spectrum workbooks pdf: Reflections on Leadership and Institutions in Africa Kenneth Kalu, Toyin Falola, 2020-05-22 This book contains different reflections on leadership and institutions in Africa. Drawing from different ideological and methodological orientations, the book highlights how leadership and institutions have shaped and continue to shape the trajectory of Africa's political and economic development. The book explores different epochs in Africa's history, from the era of colonialism to the period of nationalist movements, and up to post-colonial Africa. Essays in the volume engage with major actors and important institutions that defined each era. By presenting various reflections and representations of leadership and institutions in Africa, this book attempts to make the connection between leadership and institutions on the one hand, and between these variables and Africa's development on the other. Similar to most studies on Africa's political economy, the book considers the role of external forces whether operationalized through direct interventions as was the case during the colonial era, or through subtle imposition of policies as has been the new model in post-colonial times. Drawing from these lenses, issues around Africa's dependency on external interventions, neo-colonialism, neoliberalism, and disregard for Africa's culture are explored and contextualized within the framework of leadership and institutions.

spectrum workbooks pdf: International Security and Peacebuilding Abu Bakarr Bah, 2017-01-30 The end of the Cold War was to usher in an era of peace based on flourishing democracies and free market economies worldwide. Instead, new wars, including the war on terrorism, have threatened international, regional, and individual security and sparked a major refugee crisis. This volume of essays on international humanitarian interventions focuses on what interests are promoted through these interventions and how efforts to build liberal democracies are carried out in failing states. Focusing on Africa, the Middle East, and Europe, an international group of contributors shows that best practices of protection and international state-building have not been applied uniformly. Together the essays provide a theoretical and empirical critique of global liberal governance and, as they note challenges to regional and international cooperation, they reveal that global liberal governance may threaten fragile governments and endanger human security at all levels.

spectrum workbooks pdf: *The Politics of Public Sector Performance* Michael Roll, 2014-01-10 It is widely believed that the state in developing countries is weak. The public sector, in particular, is often regarded as corrupt and dysfunctional. This book provides an urgently needed corrective to such overgeneralized notions of bad governance in the developing world. It examines the variation in state capacity by looking at a particularly paradoxical and frequently overlooked phenomenon: effective public organizations or 'pockets of effectiveness' in developing countries. Why do these pockets exist? How do they emerge and survive in hostile environments? And do they have the potential to trigger more comprehensive reforms and state-building? This book provides surprising answers to these questions, based on detailed case studies of exceptional public organizations and state-owned enterprises in Africa, Asia, the Caribbean, Latin America and the Middle East. The case studies are guided by a common analytical framework that is process-oriented and sensitive to the role of politics. The concluding comparative analysis develops a novel explanation for why some public organizations in the developing world beat the odds and turn into pockets of public sector performance and service delivery while most do not. This book will be of strong interest to students and scholars of political science, sociology, development, organizations, public administration, public policy and management.

spectrum workbooks pdf: Identity, Citizenship, and Political Conflict in Africa Edmond J. Keller, 2020-03-04 Engaging...detailed with current information about the situation in many African countries. — African Studies Quarterly Reflecting on the processes of nation-building and citizenship formation in Africa, Edmond J. Keller believes that although some deep parochial identities have eroded, they have not disappeared—and may be more assertive than previously thought, especially in instances of political conflict. Keller reconsiders how national identity has been understood in Africa and presents new approaches to identity politics, intergroup relations, state-society relations, and notions of national citizenship and citizenship rights. Focusing on Nigeria, Ethiopia, Cote d'Ivoire, Kenya, and Rwanda, he lays the foundation for a new understanding of political transition in contemporary Africa. This book would certainly be useful in graduate seminars on African politics, African history or ethnic politics. It is written in a clear, straightforward style that also makes it appropriate for use in advanced undergraduate classes. Keller also offers insights for policymakers and development practitioners who continue to grapple with the real-world consequences of citizenship conflicts.— Journal of Modern African Studies

spectrum workbooks pdf: *Quality Services in Academic Libraries* Felicia Etim, 2016-06-25

There is great consistency throughout these articles, research projects, management schemes, and standards, in and out of librarianship. Does the repetition suggest that the lessons have not yet been learned? Rather, it may be that there is no new silver bullet or shortcut for academic libraries. Experience reveals that one may have the formal process without getting good results and vice versa; the determining factor is whether the library staff, managers, and stakeholders define certain fundamental assumptions about the nature of the enterprise. All the above have in common the following underlying components: The careful definition of goals or of some kind of criteria against which success can be assessed A focus on meeting the needs of the users, as defined by the library and the institution Leadership: a commitment from the top, conscious efforts at ensuring communication, the provision of training and resources for the process of evaluation, the active support of a process to promote shared values The involvement of all levels of staff in goal setting, evaluation, and the improvement of processes and services Integrating a process of evaluation that is continuous and adaptive, whether that process is based on the framework of TQM, strategic planning, or another model

spectrum workbooks pdf: Terror Financing in Kashmir Abhinav Pandya, 2023-12-06 This

book analyses the layered and complex web of terror financing in Kashmir. It examines the role of multiple actors — including formal and informal, state and non-state, profit and non-profit, and local and international — to delineate the various strands of an intricate financial system. It shows how, over time, these sophisticated networks have largely remained elusive to Indian counter-terrorism agencies and the need for a specialised and focused effort to understand it. Drawing on interviews with confidential sources within terror networks, as well as inputs and intel from security agencies on the ground, the author lays the groundwork for a robust counter-terrorism strategy in Kashmir. This book will be a must read for professionals and researchers in security studies, military and strategic studies, politics and international relations, and South Asian studies.

