textbooks for high school english: High School English Book One A. R. Brubacher, 2015-06-14 Excerpt from High School English Book One The purpose of this book is to unify the teaching of English in the high school. English as a school study is more than grammar, more than composition, more than literature. It is a judicious combination of these three component parts. The authors feel that their work justifies itself only in so far as it gives grammar its rightful place in the study of English, treats composition as self-expression in language, and makes the reading of the books prescribed in English literature a profitable recreation. Every child acquires the power of speech by unconscious imitation of the mother tongue. Since the model of imitation in America is frequently ungrammatical, the English of the average American child is frequently ungrammatical unless conscious correction and self-cultivation in language make it correct. It must therefore be the purpose of English teaching to give a norm by which the acquired speech habits may be corrected, by which the acquired language may be adjusted to the language of the writers and speakers of good English. This adjustment may be made in part by imitation of correct models, but grammar must always remain the touchstone by which correctness is judged. Even the models must be examined for grammatical values. In the treatment of composition the authors have sought to shift the point of emphasis from literary composition to the practice of self-expression by means of language. textbooks for high school english: Textbook English Elen Le Foll, 2024-07-15 This book provides a systematic, empirical account of the language typically presented in English as a Foreign Language (EFL) textbooks, based on a large corpus of EFL textbooks used in secondary schools. A modified version of the Multi-Dimensional Analysis (MDA) framework serves to examine linguistic variation both within textbooks and compared to corpora representing 'real-life' English as used outside the EFL classroom. The results highlight the characteristics of Textbook English that define it as a distinct variety of English. In light of the study's pedagogical implications, this book proposes a range of corpus-based approaches to improve the naturalness of textbook texts. It also contributes to advancing quantitative corpus linguistics methodology: its detailed online supplements aim for methodological transparency and reproducibility in line with the principles of Open Science. This book will be of interest to linguistics and language education students and researchers, as well as EFL teachers, textbook authors and editors, and those involved in curriculum development and teacher training.

The dataset, upon which this book builds, consists of a collection of 18 textbooks, which belong to five sets of locally developed English textbooks for grade 10 to grade 12 students. These series were used in all public schools from the mid-1980s to the present. During this period, schooling expanded rapidly in Vietnam, while English also gained increasing prominence within the school system. This book examines the curricular content of these textbooks and presents a long-term analysis of the 'hidden' curricular content in light of Vietnam's recent history and its government's concerns about national identity.

English education in Taiwan has gone through various major transformations since the intensification of globalization after the 1990s. On one hand, children start to learn English ever earlier while on the other hand, the curriculum and materials in the vocational schools and at the tertiary level become diversified to meet various specific needs of English use. textbooks for high school english: EIL Education for the Expanding Circle Nobuyuki Hino, 2018-03-14 The teaching of English in the Expanding Circle, traditionally called EFL countries, has

long been regarded as having no choice but to follow Inner Circle or Anglo-American norms, both in pedagogy and language models. This situation is in sharp contrast with that of the Outer Circle, or ESL countries, where the WE (World Englishes) paradigm, coupled with post-colonialism, has liberated the users of indigenous Englishes from the norms of Anglophone native speakers. Employing Japan as a primary sample, this book proposes a new paradigm of EIL (English as an International Language) education, by integrating relevant paradigms such as WE and ELF (English as a Lingua Franca), which enables users of English from the Expanding Circle to represent their own voices in international communication.. Various examples of actual classroom practice in EIL are also presented, bridging the longstanding gap between theory and practice in this field.
