world language textbooks: Ideology and Hegemony of English Foreign Language

Textbooks Ömer Gökhan Ulum, Dinçay Köksal, 2020-01-27 This volume investigates ideological and hegemonic practices in globally and locally written English as a Foreign Language (EFL) textbooks, and explores whether these textbooks reflect the values, beliefs and norms of the native-speaker society by examining their ideological components and the hegemonic practices by means of which the source society or state seeks to influence learners of the language. It also attempts to clarify EFL teachers' and students' views on the underlying ideology and hegemonic practices in globally and locally written EFL textbooks. Studies on the relationship between ideology, hegemony and textbooks in applied linguistics have become more prevalent in recent decades, as the emergence of critical theory, critical pedagogy, and critical thinking skills from the 1920s onwards has led scholars to adopt a more critical perspective towards EFL textbooks, especially with regard to elements of ideology and hegemony. These two terms encompass a plethora of components, ranging from nationalism to religion. At the same time, the importance of metanarratives originating from the tenets of modernism has declined from the 1960s onwards, the assumption being that the world has entered a new age called postmodernism and post-structuralism that emphasizes the role of individuals and rejects efforts to reinforce post-colonialism, the effects of which can be seen in EFL textbooks. Accordingly, taking the elements of ideology and hegemony into account remains a vital aspect in the analysis of EFL textbooks.

world language textbooks: *Teaching and Learning in a Digital World* Michael E. Auer, David Guralnick, Istvan Simonics, 2018-02-09 This book gathers the Proceedings of the 20th International Conference on Interactive Collaborative Learning (ICL2017), held in Budapest, Hungary on 27-29 September 2017. The authors are currently witnessing a significant

transformation in the development of education. The impact of globalisation on all areas of human life, the exponential acceleration of technological developments and global markets, and the need for flexibility and agility are essential and challenging elements of this process that have to be tackled in general, but especially in engineering education. To face these current real-world challenges, higher education has to find innovative ways to quickly respond to them. Since its inception in 1998, this conference has been devoted to new approaches in learning with a focus on collaborative learning. Today the ICL conferences offer a forum for exchange concerning relevant trends and research results, and for sharing practical experience gained while developing and testing elements of new technologies and pedagogies in the learning context.

Each chapter confronts the hold of colonialism and imperialism that inform and shape the relationship between foreign language education and literary studies by asserting that a critical approach to applied linguistics is just as important a tool for FL/ESL/EFL educators as literature or linguistic theory.

world language textbooks: Words of the World Abram De Swaan, 2013-05-29 This bold and accessible study of human languages and communication explores issues which are at the forefront of today's globalized society. The human species is divided into more than five thousand language groups that do not understand each other. And yet these groups constitute one coherent world language system, connected by multilingual speakers in a surprisingly powerful way. The chances of a language thriving depend on its position in the system. There are thousands of small, peripheral languages, each connected to one of a hundred central languages. The entire system is held together by one global language: English. A language is a 'hypercollective' good: the more speakers it has, the higher its communication value for each one of them. Thus, when people think that a language is gaining new speakers, that in itself is a reason for them to want to learn it too. That is why, in an age of globalization, only a few languages remain for transnational communication and these often prevail even in national societies. This important book discusses a number of specific constellations in detail: India, Indonesia, Sub-Saharan Africa, South Africa and the European Union. De Swaan concludes by providing a sober but illuminating view of language policy in multilingual societies. This book will be essential reading for those studying sociology, communication studies and linguistics.

world language textbooks: Critical Reflection and the Foreign Language Classroom

Terry Osborn, 2021-05-01 Twenty years ago, this book introduced pre-service and in-service foreign language teachers to the basic concepts of critical educational study as applied to foreign language education in the United States. Since its initial publication, teachers now commonly known as world language educators are better prepared to understand issues of power in relation to, for example, language variety, language status, and language education. Indeed, much recent attention has been focused on critical approaches to language education including teaching for social justice. The author addresses issues such as the supposed failure of foreign language education, the educational filter role played by language classes, the concept of foreignness as seen in national standards, language curricula and textbooks, and the implications of these issues in terms of power relationships and cultural mediation both in and out of the classroom. The reader is encouraged to analyze the forms of cultural struggle that can be found within the world language classrooms of the United States including the likely impact those struggles have on members of the dominant and subordinate cultures. Two decades later, critical reflection continues to require these skills.
