top hat textbooks: Social Class Supports Georgianna Martin, Sonja Ardoin, 2023-07-03 Historically, higher education was designed for a narrow pool of privileged students. Despite national, state and institutional policies developed over time to improve access, higher education has only lately begun to address how its unexamined assumptions, practices and climate create barriers for poor and working class populations and lead to significant disparities in degree completion across social classes. The data shows that higher education substantially fails to provide poor and working class students with the necessary support to achieve the social mobility and success comparable to the attainments of their middle and upper class peers. This book presents a comprehensive range of strategies that provide the fundamental supports that poor and working-class students need to succeed while at the same time dismantling the inequitable barriers that make college difficult to navigate. Drawing on the concept of the student-ready college, and on emerging research and practices that colleges and universities can use to explore campus-specific social class issues and identify barriers, this book provides examples of support programs and services across the field of higher education - at both two- and four-year, public and private institutions - that cover: Access supports. Examples and recommendations for how institutions can assist students as they make decisions about applications and admission. Basic needs supports. Covering housing and food security, necessary clothing, sense of belonging through co-curricular

engagement, and mental health resources. Academic and learning supports. Describes courses and academic programs to promote full engagement among poor and working class students. Advising supports. Illustrates advising that acknowledges poor and working class students' identities, and recommends continued training for both staff and faculty advisors. Supports for specific populations at the intersection of social class with other identities, such as Students of Color, foster youth, LGBTQ, and doctoral students. Gaining support through external partnerships with social services, business entities, and fundraising. This book is addressed to administrators, educators and student affairs personnel, urging them to make the institutional commitment to enhance the college experience for poor and working class students who not only represent a substantial proportion of college students today, but constitute a significant future demographic.

top hat textbooks: Inclusive Access and Open Educational Resources E-text Programs in Higher Education Tracy A. Hurley, 2020-06-12 This volume takes a comprehensive and broad look at e-text programs across a wide spectrum of programs, institutions, and policies in three parts. The first part showcases several policy papers to contextualize the discussion and highlight the reasons for IAE programs' structure and the obstacles they face for implementation. The second part is an in-depth exploration of various case studies that provide a detailed description of IAE programs, including information about program elements, program structure, program size, and insights into how programs are operationalized, and their shortcomings and benefits to students and stakeholders. The final part is a selection of research papers that offer evidence-based support for the adoption of IAE programs in terms of student success, access, engagement, costs, and a variety of other student and institutional outcomes. There are approximately 300 institutions of higher education that currently have some form of Inclusive Access or Open Educational Resources E-text (IAE) program in the United States, but there is little scholarship that engages on the topic of assessing these programs' effect on student success. The results of the research studies included in this volume will inform faculty, administrators, and policy-makers who seek to support the development, adoption, and implementation of IAE programs based on their potential positive effects on student success and other outcomes.

top hat textbooks: The Building Envelope Alan J Brookes, Chris Grech, 2013-11-06 The Building Envelope: Applications of New Technology Cladding provides an introduction to the state of the art in cladding systems. The buildings discussed include the Bandstand at Haarlem, Holland; Benthem and Crouwel's House at Almere, a town near Amsterdam, Holland; the Burrell Gallery in Glasgow, Scotland; Clarke Ascot House, Brisbane, Australia; the Conservatory at Kew, southwest London; and the Johnson and Johnson World Headquarters, New Brunswick, New Jersey. This book is intended to give at least some inspiration to designers wishing to improve their technical understanding of the newer building processes with which they are now involved and have the information available if they care to seek it.

top hat textbooks: The MX Book of New Sherlock Holmes Stories - Part X David Marcum, 2021-01-18 Once again, the adventures of Sherlock Holmes and Dr. Watson continue in this acclaimed anthology series, with thirty-seven new tales presented in two companion volumes - more Holmes than could fit into one book! Part X: 2018 Annual (1896-1916) features contributions by: Mike Hogan, Kelvin Jones, Jim French, Arthur Hall, Steve Ehrman, Greg Hatcher, Jayantika Ganguly, Paul Freeman, Dick Gillman, Maurice Barkley, Daniel D. Victor, Martin Rosenstock, Peter Coe Verbica, Hugh Ashton, Will Murray, Robert Perret, Thaddeus Tuffentsamer, G.L. Schulze, Tim Symonds, and a poem by Derrick Belanger... and Forewords in both volumes by Nicholas Meyer, Roger Johnson, and David Marcum. In 2015, The MX Book of New Sherlock Holmes Stories was first published, a huge three-book set featuring over sixty new traditional Holmes exploits, all set within the correct time period. Soon, the demand for even more traditional Holmes adventures led to further volumes. The next year brought Part IV: 2016 Annual, and then Part V: Christmas Adventures. In spring 2017 there was Part VI: 2017 Annual, and that fall revealed the massive two-volume set, Parts VII and VIII: Eliminate the Impossible. Now we present another two simultaneous volumes, Parts IX and X: 2018 Annual (1879-1895) and (1896-1916). There can be no argument that Sherlock Holmes is one of the most famous and recognizable figures in the world. There were only sixty narratives brought to us by the original Literary Agent, Sir Arthur Conan Doyle. Clearly that is not enough. Watson once wrote that he kept his unpublished cases in his old Tin Dispatch Box. Now, with the publication of these latest volumes, that box has again been explored by some of today's best Sherlockian writers, all of whom are donating their royalties from these anthologies toward the restoration of Undershaw, one of Sir Arthur Conan Doyle's houses, and the location where The Hound of the Baskervilles and many later Holmes stories were completed. Climb the seventeen steps to the sitting room at 221b Baker Street. Sherlock Holmes and Doctor Watson are waiting.... The game is afoot!

top hat textbooks: Essays in Physics Geoffrey Brooker, 2021-07-16 Each of this book's 32 essays discusses a chosen topic, at a level that is generally within that of a four-year degree course in Physics. The essays supplement (indeed sometimes correct) treatments usually given, or supplies reasoning that tends to fall through the cracks. The author uses his life long experience of tutorial teaching at Oxford to know what topics often need such discussion, for clarification, or for avoidance of common confusions. The book contains accounts of even-standard topics, accounts that offer an

unusual emphasis, or a fresh insight, or more than customary rigour, or a cross-link to apparently unrelated material. The student (and their teachers) who really wants to understand physics will find this book indispensable. Often the outcome of tutorial discussion has been an understanding that lies a little to the side of what is presented in standard texts. Such understanding is presented here in the essays. The topics covered are diverse and have something useful to say across most areas of a physics degree.
