memoria press workbooks: *The Well-Trained Mind* Susan Wise Bauer, Jessie Wise, 2016-08-09
Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. *The Well-Trained Mind* will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. *The Well-Trained Mind* will give you the tools you'll need to teach your child with confidence and success.

memoria press workbooks: Numbers Book , 2012-03-21

memoria press workbooks: Peacebuilding, Memory and Reconciliation Bruno Charbonneau, Genevieve Parent, 2013-06-17 This book aims to bridge the gap between what are generally referred to as 'top-down' and 'bottom-up' approaches to peacebuilding. After the experience of a physical and

psychological trauma, the period of individual healing and recovery is intertwined with political and social reconciliation. The prospects for social and political reconciliation are undermined when a 'top-down' approach is favoured over the 'bottom-up strategy'- the prioritization of structural stability over societal well-being. Peacebuilding, Memory and Reconciliation explores the inextricable link between psychological recovery and socio-political reconciliation, and the political issues that dominate this relationship. Through an examination of the construction of social narratives about or for peace, the text offers a new perspective on peacebuilding, which challenges and questions the very nature of the dichotomy between 'top-down' and 'bottom-up' approaches. This book will be of much interest to students of peacebuilding, peace and conflict studies, social psychology, political science and IR in general.
