Understanding SNHU Textbook Requirements

When enrolling in courses at Southern New Hampshire University, students must be aware of the specific textbook requirements for each class. These requirements are typically outlined in the course syllabus provided by instructors. Understanding these requirements is crucial for students to ensure they have the necessary materials to succeed.

Course Syllabi and Textbook Listings

Course syllabi serve as a roadmap for students, detailing the topics to be covered, assignments, and required readings. Most instructors will specify the textbooks needed for the course, including the title, edition, and ISBN number. Familiarizing oneself with this information helps students procure the correct materials without delay.

Importance of Timely Acquisition

Acquiring textbooks promptly is essential for academic success. Delays in obtaining required materials can hinder a student's ability to complete assignments and participate in discussions. Therefore, students are encouraged to review their syllabi as soon as they are available and seek out their textbooks early in the semester.

Where to Find SNHU Textbooks

Finding SNHU textbooks is a straightforward process, thanks to various resources available to students. Whether choosing to purchase or rent textbooks, students have multiple options to explore.

SNHU Bookstore

The official SNHU bookstore is a primary source for students seeking textbooks. It offers both new and used textbooks, as well as rental options. Purchasing from the university's bookstore ensures that students receive the correct materials as specified in their course syllabi.

Online Retailers

In addition to the SNHU bookstore, online retailers such as Amazon, Chegg, and eBay provide a wide selection of textbooks. These platforms often offer competitive prices, making them a popular choice for cost-conscious students. When purchasing online, students should verify that they are selecting the correct edition of the textbook required for their course.

Peer-to-Peer Marketplaces

Students can also explore peer-to-peer marketplaces, such as Facebook groups or campus bulletin boards, to buy or sell used textbooks. This option can lead to significant savings and allows students to recycle materials within the SNHU community.

Types of SNHU Textbooks

At SNHU, students will encounter various types of textbooks that cater to different learning preferences and course requirements. Understanding these options can help students make

informed decisions regarding their textbook purchases.

Traditional Print Textbooks

Traditional print textbooks are the most common type and are often required for courses across multiple disciplines. These books provide a tangible resource for students and are particularly beneficial for those who prefer reading physical materials.

Digital Textbooks

Digital textbooks have gained popularity due to their convenience and accessibility. Many courses at SNHU offer e-textbooks, which can be accessed on various devices, including laptops, tablets, and smartphones. Digital textbooks often come with interactive features such as search functions and hyperlinks, enhancing the learning experience.

Open Educational Resources (OER)

Some courses may utilize Open Educational Resources (OER), which are freely accessible and openly licensed materials. OER can include textbooks, videos, and other educational resources that can be used without incurring costs. This option aligns with SNHU's commitment to making education more affordable and accessible.

Managing Textbook Costs

Textbook costs can significantly impact a student's budget. Therefore, managing these expenses is crucial for ensuring financial stability while pursuing education at SNHU. Here are some effective strategies for managing textbook costs.

Renting Textbooks

Renting textbooks is an excellent way to save money, especially for students who may not need a book for future courses. The SNHU bookstore and various online retailers offer rental options, allowing students to return the books at the end of the semester.

Buying Used Textbooks

Purchasing used textbooks can lead to substantial savings. Students can find used

textbooks at the SNHU bookstore, online platforms, or through peer-to-peer sales. Always check the condition of the used book to ensure that it is still usable.

Utilizing Library Resources

The SNHU library is a valuable resource for students seeking textbooks. The library may have copies of required textbooks available for loan, allowing students to access materials without the burden of purchase. It is advisable to inquire about textbook availability early in the semester.

- **Highlighting and Note-Taking:** Many students prefer the traditional method of highlighting and making notes in the margins, which can enhance retention.

Resources for SNHU Students

SNHU provides a wealth of resources to assist students in navigating their textbook needs. These resources can help students save money, find the right materials, and enhance their overall academic experience.

Academic Advising

Academic advisors can provide guidance on textbook requirements for specific courses and recommend resources for obtaining them. They can also assist with strategies for managing textbook costs effectively.

Library Services

The SNHU library offers a variety of services, including textbook loans, research assistance, and access to digital resources. Students should take advantage of these services to supplement their learning materials.

