textbooks for life legit: Eugenics in American Political Life Shannon Bow O'Brien, 2024-07-18 The book explores the development of the American eugenics movement and how it still plays a role in American life. Building on a brief overview of the concept of eugenics, Shannon Bow O'Brien charts the foundations of the ideas, significant influences, and influencers of the movement in the last 19th and early 20th centuries. She discusses how these ideals and social life shaped American culture and encouraged attitudes toward racial and ethnic biases, including immigration policies in that period. O'Brien examines how the founding of the United States of America was built on unwanted individuals from the United Kingdom; transported felons and indentured servants were many of the original colonists. As the population forged its new nation, many of these individuals were the focus of restrictive immigration policies that sought to amend the identity of the American citizen and sought to define acceptable roles for Black persons within American society. Faithful slave monuments provided physical models to help engrain these roles within American life. O'Brien traces the development of the Mammy statue movement and its intersectionality with the restrictive immigration laws. Finally, she turns to the rhetoric of Donald Trump and contextualizes his speech in the ideology of the superiority of White Nordic nativism within American life.

textbooks for life legit: Living a Motivated Life Raymond J. Wlodkowski, 2019-03-14 What if, as psychologists and adult educators advocate, a person chose a life where his motivation for the work itself determined what he did? Living a Motivated Life: A Memoir and Activities follows the author through forty years, revealing how he selected vocational pursuits guided by his

understanding of intrinsic motivation and transformative learning. As a compass for relevant decisions, these ideas gave energy and purpose to how he lived, and an instinct as sure as sight for the future. Written with nuance, humor, and unpredictability, this story renders how he came to appreciate learning for the pleasure of learning. Facing similar challenges as those of today's first generation college students, the memoir narrates his unexpected college enrollment, his friendship with an ancient history professor, and his triumphs and travails as teacher, psychologist, human relations specialist, psychotherapist, and adult educator. This is the first memoir of someone who consciously chose to lead a professional life to experience flow on a daily basis. It is an important step in the integration and evolution of intrinsic motivation theory and transformative learning. But it reaches beyond this outcome, sharing how the author aspired to be better at what he valued and showing how he discovered and extended these ideas to others.

It seems it was the right choice—she and Austin are still together, and Kennedy is now the editor in chief of the school's award-winning newspaper. But then Kennedy's world is shattered one evening when she walks in on Austin kissing her best friend, and she wonders if maybe her life would have been better if she'd made the other choice. As fate would have it, she's about to find out . . . The very next day, Kennedy falls and hits her head and mysteriously awakes as a student at the Windsor Academy. And not just any student: Kennedy is at the top of her class, she's popular, she has the coolest best friend around, and she's practically a shoo-in for Columbia University. But as she navigates her new world, she starts to wonder whether this alternate version of herself really is as happy as everyone seems to believe. Is it possible this Kennedy is harboring secrets and regrets of her own? textbooks for life legit: Foundations of Economics Yanis Varoufakis, 2002-01-08

Foundations of Economics breathes life into the discipline by linking key economic concepts with wider debates and issues. By bringing to light delightful mind-teasers, philosophical questions and intriguing politics in mainstream economics, it promises to enliven an otherwise dry course whilst inspiring students to do well. The book covers all the main economic concepts and addresses in detail three main areas: * consumption and choice * production and markets * government and the State. Each is discussed in terms of what the conventional textbook says, how these ideas developed in historical and philosophical terms and whether or not they make sense. Assumptions about economics as a discipline are challenged, and several pertinent students' anxieties ('Should I be studying economics?') are discussed.

Hilaire Belloc's landmark study *Characters of the Reformation* argues that Western Europe's break from the Catholic Church was driven by a land-grab and looting of Church property by European noblemen.

Belloc has little admiration for the so-called leaders of the time and credits the Reformation to behind-the-scenes players. Each chapter is a mini-biography and individuals covered include Anne Boleyn, Pope Clement the Seventh, Cecil, Richelieu, Laud, Oliver Cromwell, Descartes, Pascal and more.

textbooks for life legit: Families, the State and Educational Inequality in the Singapore City-State Charleen Chiong, 2021-09-30 Focusing on Singapore's education system from an equity perspective, Chiong's book describes the often unheard perspectives of socio-economically disadvantaged families in Singapore. The performance of Singaporean students on international education benchmarking tests has been widely recognised. Relatively less known is how socio-economically disadvantaged families negotiate Singapore's highly competitive, stratifying and meritocratic system. Yet, families' perspectives can provide crucial insight in understanding how policy is 'lived' and experienced, and its effects on people's lives. Drawing on 72 interviews with 12 families, this book traces the development of surprisingly close, collaborative relations between the state, schools and families on Singapore's socio-economic margins. It demonstrates that in the 'strong' state of Singapore, families' dependency on schools and the state facilitates the internalisation of individual and familial responsibility for future success. However, these very processes can injure, and perpetuate inequality. The analysis presented in this book has relevance in other contexts, in times where advanced capitalist states face growing inequalities and challenging relationships between institutional authority and the wider populace. As socio-economic and educational inequalities widen, this book asks timely questions and provides recommendations on what a more equitable state-citizen compact might look like. The book will appeal to researchers and students who are interested in the fields of the sociology and politics of education, social policy, and Asian culture and society.
