teaching textbooks app: Crew of Three Kimberly J. Ward, 2023-08-23 As we sailed out of our cove, our home behind us and the complete unknown ahead, I couldn't help thinking that I was leaving everything I knew and loved—with the exception of Michael and Ally. Talk about being pushed past my comfort zone in just about every direction. Kimberly is a traveler, adventurer and gardener. Not a sailor. Yet she, her husband, and their 10-year-old daughter moved aboard their 34-foot boat for two years and sailed from Massachusetts to Grenada and back. Packed with detailed information, this is the story of their decision to go, the two years of planning to make it work, plus the first several months they lived aboard. More than a mere guidebook, it is part memoir and part instruction manual for breaking free of the ordinary. Travelers, gardeners, sailors, and dreamers alike, who seek to live an intentional life, a bit off the beaten path, will find both wisdom and inspiration in this family's adventures.

teaching textbooks app: Proceedings of the 4th International Conference on Internet, Education and Information Technology (IEIT 2024) Yongjun Feng, Aniruddha Bhattacharjya, Junfeng Diao, Nahed Rajaa Ghlamallah, 2024-11-20 This is an open access book. With the development of science and technology, information technology and information resources should be actively developed and fully applied in all fields of education and teaching, so as to promote the modernization of education and cultivate talents to meet the needs of society. From the technical point of view, the basic characteristics of educational informatization are digitalization, networking, intelligentization and multi-media. From the perspective of education, the basic characteristics of educational information are openness, sharing, interaction and cooperation. With the advantage of the network, it can provide students with a large amount of information and knowledge by combining different knowledge and information from various aspects in a high frequency. Therefore, we have intensified efforts to reform the traditional teaching methods and set up a new teaching concept, from the interaction between teachers and students in the past to the sharing between students. In short, it forms a sharing learning mode. For all students, strive to achieve students' learning independence, initiative and creativity. To sum up, we will provide a quick exchange platform between education and information technology, so that more scholars in related fields can share and exchange new ideas. The 4th International Conference on Internet, Education and Information Technology (IEIT 2024) will be held on May 17-19, 2024 in Kunming, China. IEIT 2023 is to bring together innovative academics and industrial experts in the field of Internet, Education and Information Technology to a common forum. The primary goal of the conference is to promote research and developmental activities in Internet, Education and Information Technology and another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working all around the world. The conference will be held every year to make it an ideal platform for people to share views and experiences in international conference on Internet, Education and Information Technology and related areas.

teaching textbooks app: Mathematical Teaching and Learning Katherine M. Robinson, Donna Kotsopoulos, Adam K. Dubé, 2023-06-15 This book focusses on teaching and learning in elementary and middle school mathematics and suggests practices for teachers to help children be successful mathematical thinkers. Contributions from diverse theoretical and disciplinary perspectives are explored. Topics include the roles of technology, language, and classroom discussion in mathematics learning, the use of creativity, visuals, and teachers' physical gestures to enhance problem solving, inclusive educational activities to promote children's mathematics understanding, how learning in the home can enhance children's mathematical skills, the application of mathematics learning theories in designing effective teaching tools, and a discussion of how students, teachers, teacher educators, and school boards differentially approach elementary and middle school mathematics. This book and its companion, *Mathematical Cognition and Understanding*, take an interdisciplinary perspective to mathematical learning and development in the elementary and middle school years. The authors and perspectives in this book draw from education, neuroscience, developmental psychology, and cognitive psychology. The book will be relevant to scholars/educators in the field of mathematics education and also those in childhood development and cognition. Each chapter also includes practical tips and implications for parents as well as for educators and researchers.

teaching textbooks app: Mobile Media In and Outside of the Art Classroom Juan Carlos Castro, 2019-09-19 This edited volume explores a range of educational effects on student learning that resulted from a long-term study using a creative visual arts curriculum designed for mobile media (smartphones and tablets) and used in art classrooms. The curriculum, entitled MonCoin, a French phrase meaning My Corner, was initially designed and piloted in a Montreal area school for at-risk youth in 2012. Since then, it has been refined, deployed, and researched across secondary schools from a range of socio-cultural educational contexts. This book is comprised of contributions from researchers and practitioners associated with the MonCoin project who address critical

insights gleaned from our study, such as the social context of teen mobile media use; curriculum theory and design; influences of identity on creative practice; and specific strategies for creative applications of mobile media in schools. The purpose of this edited book is to offer art education researchers and teachers innovative curriculum for mobile media and the networked conditions that influence identity, space, and practice with and through this ubiquitous technology.

teaching textbooks app: ISIS' Propaganda Machine Ahmed Al-Rawi, 2024-02-01 This book examines ISIS' media propaganda machine. The book focuses on case studies that have been largely understudied in relation to ISIS' media production. Empirically, it offers new insights into how ISIS uses its media production to disseminate its extremist ideology by focusing on video games, educational apps, Dark Web sites, and offline billboards. The book argues that despite all the discussion about how ISIS has disappeared or even died, the terrorist group's daily activities on the Dark Web show that they are still thriving and disseminating their propaganda in more than 20 different languages, and effectively functioning as an international news organization. Using a mixed-method research approach, the book offers a multilayered understanding of media content and fills a major gap in the literature, especially in relation to the use of educational apps and the Dark Web. This book will be of much interest to students of media and communication studies, terrorism and counterterrorism, Middle Eastern politics, and international relations.