Financial Aid Resources

snhu textbooks: Pursuing Quality, Access, and Affordability Stephen C. Ehrmann, 2023-07-03 Whether they recognize it or not, virtually all colleges and universities face three Grand Challenges: Improve the learning outcomes of a higher education: A large majority of college graduates are weak in capabilities that faculty and employers both see as crucial. Extend more equitable access to degrees: Too often, students from underserved groups and poor households either don't enter college or else drop out without a degree. The latter group may be worse off economically than if they'd never attempted college. Make academic programs more affordable (in money and time) for students and other important stakeholder groups: Many potential students believe they lack the money or time needed for academic success. Many faculty believe they don't have time to make their courses and degree programs more effective. Many institutions believe they can't afford to improve outcomes. These challenges are global. But, in a higher education system such as that in the United States, the primary response must be institutional. This book analyzes how, over the years, six pioneering colleges and universities have begun to make visible, cumulative progress on all three fronts.

snhu textbooks: Broken Paul LeBlanc, 2022-09-27 Many of the systems built to serve people instead do more harm than good. In *Broken*, Dr. Paul LeBlanc, president of Southern New Hampshire University, draws on his experience working in one such system—education—to reconnect us to the human facets of serving people. In doing so, he charts a course for rebuilding and reinhabiting better systems across education, healthcare, criminal justice, government, and

more. The United States spends enormous sums on helping people—\$3.8 trillion on healthcare, \$182 billion on prisons, and \$604 billion on higher education—and yet these systems routinely fail us. When we seek to improve how they function, our efforts focus on policy debates, technical solutions, funding, and data. But if these systems are to truly improve, we have to start with the human values that fuel decision making. *Broken* explores the deeply human dimensions we must consider—aspiring, discovering, mattering—if we want to rebuild the policies, technologies, processes, and, most importantly, the heart we use to serve people. Over the course of 25 years as a college and university president and higher education innovator, Paul LeBlanc, PhD, has encountered innumerable wonderful people who want to do the right thing for students but whose efforts cannot overcome the shortcomings of the system. Now, he shares what he’s learned, and continues to learn, about the opportunities and necessity to put humanity and care at the center of all our systems. With *Broken*, LeBlanc outlines the distinctly human questions that education—and all systems that serve—must start asking to reframe what is broken in order to make lasting repairs and to better care for those they serve.

snhu textbooks: Inclusive Access and Open Educational Resources E-text Programs in Higher Education Tracy A. Hurley, 2020-06-12 This volume takes a comprehensive and broad look at e-text programs across a wide spectrum of programs, institutions, and policies in three parts. The first part showcases several policy papers to contextualize the discussion and highlight the reasons for IAE programs’ structure and the obstacles they face for implementation. The second part is an in-depth exploration of various case studies that provide a detailed description of IAE programs, including information about program elements, program structure, program size, and insights into how programs are operationalized, and their shortcomings and benefits to students and stakeholders. The final part is a selection of research papers that offer evidence-based support for the adoption of IAE programs in terms of student success, access, engagement, costs, and a variety of other student and institutional outcomes. There are approximately 300 institutions of higher education that currently have some form of Inclusive Access or Open Educational Resources E-text (IAE) program in the United States, but there is little scholarship that engages on the topic of assessing these programs’ effect on student success. The results of the research studies included in this volume will inform faculty, administrators, and policy-makers who seek to support the development, adoption, and implementation of IAE programs based on their potential positive effects on student success and other outcomes.

To date, school leaders and teachers have not been well served by explicit resources for middle grades education that focus on aspects of the health and well-being of young adolescent learners to support the planning of curriculum and teaching and to support teachers and leaders working with this age-group. The purpose of this research - based volume is to fill that gap and to enable school leaders, teachers, academics, and teacher candidates to develop successfully an understanding of the health and well-being aspects of young adolescent learners and provide them with the necessary tools and information to address the health and well-being needs of young adolescent learners.

snhu textbooks: Essential Computational Thinking Ricky J. Sethi, 2020-06-17 Essential Computational Thinking: Computer Science from Scratch helps students build a theoretical and practical foundation for learning computer science. Rooted in fundamental science, this text defines elementary ideas including data and information, quantifies these ideas mathematically, and, through key concepts in physics and computation, demonstrates the relationship between computer science and the universe itself. In Part I, students explore the theoretical underpinnings of computer science in a wide-ranging manner. Readers receive a robust overview of essential computational theories and programming ideas, as well as topics that examine the mathematical and physical foundations of computer science. Part 2 presents the basics of computation and underscores programming as an invaluable tool in the discipline. Students can apply their newfound knowledge and begin writing substantial programs immediately. Finally, Part 3 explores more sophisticated computational ideas, including object-oriented programming, databases, data science, and some of the underlying principles of machine learning. Essential Computational Thinking is an ideal text for a firmly technical CS0 course in computer science. It is also a valuable resource for highly-motivated non-computer science majors at the undergraduate or graduate level who are interested in learning more about the discipline for either professional or personal development.
