that informs policy makers throughout time and space.

japanese textbooks: Networking the International System Madeleine Herren, 2014-06-13 The book critically investigates the local impact of international organizations beyond a Western rationale and aims to overcome Eurocentric patterns of analysis. Considering Asian and Western examples, the contributions originate from different disciplines and study areas and discuss a global approach, which has been a blind spot in scholarly research on international organizations until now. Using the 1930s as a historical reference, the contributions question role of international organizations during conflicts, war and crises, gaining insights into their function as peacekeeping forces in the 21st century. While chapter one discusses the historicity of international organizations and the availability of sources, the second chapter deliberates on Eurocentrism and science policy, considering the converging of newly created epistemic communities and old diplomatic elites. Chapter 3 sheds light on international organizations as platforms, expanding the field of research from the diversity of organizations to the patterns of global governance. The final chapter turns to the question of how international organizations invented and introduced new fields of action, pointing to the antithetic role of standardization, the preservation of cultural heritage and the difficulties in reaching a non-Western approach.

japanese textbooks: *Missing the Meaning* A. Peacock, A. Cleghorn, 2004-02-20 *Missing the Meaning* investigates recent evidence that school text materials are more problematic than previously imagined. Difficulties with language, illustrations, design and cultural mismatch are highlighted, and ways in which young students 'read' books and electronic materials in classrooms are compared through contributions from researchers across five continents. The book suggests new

ways to develop and use text so that the materials are better matched to the diverse needs of teachers and students. The implications of this collection are wide, applying not only to teachers, but to teacher educators, educational publishers, software developers and policy makers.

japanese textbooks: *The Burden of the Past* Kan Kimura, 2019-01-29 The Burden of the Past reexamines the dispute over historical perception between Japan and South Korea, going beyond the descriptive emphasis of previous studies to clearly identify the many independent variables that have affected the situation. From the history textbook debates, to the Occupation-period exploitation of "comfort women," to the Dokdo/Takeshima territory dispute and Yasukuni Shrine visits, Professor Kimura traces the rise and fall of popular, political, and international concerns underlying these complex and highly fraught issues. Utilizing Japanese and South Korean newspaper databases to review discussion of the two countries' disputed historical perceptions from the end of World War II to the present, The Burden of the Past provides readers with the historical framework and the major players involved, offering much-needed clarity on such polarizing issues. By seeing behind the public discourse and political rhetoric, this book offers a firmer footing for a discussion and the steps toward resolution.

japanese textbooks: *Japan's Contested War Memories* Philip A. Seaton, 2007-03-12 Japan's Contested War Memories is an important and significant book that explores the struggles within contemporary Japanese society to come to terms with Second World War history. Focusing particularly on 1972 onwards, the period starts with the normalization of relations with China and the return of Okinawa to Japan in 1972, and ends with the sixtieth anniversary commemorations. Analyzing the variety of ways in which the Japanese people narrate, contest and interpret the past, the book is also a major critique of the way the subject has been treated in much of the English-language. Philip Seaton concludes that war history in Japan today is more divisive and widely argued over than in any of the other major Second World War combatant nations. Providing a sharp contrast to the many orthodox statements about Japanese 'ignorance', 'amnesia' and 'denial' about the war, this is an engaging and illuminating study that will appeal to scholars and students of Japanese history, politics, cultural studies, society and memory theory.

japanese textbooks: *The Politics of Historical Production in Late Qing and Republican China* Tze-ki Hon, Robert Culp, 2007-09-30 This book examines forms of Chinese historical production happening outside the mainstream of academic history, through such new measures as the publication of textbooks, the writing of local history, the preservation of archival materials, and government attempts to establish orthodox historical accounts. The book does so in order to broaden the scope of modern Chinese historiography, when it focuses primarily on a small group of writers such as Liang Qichao, Gu Jiegang, and Fu Sinian. Directly linking historical writings to the formation of the nation, the justification of elite authority, and the cultivation of active citizenry, this book shows that historiography is essential to understanding the uniqueness of Chinese modernity. Also available in paperback.

