textbooks from the 90s: *Aspects of Culture in Second Language Acquisition and Foreign Language Learning* Janusz Arabski, Adam Wojtaszek, 2011-08-27 In recent years language learning has been increasingly viewed by some SLA researchers as an essentially social-psychological process in which the role of a wider sociocultural context should not be marginalized. This volume offers a valuable contribution to this growing body of research by providing theoretical considerations and empirical research data on themes such as the development of intercultural communicative competence, the role of English as a lingua franca in intercultural communication, and the place of cultural factors in SLA theorizing, research, second/foreign language teaching and teacher training. The volume also contains contributions which share the linguistic interest in the culture-related concepts and constructs such as time, modesty, politeness, and respect, discussing the culture-dependent differences in conceptualization and their reflection in particular language forms and linguistic devices.

textbooks from the 90s: *History Textbooks and the Wars in Asia* Gi-Wook Shin, Daniel C. Sneider, 2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions, especially in the realms of culture and economy. Still, the region cannot escape from the burden of history. This book examines the formation of historical memory in four Northeast Asian societies (China, Japan, South Korea, and Taiwan) and the United States focusing on the period from the beginning of the Sino-Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951. The contributors analyse the recent efforts of Korean, Japanese, and Chinese scholars to write a 'common history' of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements. In doing so, they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided, and often conflicting, historical memories. The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives. Through uncovering the existence of different master narratives, it is hoped, citizens will develop a more self-critical, self-reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self- and mutual understanding and eventual historical reconciliation in the region. This book will be essential reading for students and scholars of Asian history, Asian education and international relations in East Asia.

textbooks from the 90s: *The Baby Matrix* Laura Carroll, 2012-05-17 In the movie *The Matrix*, the character Morpheus offers two pills to Neo—if he takes the blue pill, he will go on with life as he has before, believing what he has always believed. If he takes the red pill, he will find out what the “matrix” really is, and many of his earlier beliefs will be shattered. When it comes to taking a hard look at a specific set of beliefs about parenthood and reproduction that has driven our society for generations, *The Baby Matrix* is the red pill. *The Baby Matrix* looks at long-held beliefs about parenthood and reproduction, and unravels why we believe what we believe. It lays out: We commonly think our desire to have children boils down to our biological wiring, but author Laura Carroll says it's much more than that. Unlike other books on parenthood, *The Baby Matrix: Why Freeing Our Minds From Outmoded Thinking About Parenthood & Reproduction Will Create a Better World* takes a serious look at powerful social and cultural influences that drive the desire for the parenthood experience, and lays out why we need to be very aware of these influences to make the most informed decisions about parenthood. -the historical origins of beliefs about parenthood and reproduction -why many of these beliefs no longer work for society or were never true in the first place -why we continue to believe them anyway -the prices society pays as a result *The Baby Matrix* shows us how we got here, brings to light what is true, which includes knowing about the powerful influence of “pronatalism,” and explains why society can no longer afford to leave pronatalism unquestioned. “This is not a book about convincing people not to have children,” says Carroll. “I

want people to be very aware of the long-held social and cultural pressures, and be able to free themselves from those pressures when making parenthood choices. This will result in more people making the best decisions for themselves, will foster a society in which those who are best suited to become parents are the ones who have children and one that knows what it means to bring a child into the world today." This book will make you examine your own intentions and beliefs, will rile you, and might just change your mind. Whether you are already a parent, want to become a parent, are still making up your mind, or know you don't want children, you'll never think about parenthood in the same way. The Baby Matrix is a must-read for anyone interested in psychology, sociology, anthropology, parenting issues, environmentalism, and social justice. But most of all, it's for anyone, parent or not, who reveres the truth and wants the best for themselves, their families, and our world.

textbooks from the 90s: Designing History in East Asian Textbooks Gotelind Mueller, 2011-02-01 This book analyses the efforts throughout East Asia to deploy education for purposes of political socialization, and in particular in order to shape notions of identity. The chapters also examine the trend of 'common textbook initiatives', which have recently emerged in East Asia with the aim of helping to defuse tensions arguably fuelled by existing practices of mutual (mis)representation. These are analysed in relation to the East Asian political context, and compared with previous and ongoing endeavours in other parts of the world, particularly Europe, which have been keenly observed by East Asian practitioners. Written by a group of international education experts, chapters discuss the enduring focus on the role of curricula in inculcating homogenous visions of the national self, and indeed homogenized visions of significant 'others'. Including contributions from scholars and curriculum developers involved personally in the writing of national and multi-national history textbooks this book will be of interest to students and scholars of Asian education, Asian history and comparative education studies. Gotelind Müller is Professor of Chinese Studies, University of Heidelberg, Germany

textbooks from the 90s: The Nineties Chuck Klosterman, 2023-01-31 An instant New York Times bestseller! "Informative, endlessly entertaining."—BuzzFeed "Generation X's definitive chronicler of culture."—GQ From the author of *But What If We're Wrong* comes an insightful, funny reckoning with a pivotal decade It was long ago, but not as long as it seems: The Berlin Wall fell and the Twin Towers collapsed. In between, one presidential election was allegedly decided by Ross Perot while another was plausibly decided by Ralph Nader. Landlines fell to cell phones, the internet exploded, and pop culture accelerated without the aid of technology that remembered everything. It was the last era with a real mainstream to either identify with or oppose. The '90s brought about a revolution in the human condition, and a shift in consciousness, that we're still struggling to understand. Happily, Chuck Klosterman is more than up to the job. In *The Nineties*, Klosterman dissects the film, the music, the sports, the TV, the pre-9/11 politics, the changes regarding race and class and sexuality, the yin/yang of Oprah and Alan Greenspan, and (almost) everything else. The result is a multidimensional masterpiece, a work of synthesis so smart and delightful that future historians might well refer to this entire period as Klostermanian.

