urdu workbooks: *Serving Library Users from Asia* John Hickok, 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. While books on serving other target groups in libraries have been published (e.g., disabled, Latino, seniors, etc.), few books on serving library users of Asian heritage have been written. Thus the timely need for this book. Rather than a generalized overview of Asians as a whole, this book has 24 separate chapters—each on 24 specific Asian countries/cultures of East, Southeast, and South Asia—with a wealth of resources for understanding, interacting with, outreaching to, and serving library users of each culture. Resources include cultural guides (both print and online), language helps (with sample library vocabulary), Asian booksellers, nationwide cultural groups, professional literature, and more. Resources and suggestions are given for all three types of libraries—public, school, and academic—making this book valuable for all librarians. The demographics of each Asian culture (numbers and distribution)—plus history of immigration and international student enrollment—is also featured. As a bonus, each chapter spotlights a US public, school, and academic library providing model outreach to Asian library users. Additionally, this book provides a detailed description and analysis of libraries in each of the 24 Asian countries. The history, development, facilities, conditions, technology, classification systems, and more—of public, school, and academic libraries—are all discussed, with detailed documentation. Country conditions influencing libraries and library use are also described: literacy levels, reading cultures, languages and writing systems, educational systems, and more. Based on the author's 15 years of research and travels to Asia, this work is a must-have for all librarians.

With contributions from DH scholars and practitioners from across India, the United States, the United Kingdom, and more, this book will be a key intervention for scholars and researchers of

urdu workbooks: *The Social Space of Language* Farina Mir, 2010-07-04 This rich cultural history set in Punjab examines a little-studied body of popular literature to illustrate both the durability of a vernacular literary tradition and the limits of colonial dominance in British India. Farina Mir asks how qisse, a vibrant genre of epics and romances, flourished in colonial Punjab despite British efforts to marginalize the Punjabi language. She explores topics including Punjabi linguistic practices, print and performance, and the symbolic content of qisse. She finds that although the British denied Punjabi language and literature almost all forms of state patronage, the resilience of this popular genre came from its old but dynamic corpus of stories, their representations of place, and the moral sensibility that suffused them. Her multidisciplinary study reframes inquiry into cultural formations in late-colonial north India away from a focus on religious communal identities and nationalist politics and toward a widespread, ecumenical, and place-centered poetics of belonging in the region.
