free grade r workbooks: *Preparing Antiracist Teachers* Christine Montecillo Leider, Christina L. Dobbs, Erin Nerlino, 2024-12-27 *Preparing Antiracist Teachers: Fostering Antiracism and Equity in Teacher Preparation* examines multiple strategies and theories for developing antiracist attitudes and actions in teachers and teacher candidates. This textbook uses critical consciousness as a framework to help practitioners and scholars to facilitate the process of doing antiracist work. The book is divided into three sections, with Part 1 focusing on critical reflection, which refers to a social analysis and moral rejection of societal inequities, such as social, economic, racial/ethnic, and gender inequities, that constrain well-being and human agency. It shows that those who are critically reflective view social problems and inequalities in systemic terms and are therefore better able to address them. Part 2 examines sociopolitical efficacy, which refers to the perceived capacity to effect social and political change by individual and/or collective activism. Part 3 centers on critical action, that is, individual or collective action taken to change aspects of society, such as institutional policies and practices, that are perceived to be unjust. This is a broad view of activism that can include participation in activities such as voting, community organizing, and peaceful protests. Showcasing both USA-based and international case studies, *Preparing Antiracist Teachers* will support teacher educators in their work by presenting nuanced and important means of teacher education for antiracism and critical consciousness. It will also benefit those studying

related courses, including Teacher Education, Social Justice Education, and Multicultural Education.

free grade r workbooks: Free School Teaching Kristan Accles Morrison, 2012-02-01 Free School Teaching is the personal and professional journey of one teacher within the American educational system. Faced with mounting frustrations in her own traditional, middle school classroom and having little success in resolving them, Kristan Accles Morrison decided to seek out answers, first by immersing herself in the academic literature of critical education theory and then by turning to the field. While the literature on progressive education gave her hope that things could be different and better for students locked into America's traditional education system, she wanted to find a firsthand example of how these ideas played out in practice. Morrison found a radical free school in Albany, New York, that embodied the ideas found in the literature, and over a period of three months she observed and documented differences between alternative and traditional schools. In trying to reconcile the gap between those systems, Morrison details the lessons she learned about teachers, students, curriculum, and the entire conception of why we educate our children.