textbooks from the 90s: Discourse Markers in Native and Non-native English Discourse

Simone Müller, 2005-01-01 While discourse markers have been examined in some detail, little is known about their usage by non-native speakers. This book provides valuable insights into the functions of four discourse markers (so, well, you know and like) in native and non-native English discourse, adding to both discourse marker literature and to studies in the pragmatics of learner language. It presents a thorough analysis on the basis of a substantial parallel corpus of spoken language. In this corpus, American students who are native speakers of English and German non-native speakers of English retell and discuss a silent movie. Each of the main chapters of the book is dedicated to one discourse marker, giving a detailed analysis of the functions this discourse marker fulfills in the corpus and a quantitative comparison between the two speaker groups. The book also develops a two-level model of discourse marker functions comprising a textual and an interactional level.

textbooks from the 90s: Propaganda, Communication and Empire Sumanth Inukonda, Oliver

Boyd-Barrett, Lara Martin Lengel, 2025-04-22 This volume interrogates the mediatized politics of western intervention in Afghanistan, to gain a deeper understanding of the occupation within the broader transition toward a multipolar global order. Accurate histories of western interventions and regional realities are often obscured or even eclipsed in the accounts of western mainstream media, which, if anything, tend to rue the withdrawals and lionize the suffering of returning troops. This volume investigates the state's role in the dark underbelly of the shortsighted interventionist media narrative, as well as the dehumanizing portrayals of people living in the Afghanistan-Pakistan region. In its opening section, the book critically evaluates the narrative of the Global War on Terror, as well as the wars launched after 9/11 that destabilized the Middle East. The chapters in the following section contextualize developments in Afghanistan with a historical framework that will problematize linear narratives that are mobilized in support of interventions. The chapters in the final section re-present specific aspects of the geopolitical and humanitarian consequences that have eluded mainstream media workers, including journalists and Hollywood moviemakers. This book will be of interest to students of propaganda studies, media and communication studies, US foreign policy, and international relations.

textbooks from the 90s: The Philanthropy Reader Michael Moody, Beth Breeze, 2016-08-25

Philanthropy is both timeless and timely. Ancient Romans, Medieval aristocrats, and Victorian industrialists engaged in philanthropy, as do modern-day Chinese billionaires, South African activists, and Brazilian nuns. Today, philanthropic practice is evolving faster than ever before, with donors giving their time, talents, and social capital in creative new ways and in combination with

their financial resources. These developments are generating complex new debates and adding new twists to enduring questions, from why be philanthropic? to what does it mean to do philanthropy 'better'? Addressing such questions requires greater understanding of the contested purpose and diverse practice of philanthropy. With an international and interdisciplinary focus, *The Philanthropy Reader* serves as a one-stop resource that brings together essential and engaging extracts from key texts and major thinkers, and frames these in a way that captures the historical development, core concepts, perennial debates, global reach, and recent trends of this field. The book includes almost 100 seminal and illuminating writings about philanthropy, equipping readers with the guiding material they need to better grasp such a crucial yet complex and evolving topic. Additional readings and discussion questions also accompany the text as online supplements. This text will be essential reading for students on philanthropy courses worldwide, and will also be of interest to anyone active in the philanthropic and nonprofit sectors — from donors and grantmakers, to advisers and fundraisers.

textbooks from the 90s: *Dynamic Programming and Optimal Control* Dimitri Bertsekas, 2012 This is the leading and most up-to-date textbook on the far-ranging algorithmic methodology of Dynamic Programming, which can be used for optimal control, Markovian decision problems, planning and sequential decision making under uncertainty, and discrete/combinatorial optimization. The treatment focuses on basic unifying themes, and conceptual foundations. It illustrates the versatility, power, and generality of the method with many examples and applications from engineering, operations research, and other fields. It also addresses extensively the practical application of the methodology, possibly through the use of approximations, and provides an extensive treatment of the far-reaching methodology of Neuro-Dynamic Programming/Reinforcement Learning. Among its special features, the book 1) provides a unifying framework for sequential decision making, 2) treats simultaneously deterministic and stochastic control problems popular in modern control theory and Markovian decision popular in operations research, 3) develops the theory of deterministic optimal control problems including the Pontryagin Minimum Principle, 4) introduces recent suboptimal control and simulation-based approximation techniques (neuro-dynamic programming), which allow the practical application of dynamic programming to complex problems that involve the dual curse of large dimension and lack of an accurate mathematical model, 5) provides a comprehensive treatment of infinite horizon problems in the second volume, and an introductory treatment in the first volume The electronic version of the book includes 29 theoretical problems, with high-quality solutions, which enhance the range of coverage of the book.