spectrum workbooks pdf: Nigeria - Politics, Religion, Pentecostal-Charismatic Power and Challenges Akintayo Emmanuel, 2023-10-13 Nigeria presents an enthralling case study for understanding developing archetypes in interreligious encounters in Africa. The global community needs a cultural understanding and sensitivity for productive engagement with the Arab and non-Arab Muslim world. The Nigeria religious exigencies provide a requisite intelligence into the challenges facing a global community seeking to foster peace. Without a domain of tolerance, love, equity and justice, Nigeria will continually be immured by pessimism, parochialism, cynicism and mutual suspicion. Despite being the largest economy in Africa and the most populous Black country, Nigeria demonstrates incessantly an uncommon fault-line between Christianity and Islam. The significance of this goes beyond the borders of Nigeria but has become a global showcase anywhere the two religions exist contemporaneously. Nigeria is the nexus between west and central Africa. Rooted in the dusty Sahel of the north, the savannah plains, the rich rainforests of the Atlantic coast, the rocky hills of the West, and the oil-filled swamps of the Delta. Nigeria is the beauty, sound, vision, passion and the soul of the African continent. In Nigeria, the Nigeria Pentecostal-Charismatic Movement possesses a distinctive flair that demands a holistic understanding of the movement's historical, cultural, fundamental and religious dimensions in a multifarious religious landscape. The disquisition of the movement's political cognizance, identity, power, authority, theology, popular culture, ethics and missiological impact in northern Nigeria presents a fine embroidery of their trials, frustrations and challenges, but inveterate in faith, hope and love that opens up innovative panoramas of peaceful dialogical prospects and coexistence between Christians and Muslims in northern Nigeria. In Nigeria - Politics, Religion, Pentecostal-Charismatic Power and Challenges, Akintayo Emmanuel reconnoiters the complex missiological hindrances challenging the Nigerian Pentecostal-Charismatic Movement. Their contextual missional landslide disheveled with complicated paradoxes in the way the Christian majority have responded to Muslims in northern Nigeria is anatomized. The Nigerian Pentecostal-Charismatic Movement's puissance to solve some of Nigeria political, ideological, cultural and spiritual dimensions of crisis and sectarian violence is achievable if the movement can mitigate her missiological hindrances. The responses of Nigerian Pentecostal-Charismatic Movement to Nigeria's socio-political and ethno-religious complexities can construct a great future for the soul of Nigeria. They do not only have the capacity to provide the Christian alternatives to Nigeria's peculiarities, they can also stimulate Nigeria's deification among other nations by continuing to disentangle from unscrupulousness and atrociousness embedded within—a reproach and opprobrium to any people.

spectrum workbooks pdf: Civil Society Regionalization in Southern Africa Andréas Godsäter, 2016-05-12 This book investigates civil society regionalization in Southern Africa. The point of departure is the study of 'new regionalism', which refers to the wave of regional integration globally since the 1980s. However, whilst the current regionalism studies undoubtedly contributes to a deeper understanding of regional processes, important gaps remain, in particular the relatively scant emphasis given to civil society. This particularly relates to regions in the global South, including Southern Africa. The overarching aim of this book is therefore to analyse the dynamics of civil society regionalization in Southern Africa, both empirically and from a theoretical perspective, through analysing the cases of trade and HIV/AIDS. The study finds that CSOs can be more active in regional governance than has previously been conceptualized and are also highly active in terms of constructing regionalization through framing issues and, to a less extent, making identities 'regional'. Furthermore, the book enhances knowledge of the heterogeneous nature of civil society regionalization. Lastly, it is demonstrated that 'going regional' is only partly an autonomous process and also has to be understood as under the influence of the deeper statist and capitalist social structures marking the regional order in Southern Africa.

spectrum workbooks pdf: Infrastructures for Peace in Sub-Saharan Africa Mediel Hove, Geoff

Harris, 2019-06-14 Cultures of violence are characteristic of many countries in sub-Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual. And yet, the wide variations in levels of violence within and between countries show that it is not inevitable; rather, it is the result of choices made at individual, community and societal levels. This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace. Peace infrastructures vary hugely in sophistication and level. The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations, peace committees which serve local communities, peace education and peace club programmes in schools, mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non-government efforts in peacemaking and peacebuilding. The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace. 1. It is the only book available which documents the experience and potential of nonviolence in post-independence sub-Saharan Africa. 2. It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable. 3. It explains how strategic planning can be utilised, both to bring about change and to institutionalise it.