japanese textbooks: *Educational Reform and International Baccalaureate in the Asia-Pacific* Coulson, David Gregory, Datta, Shammi, Davies, Michael James, 2021-02-19 The need to reform secondary-level education to prepare young people for new economic realities has emerged. In an age of constant career changing, cognitive flexibility is a top-priority skill to develop in today's students. This shift requires methodological innovation that enhances children's natural abilities as well as updated, focused teacher education in order to prepare them adequately. Educational Reform and International Baccalaureate in the Asia-Pacific is a collection of innovative research that examines the development and implementation of IB curricula. Highlighting a wide range of topics including critical thinking, student evaluation, and teacher training, this book is ideally designed for educators, curriculum developers, instructional designers, administrative officials, policymakers, researchers, academicians, and students.

japanese textbooks: *High School Course of Study Series ...* Hawaii. Department of Public Instruction, 1927

japanese textbooks: *Censoring History* Laura E. Hein, Mark Selden, 2016-09-16 Considering

the great influence textbooks have as interpreters of history, politics and culture to future generations of citizens, it is no surprise that they generate considerable controversy. Focusing largely on textbook treatment of lingering - and sometimes explosive - tensions originating in World War II, *Censoring History* addresses issues of textbook nationalism in historical and comparative perspective. Discussions include Japan's Comfort Women and the Nanjing Massacre; Nazi genocide against the Jews, Gypsies, Catholics and others; Hiroshima and Nagasaki, and the Indochina wars. The essays address controversies over textbook content around the globe: How and why do specific representations of war evolve? What are the international and national forces affecting how textbook writers, publishers and state censors depict the past? How do these forces differ from country to country? Other comparative essays analyze nationalist and war controversies in German, US and Chinese textbook debates.

japanese textbooks: Designing History in East Asian Textbooks Gotelind Mueller, 2011-02-01 This book analyses the efforts throughout East Asia to deploy education for purposes of political socialization, and in particular in order to shape notions of identity. The chapters also examine the trend of 'common textbook initiatives', which have recently emerged in East Asia with the aim of helping to defuse tensions arguably fuelled by existing practices of mutual (mis)representation. These are analysed in relation to the East Asian political context, and compared with previous and ongoing endeavours in other parts of the world, particularly Europe, which have been keenly observed by East Asian practitioners. Written by a group of international education experts, chapters discuss the enduring focus on the role of curricula in inculcating homogenous visions of the national self, and indeed homogenized visions of significant 'others'. Including contributions from scholars and curriculum developers involved personally in the writing of national and multi-national history textbooks this book will be of interest to students and scholars of Asian education, Asian history and comparative education studies. Gotelind Müller is Professor of Chinese Studies, University of Heidelberg, Germany

This international dialogue therefore addresses historians, history education researchers, university professors, school teachers, policy makers, publishers, parents and all those who insist that history education is very important, especially if it enables young people to orientate in the present and the future in historical terms

japanese textbooks: Evolving Multicultural Education for Global Classrooms Gordon, Richard Keith, Ahmed, Kawser, Hosoda, Miwako, 2021-06-18 Multicultural education is a construct that has been very useful for many years in harboring sensitivities teachers need in addressing diverse students. Now the discipline needs refreshing. In the global society, the idea of multicultural education, a decidedly Western formation, needs to expand its conceptual boundaries. Salient issues in multicultural education such as individual identities, social justice, and equity are bedrock concerns of multicultural educators. These concepts are considered necessary but not sufficient in

shaping an evolving model of multicultural education. The complexity of humans and modern and emerging societies requires a broadened scope of the understanding of contemporary multicultural theory and practice. *Evolving Multicultural Education for Global Classrooms* addresses multicultural education from a comprehensive viewpoint that acknowledges the historical benefit of multicultural education and recognizes a need to inform the discipline with a broader viewpoint. As most knowledge on multicultural education comes from a Western perspective and the scholarship on the topic is weakening, the chapters in this book present new practices and classroom applications that are internationally transferable. Topics covered include teacher education, social justice, educational equity and inclusion, online education, and cultural sensitivities. This book is ideally intended for teachers, educational theorists, sociologists of education, inservice and preservice teachers, administrators, teacher educators, practitioners, researchers, academicians, and students interested in a fresh global perspective on multicultural education.

