electronic workbooks: Electronic Books and ePublishing Harold Henke, 2012-12-06 Since the advent of personal computers, experts have predicted the paperless office, the rise of the electronic book, and the mass communication effect of the World Wide Web as the beginning of the end of the book. However, trends show that sales of paper increased with sales of computer networks - people have been trained to read books, and are more familiar with the act of picking up a book and reading than looking at chunks of information. There are many publishing applications that enable you to create sophisticated electronic books and distribute your electronic books to your readers via the World Wide Web or electronic book reader with ease not seen before in the publishing industry. Electronic Books and ePublishing shows you how to design electronic books using the book metaphor. The information presented in this book is a culmination of the author's experience as an author and researcher, and includes valuable information gathered through user surveys, user focus groups, usability testing and participation in industry groups and standards organisations.

electronic workbooks: *Reading in the Digital Age: Young Children's Experiences with E-books* Ji Eun Kim, Brenna Hassinger-Das, 2019-07-23 This edited book focuses on affordances and limitations of e-books for early language and literacy, features and design of e-books for early language and literacy, print versus e-books in early language and literacy development, and uses of and guidelines for how to use e-books in school and home literacy practices. Uniquely, this book includes critical reviews of diverse aspects of e-books (e.g., features) and e-book uses (e.g., independent reading) for early literacy as well as multiple examinations of e-books in home and school contexts using a variety of research methods and/or theoretical frames. The studies of children's engagement with diverse types of e-books in different social contexts provide readers with a contemporary and comprehensive understanding of this topic. Research has demonstrated that ever-increasing numbers of children use digital devices as part of their daily routine. Yet, despite children's frequent use of e-books from an early age, there is a limited understanding regarding how those e-books are actually being used at home and school. As more e-books become available, it is important to examine the educational benefits and limitations of different types of e-books for children. So far, studies on the topic have presented inconsistent findings regarding potential benefits and limitations of e-books for early literacy activities (e.g., independent reading, shared reading). The studies in this book aim to fill such gaps in the literature.

electronic workbooks: E-books in Libraries Kate Price, Virginia Havergal, 2011 Despite the fact that e-books have been in existence for decades in various guises and added to library collections for several years now, there has been a noticeable lack of published manuals on the subject. This is doubtless owing to the rapidly evolving nature of the market. There is now a plethora of different types of digital object that may be termed 'e-books' and a bewildering number of business and access models to match. Moreover the pace of change shows no sign of abating, but there is an increasing amount of popular interest in e-books, and what is needed is practical information to assist library and information professionals managing collections of e-books and doing their best to inform their users right now. The book is divided into five parts: The production and distribution of e-books Planning and developing an e-book collection Delivering e-books to library readers Engaging readers with e-books The future of e-books. Virginia Havergal BA(Hons) MSc MEd FIFL is a Learning Centres and e-Resources Manager for Petroc, a further education college in Devon. Prior to this role she was an e-Learning Advisor with JISC, with a particular focus on Learning Resources. Kate Price BA(Hons) MA MCLIP is Head of E-Strategy and Resources at the University of Surrey.

Specific attention is paid to the ways in which digital books can support individual children's strengths and difficulties, digital literacies, language and communication skills. Part II explores digital books created by children, their caregivers, teachers and librarians, and Kucirkova also offers insights into how smart toys, tangibles and augmented/virtual reality tools can enrich children's reading for pleasure. *How and Why to Read and Create Children's Digital Books* is of interest to an international readership ranging from trainee or established teachers to MA level students and researchers, as well as designers, librarians and publishers. electronic workbooks: Research and Advanced Technology for Digital Libraries Jose Borbinha, Thomas Baker, 2003-06-26 ECDL2000, the Fourth European Conference on Research and Advanced Technology for Digital Libraries, is being held this year in Lisbon, Portugal, following previous events in Pisa (1997), Heraklion (1998), and Paris (1999). One major goal of the ECDL conference series has been to draw information professionals, stakeholders, and user communities from both the research world and from industry into a discussion of the alternative technologies, policies, and scenarios for global digital libraries. The success of previous conferences makes them a hard act to follow. The field of digital libraries draws on a truly diverse set of scientific and technical disciplines. In the past three years, moreover, global cooperation on research and development has emerged as an urgent priority, particularly in the new European Framework Programme and in the Digital Library Initiative in the United States. Because of this diversity, the field is perhaps still struggling for an identity. But this struggle for identity is itself a source of energy and creativity. Participants in this field feel themselves to be part of a special community, with special people. Each of us may claim expertise on a narrow issue, with specific projects, but the choices we make and the methods we use in local solutions can have unforeseen impacts within a growing universe of interconnected resources.