japanese textbooks: National Standards and School Reform in Japan and the United States Gary DeCoker, 2002 Explores the implications of a national US curriculum through the study of Japanese education. It suggests that the US educational system lacks certain organizational mechanisms that support student achievement and would facilitate teacher involvement in the educational reform process.

japanese textbooks: Japanese Education Roberta E. Pike, 2007 Presents a large representative sample of the literature on Japanese education with an emphasis on its psychosocial aspects. Many discussions compare the Japanese educational system with that of the United States and other countries. The citations cover most of the 1990s including a few earlier and later references. Includes extensive discussions about Japanese educational reform movements and their consequences. Also cites published and unpublished dissertations and theses. Updates the last comprehensive English language bibliography on Japanese education published by Ulrich Teichler in 1974. The citations were taken from many online databases. Suitable for students, teachers, scholars and the general public.

japanese textbooks: South Korea Georgie D. M. Hyde, 1988-06-21 This comprehensive study omits no aspects of Korean life: its chequered history, brilliant success and aspirations for the future. Its tribal trek from Mongolia via China and subsequent wars to establish independence have taken part in producing a civilisation beneficial to mankind. Its outstanding economic success, formerly attributed to low wages by Western countries unable to compete, results from skill, hard work and an educational system, both public and private, relevant to country and individual. Recently a political revolution has established a democracy as President Chun, father of economic success, retires in favour of a new constitution drafted by ruling and opposition parties: a triumph for the moral stance of 'The Land of the Morning Calm'.

japanese textbooks: Sorry States Jennifer Lind, 2011-08-15 Governments increasingly offer or demand apologies for past human rights abuses, and it is widely believed that such expressions of contrition are necessary to promote reconciliation between former adversaries. The post-World War II experiences of Japan and Germany suggest that international apologies have powerful healing effects when they are offered, and poisonous effects when withheld. West Germany made extensive efforts to atone for wartime crimes-formal apologies, monuments to victims of the Nazis, and candid history textbooks; Bonn successfully reconciled with its wartime enemies. By contrast, Tokyo has made few and unsatisfying apologies and approves school textbooks that whitewash wartime atrocities. Japanese leaders worship at the Yasukuni Shrine, which honors war criminals among

Japan's war dead. Relations between Japan and its neighbors remain tense. Examining the cases of South Korean relations with Japan and of French relations with Germany, Jennifer Lind demonstrates that denials of past atrocities fuel distrust and inhibit international reconciliation. In *Sorry States*, she argues that a country's acknowledgment of past misdeeds is essential for promoting trust and reconciliation after war. However, Lind challenges the conventional wisdom by showing that many countries have been able to reconcile without much in the way of apologies or reparations. Contrition can be highly controversial and is likely to cause a domestic backlash that alarms—rather than assuages—outside observers. Apologies and other such polarizing gestures are thus unlikely to soothe relations after conflict, Lind finds, and remembrance that is less accusatory—conducted bilaterally or in multilateral settings—holds the most promise for international reconciliation.

japanese textbooks: Controversial History Education in Asian Contexts Mark Baildon, Kah Seng Loh, Ivy Maria Lim, Gül İnanc, Junaidah Jaffar, 2013-08-22 This book examines both history textbook controversies AND teaching historical controversy in Asian contexts. The different perspectives provided by the book's authors offer numerous insights, examples, and approaches for understanding historical controversy to provide a practical gold mine for scholars and practitioners. The book provides case studies of history textbook controversies ranging from treatments of the Nanjing Massacre to a comparative treatment of Japanese occupation in Vietnamese and Singaporean textbooks to the differences in history textbooks published by secular and Hindu nationalist governments in India. It also offers a range of approaches for teaching historical controversy in classrooms. These include Structured Academic Controversy, the use of Japanese manga, teaching controversy through case studies, student facilitated discussion processes, and discipline-based approaches that can be used in history classrooms. The book's chapters will help educational researchers and curriculumists consider new approaches for curriculum design, curriculum study, and classroom research.
